CRS Report for Congress

Prepared for Members and Committees of Congress

Summary

U.S. policy toward the Central Asian states has aimed at facilitating their cooperation with U.S. and NATO stabilization efforts in Afghanistan and their efforts to combat terrorism; proliferation; and trafficking in arms, drugs, and persons. Other U.S. objectives have included promoting free markets, democratization, human rights, energy development, and the forging of East-West and Central Asia-South Asia trade links. Such policies aim to help the states become what various U.S. administrations have considered to be responsible members of the international community rather than to degenerate into xenophobic, extremist, and anti-Western regimes that contribute to wider regional conflict and instability.

Soon after the terrorist attacks on the United States on September 11, 2001, all the Central Asian “front-line” states offered over-flight and other support for coalition anti-terrorism operations in Afghanistan. Kyrgyzstan, Tajikistan, and Uzbekistan hosted coalition troops and provided access to airbases. In 2003, Kazakhstan and Uzbekistan also endorsed coalition military action in Iraq. About two dozen Kazakhstani troops served in Iraq until late 2008. Uzbekistan rescinded U.S. basing rights to support operations in Afghanistan in 2005 after the United States criticized the reported killing of civilians in the town of Andijon. In early 2009, Kyrgyzstan ordered a U.S. base in that country to close, allegedly because of Russian inducements and U.S. reluctance to meet Kyrgyz requests for greatly increased lease payments. An agreement on continued U.S. use of the Manas Transit Center was reached in June 2009. The Kyrgyz leadership has declared that it will not extend the basing agreement when it comes up for renewal in 2014. In recent years, most of the regional states also participate in the Northern Distribution Network for the transport of U.S. and NATO supplies into and out of Afghanistan.

Policymakers have tailored U.S. policy in Central Asia to the varying characteristics of these states. U.S. interests in Kazakhstan have included securing and eliminating Soviet-era nuclear and biological weapons materials and facilities. U.S. energy firms have invested in oil and natural gas development in Kazakhstan and Turkmenistan, and successive administrations have backed diverse export routes to the West for these resources. U.S. policy toward Kyrgyzstan has long included support for its civil society. In Tajikistan, the United States focuses on developmental assistance to bolster the fragile economy and address high poverty rates. Tajikistan and Kyrgyzstan, as well as the region, can gain economically if water resources are properly developed and managed. U.S. relations with Uzbekistan—the most populous state in the heart of the region—were cool after 2005, but recently have improved. Congress has been at the forefront in advocating increased U.S. ties with Central Asia, and in providing backing for the region for the transit of equipment and supplies for U.S.-led stabilization efforts in Afghanistan. Congress has pursued these goals through hearings and legislation on humanitarian, economic, and democratization assistance; security issues; and human rights.

During the 113th Congress, the Members may review assistance for bolstering regional border and customs controls and other safeguards to prevent the proliferation of weapons of mass destruction (WMD), combating trafficking in persons and drugs, encouraging regional integration with South Asia and Europe, advancing energy and other resource security, and countering terrorism. Support for these goals also has been viewed as contributing to U.S. and NATO stabilization and reconstruction efforts in Afghanistan. For several years, Congress has placed conditions on assistance to Kazakhstan and Uzbekistan because of concerns about human rights abuses and lagging democratization (the Secretary of State may waive such conditions). Congress will continue to consider how to balance these varied U.S. interests in the region as U.S. and NATO military operations wind down in Afghanistan.

Most Recent Developments

In early April 2013, Dushanbe city council member, businessman, and former Industry Minister Zaid Saidov announced an initiative to form the opposition New Tajikistan Party. On May 19, 2013, he was detained on charges of fraud, bribery, and abuse of power that allegedly took place during his time as minister in 2002-2006. He also initially was charged with polygamy. Many observers viewed the charges as politically motivated to block the possible participation of the nascent party in the prospective November 2013 presidential and 2015 legislative elections.

Russian security forces raided an apartment near Moscow on May 20, 2013, and killed two alleged members of the Islamic Movement of Uzbekistan (IMU) terrorist group and arrested a third. Russian media reported that the alleged IMU members were Russian citizens who were trained in camps in Pakistan and who were planning to carry out terrorist acts in Moscow.

Historical Background

Central Asia consists of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan; it borders Russia, China, the Middle East, and South Asia. The major peoples of all but Tajikistan speak Turkic languages (the Tajiks speak an Iranian language), and most are Sunni Muslims (some Tajiks are Shiia Muslims). Most are closely related historically and culturally. By the late 19th century, Russian tsars had conquered the last independent khanates and nomadic lands of Central Asia. By the early 1920s, Soviet power had been imposed; by 1936, five “Soviet Socialist Republics” had been created. Upon the collapse of the Soviet Union in December 1991, they gained independence.¹

Overview of U.S. Policy Concerns

After the collapse of the Soviet Union at the end of 1991, then-President George H. W. Bush sent the “FREEDOM Support Act” (FSA) aid authorization to Congress, which was amended and signed into law in October 1992 (P.L. 102-511; aid provisions were included as Part I, Chapter 11 of the Foreign Assistance Act of 1961, P.L. 87-195). In 1999, congressional concerns led to passage of the “Silk Road Strategy Act” (P.L. 106-113), which authorized enhanced policy and aid to support conflict amelioration, humanitarian needs, economic development, transport and communications, border controls, democracy, and the creation of civil societies in the South Caucasus and Central Asia. Since FY2003, Congress has conditioned foreign assistance to Kazakhstan and Uzbekistan on their progress in respecting human rights (with national security waivers for Kazakhstan, and more recently, for Uzbekistan) (see below, “Congressional Conditions on Kazakh and Uzbek Aid”). Since FY2012, the Administration has included assistance to Central Asia under the authority of the Economic Support Fund (Part II, Chapter 4 of the Foreign Assistance Act of 1961, P.L. 87-195).

