Committees of Congress

Selected Federal Homeland Security Assistance Programs: A Summary

Summary

Congress has supported a limited number of assistance programs specifically designed to assist state and local governments with homeland security activities. Some programs assist first responders with preparing for terrorist attacks, particularly those involving weapons of mass destruction. In addition, Congress has authorized several general assistance programs that states and localities may use for terrorism preparedness.

The Department of Homeland Security administers most of the assistance programs. In addition, other agencies, including the Departments of Defense, Health and Human Services, Energy, and Justice administer programs that provide various kinds of homeland security assistance. Congress authorizes these assorted programs to provide help in a variety of forms, including grants, training, technical assistance, equipment, and exercises. Most of the programs focus on assisting state and local first responders, such as fire service, emergency medical service, and law enforcement personnel, prepare for potential attacks. Some observers believe that with the threat of bioterrorism, public health officials should also be considered first responders.

This report will be updated as congressional or executive actions warrant.

Selected Federal Homeland Security Assistance Programs: A Summary

Introduction

This report lists and describes selected federal homeland security assistance programs for state and local governments, particularly those that assist in preparing for, responding to, and recovering from terrorist attacks, including incidents involving weapons of mass destruction (WMD).¹ Some of the programs provide aid specifically for this purpose, while others are general assistance programs that recipients may use for homeland security. Depending on the structure of the program, local governments seeking assistance may apply directly to the federal agency or to their state program administrator.

The Department of Homeland Security (DHS) administers most terrorism assistance programs. Other programs are administered by several agencies, including the Departments of Defense (DOD), Energy (DOE), Health and Human Services (HHS), and Justice (DOJ). These agencies provide grants, training, and technical assistance for a wide range of homeland security activities.

This report provides the title, a brief description, administering federal agency, web site, and CRS contact for these programs. It does not provide details on course offerings and application requirements. The most up-to-date information should be available on agency and program web sites, and from the listed CRS analyst.

Table 1 on page CRS-13 provides information on eligible activities and applicants for the assistance programs in this report. Table 2 on page CRS-15 provides appropriations data on grant programs covered in this report.

Department of Homeland Security

Two agencies within DHS — the Office for Domestic Preparedness (ODP) and the Federal Emergency Management Agency (FEMA) — provide homeland security assistance to state and local governments. All these assistance programs provide grants to state and local entities, including law enforcement agencies, fire departments, emergency medical services, and emergency managers. These

¹ This report combines and updates CRS Report RL31227, *Terrorism Preparedness: Catalog of Selected Federal Assistance Programs*, by Ben Canada and CRS Report RL32117, *Department of Homeland Security First Responder Grants: A Summary*, by Shawn Reese.

programs provide funding to prepare for, prevent, mitigate, and respond to manmade, or natural hazards.

On January 26, 2004, DHS Secretary Tom Ridge informed Congress of his intention to consolidate ODP, currently within the Border and Transportation Security Directorate, with the Office of State and Local Government Coordination (SLGC). SLGC is within the Office of the DHS Secretary, and Congress gave the Secretary consolidation authority in the Homeland Security Act of 2002.² This new consolidated office would be named the Office of State and Local Government Coordination and Preparedness (SLGCP), and would report directly to the DHS Secretary.

The basis for this consolidation is the stated need for the establishment of a “one-stop-shop”, within DHS, for state and local governments. This one-stop-shop would integrate numerous federal preparedness initiatives into a single, streamlined, comprehensive program.³ S. 1245, introduced June 12, 2003, by Senators Collins, Allard, Akaka, Carper, Coleman, Feingold, Pryor, Rockefeller, Sununu, and Voinovich, proposes a similar approach by transferring ODP to SLGC.⁴ Additionally, H.R. 3266, introduced October 8, 2003, by Representative Cox, proposes a consolidation of all ODP grants into a single program, and that SGLC be the sole point of contact for this program.⁵

State Homeland Security Grant Program. This assistance program, the largest administered by ODP, provides financial assistance to states and territories to prepare for terrorist attacks involving WMD. In the FY2004 appropriations, this program was allocated \$1.7 billion.⁶ The grant funding formula used for this program is based on population, with a minimum of 0.75% guaranteed to every state, with the remaining amount distributed in direct proportion to the population of each state as directed by the USA PATRIOT Act.⁷ In accordance with their approved homeland security plan, states must allocate 80% of the grant funds to localities and distribute the funds within 45 days after receiving the allocated funds from ODP. There is no matching fund requirement for this program.