¹ See CRS Report 97-1058, *Kazakhstan: Recent Developments and U.S. Interests*, by Jim Nichol; CRS Report 97-690, *Kyrgyzstan: Recent Developments and U.S. Interests*, by Jim Nichol; CRS Report 98-594, *Tajikistan: Recent Developments and U.S. Interests*, by Jim Nichol; CRS Report 97-1055, *Turkmenistan: Recent Developments and U.S. Interests*, by Jim Nichol, and CRS Report RS21238, *Uzbekistan: Recent Developments and U.S. Interests*, by Jim Nichol.

U.S. policymakers and others hold various views on the appropriate types and levels of U.S. involvement in the region. Some have argued that ties with “energy behemoth” Kazakhstan are crucial to U.S. interests.² Others have argued that Uzbekistan is the “linchpin” of the region (it is the most populous regional state and is centrally located, shaping the range and scope of regional cooperation) and should receive the most U.S. attention.

In general, U.S. aid and investment have been viewed as strengthening the independence of the Central Asian states and forestalling Russian, Chinese, Iranian, or other efforts to subvert them. Advocates of U.S. ties have argued that political turmoil and the growth of terrorist enclaves in Central Asia could produce spillover effects both in nearby states, including U.S. allies and friends such as Turkey, and worldwide. They also have argued that the United States has a major interest in preventing terrorist regimes or groups from illicitly acquiring Soviet-era technology for making weapons of mass destruction (WMD). They have maintained that U.S. interests do not perfectly coincide with those of its allies and friends, that Turkey and other actors

possess limited aid resources, and that the United States is in the strongest position as the sole superpower to influence democratization and respect for human rights. They have stressed that such U.S. influence will help alleviate social tensions exploited by Islamic extremist groups to gain adherents. They also have argued that for all these reasons, the United States should maintain military access to the region even when Afghanistan becomes more stable.³

Some views of policymakers and academics who previously objected to a more forward U.S. policy toward Central Asia appeared less salient after September 11, 2001—when the United States came to stress counter-terrorism operations in Afghanistan—but aspects of these views could again come to the fore as such operations wind down in Afghanistan in 2014. These observers argued that the United States historically had few interests in Central Asia and that developments there remained largely marginal to U.S. interests. They discounted fears that anti-Western Islamic extremism would make enough headway to threaten secular regimes or otherwise harm U.S. interests in Central Asia. They also argued that the United States should not try to foster democratization among cultures they claimed are historically attuned to authoritarianism. Some observers rejected arguments that U.S. interests in anti-terrorism,

Central Asia: Basic Facts

Total area: 1.6 million sq. mi., larger than India; Kazakhstan: 1.1 m. sq. mi.; Kyrgyzstan: 77,000 sq. mi.; Tajikistan: 55,800 sq. mi.; Turkmenistan: 190,000 sq. mi.; Uzbekistan: 174,500 sq. mi.

Total population: 64.97 million, slightly less than France; Kazakhstan: 17.74 m.; Kyrgyzstan: 5.55 m.; Tajikistan: 7.91 m.; Turkmenistan: 5.11 m.; Uzbekistan: 28.66 m. (July 2013 est., *The World Factbook*.)

Total gross domestic product: \$414.74 billion in 2012, slightly less than Belgium. Per capita GDP is about \$6,400, slightly less than Bhutan. There are large income disparities and relatively large percentages of people in each country are in poverty. Kazakhstan: \$231.3 b.; Kyrgyzstan: \$13.47 b.; Tajikistan: \$17.72 b.; Turkmenistan: \$47.55 b.; Uzbekistan: \$104.7 b. (*The World Factbook*, purchasing power parity.)

² U.S. Department of State, Office of the Spokesman, *Remarks: Secretary of State Condoleezza Rice At Eurasian National University*, October 13, 2005. More recently, Assistant Secretary of State Robert Blake has reiterated that “our relations with Kazakhstan ... are the deepest and broadest of all countries in Central Asia.” U.S. Department of State, *On-the-Record Briefing With International Media: Robert O. Blake, Jr., Assistant Secretary, Bureau of South and Central Asian Affairs*, August 15, 2012.

³ At least some of these views seemed to be reflected in the former Bush Administration’s 2006 National Security Strategy of the United States, which proclaimed that “Central Asia is an enduring priority for our foreign policy.” The Obama Administration’s May 2010 National Security Strategy does not specifically mention Central Asia or the Caspian region. The White House, *National Security Strategy of the United States*, March 16, 2006, p. 40; *National Security Strategy*, May 2010.

nonproliferation, regional cooperation, and trade outweighed concerns over democratization and human rights, and urged reducing or cutting off most aid to repressive Central Asian states. A few observers pointed to instability in the region as a reason to eschew deeper U.S. involvement such as military access that could needlessly place more U.S. personnel and citizens in danger.

The Obama Administration has listed six objectives of what it terms an enhanced U.S. engagement policy in Central Asia:

- to maximize the cooperation of the states of the region with coalition counter-terrorism efforts in Afghanistan (particularly cooperation on hosting U.S. and NATO airbases and on the transit of troops and supplies to and from Afghanistan along the “Northern Distribution Network”; see below);
- to increase the development and diversification of the region’s energy and other resources and supply routes;
- to promote the eventual emergence of good governance and respect for human rights;
- to foster competitive market economies;
- to combat the trafficking of narcotics and people; and
- to sustain nonproliferation.

Signs of this enhanced engagement include U.S. senior-level diplomatic visits and annual meetings of the U.S.-Central Asia Council on Trade and Investment (see below). In 2009, the Obama Administration also launched high-level Annual Bilateral Consultations (ABCs) with each of the regional states on counter-narcotics, counter-terrorism, democratic reforms, the rule of law, human rights, trade, investment, health, and education. In February 2012, the State Department announced that it was elevating relations with Kazakhstan to the level of a strategic partnership dialogue by transforming the bilateral ABC into a Strategic Partnership Commission, similar to the ones with Georgia and Ukraine. However, unlike these, no formal charter has been released. The first meeting of this Commission took place in April 2012 in Washington, DC, during which political, economic, and scientific working groups discussed plans for bilateral projects. A “mid-term review” meeting took place in October 2012.

In March 2013, Director of National Intelligence James Clapper testified that the governments of the Central Asian states remained threatened by instability and preferred repression of even small signs of discontent rather than implementation of political and economic reforms. He also assessed that “personal rivalries and longstanding disputes over borders, water, and energy create bilateral frictions between neighbors and potential flashpoints for conflict. Ethnic conflicts are also possible and could emerge with little warning.” He warned in particular that tensions between ethnic Uzbeks and Kyrgyz in southern Kyrgyzstan remained high in the absence of government efforts to foster reconciliation.⁴

Among relevant policy statements, Assistant Secretary of State Robert Blake appeared to emphasize U.S. security interests in testimony in November 2010 when he stated that “Central Asia plays a vital role in our Afghanistan strategy.... A stable future for Afghanistan depends on

⁴ U.S. Senate, Select Committee on Intelligence, *Statement for the Record, Worldwide Threat Assessment of the U.S. Intelligence Community*, James R. Clapper, Director of National Intelligence, March 12, 2013.

the continued assistance of its Central Asian neighbors, just as a stable, prosperous future for the Central Asian states depends on bringing peace, stability and prosperity to Afghanistan.”

Appearing at the same hearing as Blake, Deputy Assistant Secretary of Defense Robert Sedney stated that “from the Department of Defense perspective ... our focus is on the support for the effort in Afghanistan, but that is accompanied by the longer-term security assistance projects, including a variety of training efforts in areas from counterterrorism to counternarcotics that are building capabilities in those countries that are important for reasons well beyond Afghanistan.”⁵

At the same time, Assistant Secretary Blake in July 2010 refuted the arguments of critics “that this Administration is too focused on the security relationship with [Central Asian] countries and forgets about human rights.” He stated that human rights and civil society issues “will remain an essential part of our dialogue equal in importance to our discussion on security issues.”⁶

Similarly, in Congressional testimony in July 2012, he argued that “the path to progress on [human rights] is more engagement with these governments, not less.”⁷

In a speech in October 2012, Assistant Secretary Blake underlined that the Central Asian countries have an important role in ensuring the security of Afghanistan after 2014. He averred that the Silk Road Vision (see below, “Trade and Investment”) aimed to integrate Afghanistan into the larger regional economy and hailed the NDN as one means to boost private sector trade between Central and South Asia. He praised Central Asian economic cooperation with Afghanistan and stated that U.S. efforts to encourage economic and security ties between the Central Asian states and Afghanistan had provided opportunities to advocate for greater democratization and respect for human rights in Central Asia.⁸

Recent contacts between Central Asian leaders and President Obama and Secretaries Clinton and Kerry have included the following:

- The President met on April 11, 2010, with Kazakh President Nursultan Nazarbayev on the sidelines of the Nuclear Security Summit in Washington, DC. A joint statement reported that they “pledged to intensify bilateral cooperation to promote nuclear safety and nonproliferation, regional stability in Central Asia, economic prosperity, and universal values.” President Obama encouraged Kazakhstan to fully implement its 2009-2012 National Human Rights Action Plan. President Nazarbayev agreed to facilitate U.S. military air flights along a

- new trans-polar route that transits Kazakhstan to Afghanistan, and President Obama praised Kazakh assistance to Afghanistan.⁹
- Then-Secretary Clinton visited Kazakhstan, Kyrgyzstan, and Uzbekistan in early December 2010. In Kazakhstan, she participated in the OSCE Summit (see below, “Kazakhstan and the Presidency of the OSCE”). She also met briefly with Tajik President Rahmon and Turkmen President Gurbanguly Berdimuhamedow on the sidelines of the Astana Summit. In Uzbekistan, she signed an accord on scientific cooperation as one means, she explained, to further U.S. engagement with the country.
 - President Obama telephoned President Karimov on September 28, 2011, to thank him for Uzbekistan’s cooperation in stabilization efforts in Afghanistan, and reportedly to urge him to facilitate the transit of U.S. and NATO cargoes into and out of Afghanistan.
 - During her October 22-23, 2011, visit to Tajikistan and Uzbekistan, then-Secretary Clinton discussed the Silk Road Vision (see below, “Trade and Investment”) to turn Afghanistan into a regional transportation, trade, and energy hub linked to Central Asia. She also warned the presidents of both countries that restrictions on religious freedom could contribute to rising religious discontent.
 - President Obama met with President Nazarbayev at the nuclear security summit in Seoul, South Korea, in March 2012. President Obama hailed Kazakhstan’s efforts to secure nuclear materials inherited from the former Soviet Union.¹⁰
 - Secretary Kerry met with visiting Uzbek Foreign Minister Abdulaziz Kamilov in March 2013. Kerry stated that Uzbekistan is providing “very important” support for the NDN and infrastructure aid to Afghanistan, but also emphasized that bilateral ties were not limited to Afghan-related issues.¹¹