The program authorizes purchase of specialized equipment to enhance state and local agencies’ capability in preventing and responding to WMD incidents, and provides funds for protecting critical infrastructure of national importance. This program provides grant funds for designing, developing, conducting, and evaluating

⁷ P.L. 107-56, sec. 1014(c)(3).

WMD exercises; developing and conducting WMD training programs; and updating and implementing each state's Homeland Security Strategy (SHSS).⁸

Funds from this program may be used to plan for, design, develop, conduct, and evaluate exercises that train first responders, and to assess the readiness of state and local jurisdictions to prevent and respond to terrorist attacks. Exercises must be threat- and performance-based, in accordance with ODP Homeland Security Exercise and Evaluation Program (HSEEP) manuals. Exercises conducted with funds from this program must be managed and executed in accordance with HSEEP.⁹

Funds from this program may be used to enhance the capabilities of state and local first responders through the development of a state homeland security training program. Allowable training costs include establishment of WMD training capacities within existing training academies, universities, and junior colleges.¹⁰

States are the only authorized applicants, with the following state and local entities eligible to receive funding:

- emergency management agencies or offices;
- homeland security agencies or offices;
- fire departments;
- law enforcement agencies;
- emergency medical services;
- hazardous material-handling personnel;
- public works agencies or offices;
- public health agencies or offices;
- governmental administrative agencies or offices; and
- public safety communications agencies or offices.¹¹

Urban Area Security Initiative Program. This program is a discretionary grant program with no prescribed allocation formula that provides funding to metropolitan areas (including counties and mutual aid partners), to prepare for, prevent, and respond to terrorist incidents. DHS was appropriated \$725 million in the FY2004 appropriations for this program.¹² DHS conducts a vulnerability and threat assessment that considers location of critical infrastructure and population density of all major metropolitan areas. Based on these assessments, selected

⁸ U.S. Department of Homeland Security, Office for Domestic Preparedness, *Fiscal Year 2004 State Homeland Security Grant Program*, "Program Guidelines and Application Kit," (Washington: 2003), p. 1.

¹⁰ *Ibid.*, p. 4.

¹¹ *Ibid.*, p. 2.

¹² P.L. 108-90.

metropolitan areas receive grant funds that are passed directly through from the states.¹³ Each local government within the threat urban area shares a portion of the allocated funds. There is no matching requirement for this program.

Metropolitan areas may use funds from this program to purchase specialized WMD equipment, plan and execute exercises, pay first responder overtime costs associated with heightened threat levels, and train first responders. Additionally, funds from this program can be used for port and mass transit security, radiological defense systems, pilot projects, and technical assistance.¹⁴ DHS selects metropolitan areas to receive funding based on the department's vulnerability and threat assessment.

Assistance to Firefighters Program.¹⁵ This program awards one-year grants directly to fire departments to enhance their abilities to respond to fires and fire-related hazards.¹⁶ The program seeks to support fire departments that lack the tools and resources necessary to protect the health and safety of the public and firefighting personnel.¹⁷ This program was allocated \$750 million in FY2004 appropriations.¹⁸ At least 5% of the funds go to prevention programs, and recipients agree to contribute a 30% nonfederal match if the local population is greater than 50,000, or 10% if the local population is 50,000 or less. Grant recipients may not receive more than \$750,000 for any fiscal year.¹⁹ The program's grant application process is competitive, and applications are peer reviewed by state and local fire department officials.