Post-September 11 and Afghanistan

After the terrorist attacks on the United States on September 11, 2001, then-Deputy Assistant Secretary of State B. Lynn Pascoe testified that the former Bush Administration realized that “it was critical to the national interests of the United States that we greatly enhance our relations with the five Central Asian countries” to prevent them from becoming harbors for terrorism.¹² All the Central Asian states soon offered overflight and other assistance to U.S.-led anti-terrorism coalition operations in Afghanistan. The states were predisposed to welcome such operations. Tajikistan and Uzbekistan had long supported the Afghan Northern Alliance’s combat against the Taliban, and all the Central Asian states feared Afghanistan as a base for terrorism, crime, and

¹² U.S. Senate, Committee on Foreign Relations, Subcommittee on Central Asia and the South Caucasus, *The U.S. Role in Central Asia. Testimony of B. Lynn Pascoe, Deputy Assistant Secretary for European and Eurasian Affairs*, June 27, 2002.

drug trafficking (even Turkmenistan, which had tried to reach some accommodation with the Taliban). The U.S.-led coalition's overthrow of the Taliban and routing of Al Qaeda and Islamic Movement of Uzbekistan (IIMU; see below) terrorists in Afghanistan increased the security of Central Asia.

According to then-Assistant Secretary of Defense J. D. Crouch in testimony in June 2002, "our military relationships with each [Central Asian] nation have matured on a scale not imaginable prior to September 11th." Crouch averred that "for the foreseeable future, U.S. defense and security cooperation in Central Asia must continue to support actions to deter or defeat terrorist threats" and to build effective armed forces under civilian control.

As outlined by Crouch and as affected by subsequent developments, security relationships include

- a "critical regional partnership" with Kyrgyzstan in OEF, providing basing for U.S. and coalition forces at Manas (in 2013, the U.S. Air Force reported that there were about 1,500 U.S. troops and U.S. contractors and about 700 Kyrgyz contractors at Manas).
- a base in Uzbekistan for U.S. operations at Karshi-Khanabad (K2; U.S. troops reportedly numbered less than 900 just before the 2005 pullout, see below), a base for German units near Termez (in 2013, *The Military Balance* reported that there were 163 German troops at the base), and a land corridor to Afghanistan for aid via the Friendship Bridge and a rail link at Termez.
- an agreement with Tajikistan to use its international airport in Dushanbe for refueling ("gas-and-go") and the country's hosting of a French force (in 2012, media reported that there were 100 French troops based in Tajikistan; they will depart by July 2013).
- overflight and other support by Kazakhstan and Turkmenistan.¹³

To obtain Uzbekistan's approval for basing, the 2002 U.S.-Uzbek Strategic Partnership Declaration included a nonspecific security guarantee. The United States affirmed that "it would regard with grave concern any external threat" to Uzbekistan's security and would consult with Uzbekistan "on an urgent basis" regarding a response. The two states pledged to intensify military cooperation, including "reequipping the Armed Forces" of Uzbekistan.

In 2005, however, Uzbekistan rescinded its basing agreement with the United States. Tajikistan and Uzbekistan have maintained their basing support for NATO peacekeeping operations, and Kyrgyzstan for U.S. and NATO operations, in Afghanistan. In 2009, most Central Asian states agreed to facilitate the air and land transport of U.S. and NATO nonlethal supplies (and later of lethal equipment by air) to Afghanistan as an alternative to land transport via increasingly volatile Pakistan. In 2012, most of the states approved the reverse transit of supplies and equipment out of Afghanistan. For further details, see below, "U.S. Security and Arms Control."

¹³ Senate Foreign Relations Committee, Subcommittee on Central Asia and the South Caucasus, *Statement of J.D. Crouch II, Assistant Secretary of Defense for International Security Policy*, June 27, 2002.

Support for Operation Iraqi Freedom

Uzbekistan and Kazakhstan were the only Central Asian state that joined the “coalition of the willing” in 2003 that endorsed U.S.-led coalition military operations in Iraq. Uzbekistan subsequently decided not to send troops to Iraq. In August 2003, Kazakhstan deployed some two dozen troops to Iraq who served under Polish command and carried out water-purification, demining, and medical activities. They pulled out in late 2008.

Fostering Pro-Western Orientations

The United States has encouraged the Central Asian states to become responsible members of the international community, supporting integrative goals through bilateral aid and through coordination with other aid donors. The stated policy goal is to discourage radical anti-democratic regimes and terrorist groups from gaining influence. All the Central Asian leaders publicly embrace Islam but display hostility toward Islamic fundamentalism. At the same time, they have established some trade and aid ties with Iran. Some observers argue that, in the longer run, their foreign policies may not be anti-Western but may more closely reflect some concerns of other Islamic states. Some Western organizational ties with the region have suffered in recent years, in particular those of the OSCE, which has been criticized by some Central Asian governments for advocating democratization and respect for human rights.¹⁴ Despite this criticism, President Nazarbayev successfully pushed for Kazakhstan to hold the presidency of the OSCE in 2010 (see below).

In early 2006, the State Department incorporated Central Asia into a revamped Bureau of South and Central Asian Affairs. According to former Principal Deputy Assistant Secretary of State Steven Mann, “institutions such as NATO and the OSCE will continue to draw the nations of Central Asia closer to Europe and the United States,” but the United States also will encourage the states to develop “new ties and synergies with nations to the south,” such as Afghanistan, India, and Pakistan.¹⁵ Other observers, however, criticized the State Department action, arguing that it deemphasized efforts to integrate the region into European institutions, subordinated U.S. ties with Central Asia to the U.S. strategic calculus regarding Afghanistan and to other U.S. ties with South Asia, and provided an opportunity for Russia and China to move into the breach to assert greater influence.¹⁶

The European Union (EU) has become more interested in Central Asia in recent years as the region has become more of a security threat as an originator and transit zone for drugs, weapons of mass destruction, refugees, and persons smuggled for prostitution or labor. Russia’s cutoff of gas supplies in 2006 and 2009 to Ukraine—which hindered gas supplies transiting Ukraine to

¹⁵ U.S. House of Representatives, Committee on International Relations, Subcommittee on the Middle East and Central Asia, Hearing on Assessing Energy and Security Issues in Central Asia, *Testimony of Steven Mann, Principal Deputy Assistant Secretary for South and Central Asian Affairs*, July 25, 2006. The State Department appointed a Senior Advisor on Regional Integration in the Bureau of South and Central Asian Affairs, Robert Deutsch, who focused on bolstering trade and transport ties between South and Central Asia.

¹⁶ U.S. Senate, Committee on Foreign Relations, Subcommittee on International Economic Policy, Export, and Trade, Hearing on Energy Supplies in Eurasia and Implications for U.S. Energy Security, *Testimony by Zeyno Baran*, September 27, 2005.

European customers—also bolstered EU interest in Central Asia as an alternative supplier of oil and gas. Such interests contributed to the launch of a Strategy Paper for assistance for 2002-2006 and a follow-on for 2007-2013 (see below), and the EU's appointment of a Special Representative to the region. The EU has implemented Partnership and Cooperation Agreements (PCAs, which set forth political, economic, and trade relations) with Kazakhstan, Kyrgyzstan, and Uzbekistan. An existing Interstate Oil and Gas Transport to Europe (INOGATE) program was supplemented in 2004 and 2006 by a Baku Energy Initiative and Astana Energy Ministerial Declaration to diversify energy supplies. One project involved the proposed Nabucco pipeline, which would transport Caspian region gas to Austria (see "Energy Resources," below).

In June 2007, the EU approved a new "Central Asian strategy" for enhanced aid and relations for 2007-2013. It argues that the EU ties with the region need to be enhanced because EU enlargement and EU relations with the South Caucasus and Black Sea states bring it to Central Asia's borders. The strategy also stresses that "the dependency of the EU on external energy sources and the need for a diversified energy supply policy in order to increase energy security open further perspectives for cooperation between the EU and Central Asia," and that the "EU will conduct an enhanced regular energy dialogue" with the states. Under the strategy, the EU set up offices in each regional state and pledged regional assistance of \$1 billion. EU emissaries hold dozens of meetings and seminars each year with the Central Asian states on such issues as human rights, civil society development, foreign policy and assistance, trade and investment, environmental and energy cooperation, and other issues.¹⁷

Russia's Role

During most of the 1990s, successive U.S. administrations generally viewed a democratizing Russia as serving as a role model in Central Asia. Despite growing authoritarian tendencies in Russia during the presidencies of Vladimir Putin (2000-2008, and again in 2012-2017) and Dmitry Medvedev (2008-2012), successive U.S. administrations have emphasized that Russia's counter-terrorism efforts in the region broadly support U.S. interests. At the same time, successive administrations have stressed to Russia that it should not seek to dominate the region or exclude Western and other involvement. Virtually all U.S. analysts agree that Russia's actions should be monitored to ensure that the independence of the Central Asian states is not vitiated.

Soon after the terrorist attacks on the United States on September 11, 2001, Russia acquiesced to increased U.S. and coalition presence in the region for operations against Al Qaeda and its supporters in Afghanistan. Besides Russia's own concerns about Islamic extremism in Afghanistan, Central Asia, and its own North Caucasus, it was interested in boosting its economic and other ties to the West and regaining some influence in Afghanistan. In the later part of the 2000s, however, Russia appeared to step up efforts to counter U.S. influence in Central Asia and reassert its own "great power" status by advocating that the states increase economic and strategic ties with Russia and limit such ties with the United States. This stance included backing and encouragement for Uzbekistan and Kyrgyzstan to close their U.S. airbases. Such a stance appeared paradoxical to U.S. officials, since Russia (and China) benefitted from anti-terrorism operations carried out by U.S. (and NATO) forces in Afghanistan. Closer U.S.-Russia relations

¹⁷ European Commission, *Regional Strategy Paper for Assistance to Central Asia for the Period 2007-2013*, June 2007; European Commission, External Relations Directorate, *Central Asia DCI Indicative Program 2011 – 2013*, September 2010; European Union, *Remarks by High Representative Catherine Ashton Following the EU-Central Asia Ministerial Meeting in Kyrgyzstan*, Press Release, November 27, 2012.

that developed after 2009 appeared to include some Russian cooperation with U.S. and NATO stabilization efforts in Afghanistan.

During the 1990s, Russia's economic decline and demands by Central Asia caused it to reduce its security presence, a trend that Vladimir Putin since 2000 has appeared determined to reverse. In 1999, Russian border guards were largely phased out in Kyrgyzstan, the last Russian military advisors left Turkmenistan, and Uzbekistan withdrew from the Collective Security Treaty (CST; see below) of the Commonwealth of Independent States (CIS), in part because the treaty members failed to help Uzbekistan meet the growing Taliban threat in Afghanistan, according to Uzbek President Islam Karimov.