¹³ U.S. Department of Homeland Security, Office of the Press Secretary, "Fact Sheet: Department of Homeland Security Funding for States and Cities," press release, May 21, 2003. Available at: [<http://www.dhs.gov/dhspublic/display?content=755>], visited Apr. 1, 2004.

¹⁴ U.S. Department of Homeland Security, Office of the Press Secretary, "Securing the Homeland: Protecting Our Urban Areas," press release, May 14, 2003. Available at: [<http://www.dhs.gov>], visited Apr. 1, 2004.

¹⁵ For further information on the Assistance to Firefighters program see CRS Report RS21302 *Assistance to Firefighter Program*, by Len Kruger.

¹⁶ In the conference report to accompany H.R. 2555 (H.Rept. 108-280), the Assistance to Firefighters grant program is to be administered by ODP. It also specifies that the grant administration process will not be changed from the present procedures, to include peer review and involvement by USFA.

Citizen Corps' Community Emergency Response Teams. On January 29, 2002, President Bush issued an executive order²⁰ which established the USA Freedom Corps. USA Freedom Corps' mission is to increase opportunities for citizens by expanding and enhancing public service. Within the USA Freedom Corps, the *Citizen Corps* program was established to coordinate volunteer organizations, with the mission to make local communities safe and prepared to respond to any emergency situation. Community Emergency Response Teams (CERT) is the only program of the four which Citizen Corps administers that provides grant funding to volunteer first responders.

CERT trains people to be prepared to respond to emergency situations in their own local communities. CERTs are groups of volunteers within communities that are trained by professional first responders to assist in the event of a disaster. CERT members give critical support to first responders, provide immediate assistance to victims, and organize spontaneous volunteers at a disaster site.

In FY2004 Congress appropriated \$40 million, however, there was no specific line item for CERT.²¹ In FY2003, FEMA allocated funds to this program through a population based formula with no matching requirement. No information is available at this time on how ODP will allocate funds from this program.

This program authorizes the funding to provide for training of CERT members only. The CERT program is a professionally instructed course is taught by a team of first responders who have the requisite knowledge and skills. The course, taught to groups of citizens within their communities, and consists of two and a half hour sessions held one evening a week, over a seven week period.²² States apply for a grant under this program, while any community that has established a Citizen Corps Council is also eligible to receive funding from this program.

Law Enforcement Terrorism Prevention Program. In the FY2004 DHS appropriations, Congress directed ODP to establish a local law enforcement terrorism prevention grant program for states and localities.²³ This program provides funds to support activities to establish and enhance state and local efforts to prevent and deter terrorist attacks. In the FY2004 appropriations, this program was allocated \$500 million.²⁴ The grant funding formula used for this program is based on population, with a minimum of 0.75% guaranteed to every state, with the remaining amount distributed in direct proportion to the population of each state as directed by the USA PATRIOT Act.²⁵ In accordance with their approved homeland security plans, states must allocate 80% of the grant funds to localities and distribute the funds within 45 days after receiving the allocated funds from ODP. There is no matching fund requirement for this program.

Eligible program activities authorized include:

- information sharing to preempt terrorist attacks;
- target hardening to reduce vulnerability of selected high value targets;
- threat recognition to recognize the potential or actual threats; and
- intervention activities to interdict terrorists.

Approved costs for this program include, but are not limited to, personnel costs (including overtime as approved by the state administering agency), equipment, systems, and related expenses.²⁶ State and local law enforcement agencies are authorized to apply for grant funding under this program.