Despite these moves, Russia appeared determined to maintain a military presence in Tajikistan. It has retained from the Soviet period the 201st motorized infantry division of about 5,000 troops subordinate to Russia's Central Military District. Some Russian officers reportedly help oversee these troops, many or most of whom are ethnic Tajik noncommissioned officers and soldiers. Thousands of Tajik Frontier Force border guards receive support as necessary from the 201st division.¹⁸ Russia's efforts to formalize a basing agreement with Tajikistan dragged on for years, as Tajikistan endeavored to charge rent and assert its sovereignty. In October 2004, a 10-year basing agreement was signed, formalizing Russia's largest military presence abroad, besides its Black Sea Fleet. At the same time, Tajikistan demanded full control over border policing. Russia announced in June 2005 that it had handed over the last guard-house along the Afghan-Tajik border to Tajik troops (a few dozen Russian border advisors remained).

In October 2009, visiting President Rahmon reportedly urged then-President Medvedev to pay rent on Russia's base facilities in Tajikistan. At a meeting in Dushanbe in September 2011, then-President Medvedev announced that he and Rahmon had made progress in reaching agreement on extending the basing agreement for another 49 years, and that an accord would be signed in early 2012. Some media reported that Tajikistan was calling for up to \$300 million in annual rent payments. Also at the meeting, the two presidents agreed that the number of Russian border advisors reportedly would be reduced from 350 to 200, and that they would more closely cooperate with the Tajik border force.

President Rahmon met with newly inaugurated President Putin in Moscow on the sidelines of a CIS summit in mid-May 2012, and the two leaders agreed to continue the apparently contentious discussions on extending the basing agreement. During President Putin's early October 2012 visit, the two leaders agreed to a basing agreement through the year 2042. President Rahmon was unsuccessful in getting Russia to pay more on the base lease, but Russia pledged added military modernization assistance. Of great significance for Tajikistan, Putin agreed that work permits for Tajik migrant laborers would be extended from one to three years. Tensions have risen, however, as Tajikistan has not ratified the accord as of late May 2013. According to some speculation, President Rahmon is delaying the ratification pending Moscow's full support for his re-election in a planned November 2013 presidential race. Other observers point to President Rahmon's late May 2013 visit to China, where he and President Xi Jinping signed a strategic partnership agreement that included pledges to deepen cooperation on security issues and to support Tajikistan as it assumes the rotating leadership of the SCO later in 2013. According to another view, Tajikistan is resisting pressure from Moscow to re-admit Russian border forces along the Tajik-Afghan border.

¹⁸ *The Military Balance*, London: International Institute of Strategic Studies, March 7, 2012.

In a seeming shift toward a more activist role in Central Asia, in April 2000, Russia called for the signatories of the CST to approve the creation of rapid reaction forces to combat terrorism and hinted that such forces might launch preemptive strikes on Afghan terrorist bases. These hints elicited U.S. calls for Russia to exercise restraint. Then-President Clinton and Putin agreed in 2000 to set up a working group to examine Afghan-related terrorism (this working group later broadened its discussions to other counter-terrorism cooperation; it has continued to meet under the Obama Administration). CST members agreed in 2001 to set up the Central Asian rapid reaction force headquartered in Kyrgyzstan, with Russia's troops in Tajikistan comprising most of the force (this small force of 3,000 to 5,000 troops has held exercises and supposedly is dedicated to border protection; in 2009 it was supplemented by a larger 20,000-troop rapid reaction force with a supposedly wider mission).¹⁹ CIS members in 2001 also approved setting up an Anti-Terrorism Center (ATC) in Moscow, with a branch in Kyrgyzstan, giving Russia influence over regional intelligence gathering.

Perhaps as a result of the establishment of a U.S. airbase in Kyrgyzstan after the September 11, 2001, attacks (see "The Manas Airbase" below), Russia in September 2003 signed a 15-year military basing accord with Kyrgyzstan providing access to the Kant airfield, near Kyrgyzstan's capital of Bishkek. The base is a few miles from the U.S.-led coalition's airbase. Russia attempted to entice Kyrgyzstan in early 2009 to close the Manas airbase by offering the country hundreds of millions of dollars in grants and loans. However, after Kyrgyzstan agreed to continued U.S. use of the airbase in mid-2009 as a "Transit Center," Russia reneged on some of this funding and requested that Kyrgyzstan grant Moscow rights to another airbase near Uzbekistan's border. Uzbekistan denounced this plan, and it appeared to be put on hold. With the U.S.-Russia "reset" of relations, Russia's opposition to the continued operation of the Manas Transit Center seemingly diminished, but in May 2012, the Russian Foreign Ministry hailed a statement by President Atambayev that he intended not to renew the lease on the U.S. Transit Center.

Russian President Vladimir Putin visited Kyrgyzstan and met with President Almazbek Atambayev on September 20, 2012. The two sides signed a 15-year extension to Russia's lease on "unified" military facilities in the country, including the Kant airbase, operated as part of the CSTO. Russia's rent payment for using the facilities—reportedly \$4.5 million per year—reportedly did not change, although issues of training and Kyrgyzstan's supply of free utilities to the facilities reportedly were addressed. The two sides also signed accords canceling one \$190 million Kyrgyz debt and restructuring another \$300 million loan (the latter had been given by Putin to Kyrgyzstan in 2009). Another agreement pledged assistance by Russian firms in building several hydropower projects, including a renewed commitment to assist with the Kambarata-1 dam and hydroelectric power station (see also below). In a joint statement, Atambayev pledged to close the U.S. Transit Center at Manas in 2014, and Putin pledged to consider assistance to help convert the Transit Center facilities to civilian use. Hailing agreements that further integrated the two countries militarily and economically, President Atambayev stated at a press conference that "Russia is our main strategic partner.... We do not have a future separate from Russia."²⁰

Besides Russia's military presence in Kyrgyzstan and Tajikistan, Russia's 2009 National Security Strategy called for the country to play a dominant role in Caspian basin security. Russia's Caspian Sea Flotilla has been bolstered by troops and equipment in recent years. A security cooperation agreement signed at a Caspian littoral state summit on November 18, 2010, states that Caspian

¹⁹ CEDR, February 25, 2010, Doc. No. CEP-950282.