CRS Contact: Shawn Reese, 7-0635

Emergency Management Performance Grants. This program is designed to assist the development, maintenance, and improvement of state and local emergency management capabilities. It provides support to state and local governments to achieve measurable results in key functional areas of emergency management.²⁷ The FY2004 appropriations act allocated \$180 million to the Emergency Management Performance Grants (EMPG) program.²⁸ The grant formula used for this program is based on population, with a minimum of 0.75% guaranteed to every state, with the remaining amount distributed in direct proportion to the

²⁸ P.L. 108-90.

population of each state.²⁹ The distribution of funds from states to localities is at the discretion of each state's EMPG administering agency, typically the state emergency management agency or office. The state matching requirement for this program is 50%.³⁰

EMPG funds are used for emergency management personnel costs, travel, training, supplies, and other routine expenditures for emergency management activities.³¹ Funds from this grant program may also be used for consequence management preparedness projects and programs that develop and improve the capabilities of states and localities to prepare for, respond to, and recover from acts of terrorism involving WMD.³²

States may use the funds provided through the EMPG to structure their individual emergency management programs based on identified needs and priorities for strengthening emergency management capabilities. States may also use EMPG funds to develop intrastate emergency management systems that encourage partnership building among government, business, and volunteer and community organizations.³³ State emergency management agencies or offices are eligible applicants and recipients of this grant program; additionally, state emergency management agencies may pass funds to emergency management offices at the local level.

Agency: Office for Domestic Preparedness

CRS Contact: Keith Bea, 7-8672

Interoperable Communications Grant Program. ODP provides grants to local governments for demonstration projects to explore the uses of equipment and technologies supporting fire services, law enforcement agencies and emergency medical services that would increase interoperability. The projects are to illustrate and encourage the acceptance of new technologies and operating methods to assist communities in achieving interoperability.³⁴

²⁹ R. David Paulson, Director, Preparedness Division, Federal Emergency Management Agency, *Allocation of FY 2003 Emergency Management Performance Grant Funds*, memorandum for regional directors and acting regional directors, March 20, 2003, p. 1. P.L. 107-56, sec. 1014(c)(3). This formula mirrors the ODP's State Homeland Security Grant program and is based on the USA PATRIOT Act.

³² *Ibid.*, p. 8.

³³ *Ibid.*, p. 9.

³⁴ CFDA, 83.566 *Interoperable Communications Equipment*, available at: [<http://www.cfda.gov/static/83566.htm>], visited Apr. 1, 2004.

In the FY2004 appropriations there was no specific line item for this program.³⁵ This program has no statutory formula, and grant awards require a 25% non-federal cost share, but the match does not need to be a cash match. In-kind contributions are permitted, but they must be activities in direct support of, and eligible under, this project.³⁶

This program authorizes the purchase of equipment for multi-disciplinary and multi-jurisdictional public safety communications projects. This includes shared networks and portable gateway solutions.³⁷ Portable gateway solutions consist of computer hardware that allows first responders to communicate with transportable computer equipment. Each state is authorized to nominate a local government to participate in an interoperable communications project, and these nominated local governments are the only eligible recipients of grant funding.³⁸

Agency: Office for Domestic Preparedness
Web Site: [<http://www.fema.gov/preparedness/empg.shtm>]
CRS Contact: Shawn Reese, 7-0635

Urban Search and Rescue Task Forces. The *Federal Response Plan* calls for Urban Search and Rescue (US&R) task forces to provide special rescue assistance to state and local authorities when requested following a disaster.³⁹ Such capabilities include locating and extricating victims in collapsed structures and providing on-site medical treatment as necessary. Each task force has at least 62 personnel, with at least two people in each of 31 positions. Most members are either firefighters or paramedics, but some are private sector specialists.⁴⁰

FEMA provides full funding for the initial equipment costs of new task forces, which amounted to \$1.7 million for each task force when the program started. FEMA also provides some funds to meet ongoing training and equipment costs. In FY2004, FEMA allocated \$60 million to the US&R program for training and equipment, which is distributed to each task force based on need.⁴¹ According to program officials, state and local governments can expect to pay 80% of the long-term costs associated with sponsoring a US&R task force. In addition to providing funding for equipment and training, FEMA also provides hands-on training in search

³⁵ P.L. 108-90.

³⁷ *Ibid.*

³⁸ *Ibid.*

³⁹ The *Federal Response Plan* (FRP) outlines procedures for FEMA and other federal agencies in meeting needs of state and local governments overwhelmed by disasters. The role of US&R Task Forces is discussed in Emergency Support Function #9. Available at: [<http://www.fema.gov/r-n-r/frp/>], visited Apr. 1, 2004.