²⁰ CEDR, September 20, 2012, Doc. No. CEP-950131, CEP-950107, and CEP-950085; *Interfax*, September 20, 2012.

basin security is the exclusive preserve of the littoral states. Some observers have viewed this agreement as reflecting Russia's objections to U.S. maritime security cooperation initiatives (see below, "U.S. Security and Arms Control").²¹

Taking advantage of Uzbekistan's souring relations with many Western countries in 2005 (see below, "The 2005 Violence in Andijon, Uzbekistan"), Russia signed a Treaty on Allied Relations with Uzbekistan in November 2005 that called for mutual defense consultations in the event of a threat to either party (similar to language in the CST). Uzbekistan rejoined the CST Organization (CSTO; see below) in June 2006. Uzbekistan declined to participate in rapid reaction forces established in June 2009 because of concerns that the forces could become involved in disputes between member states. On June 20, 2012, Uzbekistan informed the CSTO that it was suspending its membership in the organization, including because the CSTO was ignoring its concerns. However, Uzbek officials stated that the country would continue to participate in the CIS air defense system and other military affairs under the Allied Relations Treaty. According to some observers, the withdrawal of Central Asia's largest military from the CSTO highlighted the organization's ineffectiveness.²² In June 2012, President Karimov visited China and met with President Hu Jintao, and the two leaders signed a strategic partnership agreement. Commenting on this accord in September 2012, President Karimov stated that "China is indeed the most reliable strategic partner for us."²³ Some observers also have suggested that Uzbekistan's withdrawal from the CSTO was linked to positioning for a greater role in the U.S.-NATO Northern Distribution Network (NDN) for the transit of equipment and materials to and from Afghanistan (see below, "The Northern Distribution Network to Afghanistan").

Uzbekistan strongly objected to the September 2012 Russia-Kyrgyz agreement on constructing the Kambarata-1 dam, asserting that talks should include all countries along the watershed (the Naryn River, the proposed site of the dam, flows into the Syr Darya River through Uzbekistan and Kazakhstan). At a meeting of the Russia-Uzbek Intergovernmental Economic Cooperation Commission in December 2012, the two sides agreed to seek an international assessment of the dam's environmental impact before construction is started.

Many observers suggest that the appreciative attitude of Central Asian states toward the United States in the early 2000s—for their added security accomplished through U.S.-led actions in Afghanistan—has declined over time. Reasons may include perceptions that the United States has not provided adequate security or economic assistance. Also, Russia and China are pledging security support to the states to get them to forget their pre-September 11, 2001, dissatisfaction with Russian and Chinese efforts. Russian media outlets in Central Asia also have propagandized heavily against U.S. activities and policies, and this propaganda may well have influenced public opinion in the region. Russia likewise has warned regional leaders that the United States backs democratic "revolutions" to replace them. Lastly, Russia has claimed that it can ensure regional security after the planned drawdown of U.S. and NATO forces in Afghanistan by the end of 2014.²⁴

As Russia's economy improved in the 2000s—as a result of increases in oil and gas prices—Russia reasserted its economic interests in Central Asia. Russia endeavored to counter Western business and gain substantial influence over energy resources through participation in joint ventures and by insisting that pipelines cross Russian territory. Although Russia experienced a decline in gross domestic product (GDP) in 2009 and only modest growth in GDP in 2010-2011 as a result of shocks associated with the global economic downturn, it has appeared that Russia has tried to maintain economic leverage in the region, including by giving stabilization grants and loans to Kyrgyzstan and Tajikistan. In other areas, such as commodity trade, Russian economic influence has been reduced, although it is still significant. In 2009, the number of Central Asian migrant workers in Russia decreased, and the country imposed quotas on the number of migrant laborers. The numbers of migrant workers from Central Asia have increased since then, and worker remittances from Russia remain significant to the GDPs of Kyrgyzstan, Tajikistan, and Uzbekistan.

Russia's efforts to maintain substantial economic interests in Central Asia face increasing challenges from China, which has substantially increased its aid and trade activities in the region. Perhaps to use institutional means to constrict growing Chinese economic influence, a Russia-Belarus-Kazakhstan customs union began operating in mid-2011. Russian officials and state-owned media have called for the customs union to expand to include Kyrgyzstan and Tajikistan. In an article in early October 2011, Prime Minister Putin called for boosting Russian influence over Soviet successor states through the creation of an economic, political, and military "Eurasian Union."