⁴⁰ An example of private sector specialists would be members with hazardous materials training.

⁴¹ P.L. 108-90.

and rescue techniques and equipment, and technical assistance to local communities that support US&R task forces.⁴²

U.S. Urban Search & Rescue Task Forces:

- Beverly, MA;
- New York, NY;
- Montgomery County, MD;
- Fairfax County, VA;
- Virginia Beach, VA;
- Metro Dade County, FL;
- Miami, FL;
- Harrisburg, PA;
- Miami Valley, OH;
- Marion County, IN;
- Memphis, TN;
- Boone County, MO;
- Lincoln, NE;
- College Station, TX;
- Santa Fe, NM;
- Denver, CO;
- Salt Lake City, UT;
- Clark County, NV;
- Phoenix, AZ;
- San Diego, CA;
- Orange County, CA;
- Riverside, CA;
- Los Angeles, CA;
- Los Angeles County, CA;
- Menlo Park, CA;
- Oakland, CA;
- Sacramento, CA; and
- Puget Sound, WA.

Most US&R funds are used to purchase or upgrade equipment, and provide training to US&R task force personnel. Funds also provide for equipping new task forces. Several years have passed since new task forces were initiated, however, FEMA has not determined how much funding would be necessary today to equip a new task force. Funding is directed to the 28 nationwide US&R task forces, which are the only eligible applicants under this program.

Other DHS Homeland Security Assistance Activities. ODP also conducts research and development through its Equipment Acquisition and Support Program within the State Homeland Security Grant Program, which works with federal, state, and local entities on equipment related issues such as testing, standards, and the identification of new equipment needs.⁴³

ODP offers a number of training and technical assistance programs to state and local agencies to enhance their ability to respond to domestic emergency incidents. The office works with a number of specialized institutions in the design and delivery of the training programs, one of which is the National Domestic Preparedness Consortium, a partnership involving several public universities and the U.S. Department of Energy (DOE).

Technical assistance is generally targeted to state and local agencies to enhance their ability to develop, plan, and implement programs for WMD preparedness. ODP provides specific assistance in such areas as the development of response plans, exercise scenarios, conduct of risk and vulnerability assessments, and the development of the domestic preparedness strategies.⁴⁴

Emergency Management Institute. The Institute provides training for state and local emergency response personnel in basic emergency management and terrorism preparedness and is intended to improve emergency management practices among state and local emergency managers, as well as federal officials. Programs embody the Comprehensive Emergency Management System by unifying the elements of management common to all emergencies: preparedness, mitigation, response, and recovery. It provides training in the following areas:

- mitigation;
- readiness and technology;
- professional development;
- disaster operations and recovery; and
- integrated emergency management.⁴⁵

Agency: Federal Emergency Management Agency

learning mechanisms. The Academy offers a wide selection of courses in such areas as professional development, incident management, information management, hazardous materials, fire prevention, and volunteer leadership.

Agency: U.S. Fire Administration
Web Site: [<http://www.usfa.fema.gov/nfa>]
CRS Contact: Len Kruger, 7-7070

Department of Defense

Presently, DOD provides only one program for state and local first responders. This program, through the U.S. Army Medical Research Institute of Infectious Diseases (USAMRIID), provides medical training for public health professionals.

U.S. Army Medical Research Institute of Infectious Diseases. USAMRIID provides training opportunities for public health professionals. Courses are taught at the USAMRIID facility in Aberdeen, MD, but are also available through satellite broadcasts and other distance learning mechanisms. Courses focus on recognizing signs of bioterrorism attacks, planning and preparing for mass casualties, and preventing the spread of disease.

Agency: U.S. Army Medical Research Institute of Infectious Diseases (DOD)
Web Site: [<http://www.usamriid.army.mil/education/index.html>]
CRS Contact: Steve Bowman, 7-7613

Department of Energy

DOE , through its Office of Assets Utilization, provides homeland security assistance by providing equipment to state and local first responders. DOE also conducts research and development activities in the field of homeland security technologies; however, this research and development program does not provide direct assistance to state and local governments for domestic preparedness activities.

Homeland Defense Equipment Reuse Program. DOE's Office of Assets Utilization offers surplus radiological detection instrumentation to cities through its Homeland Defense Equipment Reuse Program. Equipment is "older-generation" instrumentation that would otherwise be destroyed. Recipients receive equipment training from ODP.

CRS Contact: Jonathan Medalia, 7-7632

Department of Health and Human Services

HHS provides grants and planning assistance to states and localities for bioterrorism preparedness through two agencies — the Centers for Disease Control and Prevention (CDC), and the Health Resources and Services Administration (HRSA). For more information see CRS report RL31719, *An Overview of the U.S. Public Health System in Context of Bioterrorism*, by Holly Harvey.

Public Health Preparedness and Response for Bioterrorism. CDC administers this program that provides formula grants to the health departments of all 50 states, the District of Columbia, the U.S. territories, and the nation's three largest municipalities (New York, Chicago, and Los Angeles County) to upgrade state and local preparedness for responding to bioterrorism attacks and other public health threats and emergencies. Funding must be used for preparedness planning and readiness assessment, expanding disease surveillance and epidemiologic capacity, strengthening lab capacity, establishing a secure communications network among state and local public health agencies, and education and training. In FY2004, the program was appropriated \$940 million for these activities.

Agency: Centers for Disease Control and Prevention
Web Site: [<http://www.bt.cdc.gov/planning/coopagreementaward>]
CRS Contact: Holly Harvey, 7-4913

Bioterrorism Hospital Preparedness Program. HRSA administers this program that provides formula grants to the health departments of all 50 states, the District of Columbia, the U.S. Territories, and the nation's three largest municipalities (New York, Chicago, and Los Angeles County). The program facilitates state and regional planning with local hospitals and other health care facilities, upgrades the preparedness of these entities to respond to bioterrorism, natural outbreaks of infectious disease, and other public health emergencies. Funding is used for regional hospital preparedness planning, and to recruit and train emergency personnel and upgrade hospital infrastructure. In FY2004, this program was appropriated \$518 million for these activities.

Agency: Health Resources and Services Administration

CRS Contact: Holly Harvey, 7-4913

Department of Justice

DOJ provides training and technical assistance to state and local law enforcement personnel through its Bureau of Justice Assistance. Other assistance provided by DOJ, such as the Local Law Enforcement Block Grant, Byrne Memorial Formula Grant, and Community-Oriented Policing Service, are within the Office of

Justice Programs and provide assistance for public safety. They are not specifically focused on homeland security, and therefore are not covered in this report.⁴⁶

State and Local Anti-Terrorism Training. Funding is available to provide training and technical assistance to state and local law enforcement personnel. Four broad categories are funded:

- providing state and local law enforcement agencies with knowledge of “political” extremist movements;
- disseminating information relating to vital elements of law enforcement preparedness for terrorist attacks;
- providing a general planning orientation to state and local law enforcement agencies pertaining to crisis and consequence management and incident command; and
- maintaining and enhancing a domestic terrorism database.

Source: FY2004 amounts come from appropriations statutes. FY2005 request amounts come from U.S. Office of Management and Budget, *Fiscal Year 2005 Budget of the United States Government*, (Washington: GPO, 2004).

^A Amounts come from the FY2004 DHS appropriations (P.L. 108-99) and the omnibus appropriations (P.L. 108-199).

^B Amounts come from the U.S. Office of Management and Budget, *Fiscal Year 2005 Budget of the United States Government*, (Washington: GPO, 2004).

^C The Interoperable Communications Grants program was not appropriated funds in FY2004, nor did the Administration request appropriations for the program in FY2005; however, the State Homeland Security Grant programs provides funding for interoperable communications equipment.