China's Role

China's objectives in Central Asia include ensuring border security, non-belligerent neighbors, and access to trade and natural resources. In April 1996, the presidents of Kazakhstan, Kyrgyzstan, Russia, and Tajikistan traveled to Shanghai to sign a treaty with Chinese President Jiang Zemin pledging the sanctity and substantial demilitarization of borders. They signed protocols that they would not harbor or support separatists, aimed at China's efforts to quash separatism in its Uighur Autonomous Region of Xinjiang Province, which borders Central Asia. In April 1997, the five presidents met again in Moscow to sign a follow-on treaty demilitarizing the 4,000 mile former Soviet border with China. In May 2001, the parties admitted Uzbekistan as a member and formed the Shanghai Cooperation Organization (SCO), agreeing to combat the "three evils" of terrorism, extremism and separatism (see also below, "Obstacles to Peace and Independence: Regional Tensions and Conflicts").

After September 11, 2001, SCO members did not respond collectively to U.S. overtures but mainly as individual states. China encouraged Pakistan to cooperate with the United States. China benefitted from the U.S.-led coalition actions in Afghanistan against the IMU and the Taliban, since these groups had been providing training and sustenance to Uighur extremists.

Most analysts do not anticipate Chinese territorial expansion into Central Asia, though China is seeking greater economic influence. China is a major trading partner for the Central Asian states and may become the dominant economic influence in the region. In comparison, Turkey's trade

with the region is much less than China's. Central Asia's China trade exceeded \$1 billion annually by the late 1990s and thereafter expanded greatly, reaching \$30 billion by 2010.²⁵

Kazakhstan and Kyrgyzstan have been deft in building relations with China. They have cooperated with China in delineating borders, building roads, and increasing trade ties. The construction of oil and gas pipelines from Kazakhstan and Turkmenistan to China's Xinjiang region mark China's growing economic influence in the region. However, officials in these states also have been concerned about Chinese intentions and the spillover effects of tensions in Xinjiang. Some have raised concerns about growing numbers of Chinese traders and immigrants, and there are tensions over issues like water resources. China's crackdown on dissidence in Xinjiang creates particular concern in Kazakhstan, because over one million ethnic Kazakhs reside in Xinjiang and many Uighurs reside in Kazakhstan. Some ethnic Kyrgyz also reside in Xinjiang. On the other hand, Kazakhstan fears that Uighur separatism in Xinjiang could spread among Uighurs residing in Kazakhstan, who may demand an alteration of Kazakh borders to create a unified Uighur "East Turkestan." China's relations with Tajikistan improved with the signing of a major agreement in May 2002 delineating a final section of borders in the Pamir Mountains shared by the two states.

In 1993, China abandoned its policy of energy self-sufficiency, making Central Asia's energy resources attractive. In September 1997, Kazakhstan granted China's National Petroleum Corporation (CNPC) production rights to develop major oil fields, including the Aktyubinsk Region of northwestern Kazakhstan. In the late 1990s, China reportedly provided a \$12 million loan to Turkmenistan's state-owned Turkmennebit oil firm and Turkmengaz gas firm to purchase Chinese drilling and hoist equipment and spare parts. In 2003, China provided a \$1.875 million grant and a \$3.6 million loan (for 20 years with no interest) to develop Turkmenistan's gas industry. According to some observers, China's energy investments in Central Asia may soon eclipse Russia's.²⁶ (For more recent information on China's energy role in Central Asia, see below, "Energy Resources.")

The increased U.S. and NATO presence in Central Asia and Afghanistan since the early 2000s may have delayed China's objective of becoming the dominant Asian power. Some observers suggest that a decrease in U.S. and NATO regional presence after the drawdown of operations in Afghanistan in 2014 may open up greater competition between Russia and China for influence in the region. This competition had previously been set aside to some degree as both powers were focused on monitoring and limiting the scope of U.S. regional influence, according to these observers. Other observers suggest a condominium between Russia and China in the region, to include agreement on Russian influence in the military sphere and Chinese influence in the economic sphere.²⁷

Obstacles to Peace and Independence: Regional Tensions and Conflicts

The legacies of co-mingled ethnic groups, convoluted borders, and emerging national identities pose challenges to stability in all the Central Asian states. Emerging national identities accentuate clan, family, regional, and Islamic self-identifications. Central Asia's convoluted borders fail to accurately reflect ethnic distributions and are hard to police, hence contributing to regional tensions. Ethnic Uzbeks make up sizeable minorities in the other Central Asian countries and Afghanistan. In Tajikistan, they make up almost one-quarter of the population and in Kyrgyzstan they make up over one-seventh. More ethnic Turkmen reside in Iran and Afghanistan—over 3 million—than in Turkmenistan. Sizeable numbers of ethnic Tajiks reside in Uzbekistan, and 7 million in Afghanistan. Many Kyrgyz and Tajiks live in China's Xinjiang province. The fertile Ferghana Valley is shared by Tajikistan, Kyrgyzstan, and Uzbekistan. The central governments have struggled to gain control over administrative subunits. Most observers agree that the term "Central Asia" currently denotes a geographic area more than a region of shared identities and aspirations, although it is clear that the land-locked, poverty-stricken, and sparsely populated region will need more integration in order to develop.

On the one hand, the Central Asian states have wrangled over water-sharing, border delineation, trade and transit, and other issues:

- Tajikistan's relations with Uzbekistan have been problematic, including disagreements about water-sharing, Uzbek gas supplies, the mining of borders, border demarcation, and environmental pollution. In July 2008, the head of the Tajik Supreme Court asserted that Uzbek security forces had bombed the Supreme Court building the previous summer as part of efforts to topple the government. In late 2010, Uzbekistan began a transit slowdown and other economic measures to pressure Tajikistan to halt building the Rogun power plant (see below, "Trade and Investment").
- Turkmenistan's relations with Uzbekistan and Azerbaijan have been tense. Azerbaijan and Turkmenistan have rival claims to some Caspian Sea oil and gas fields. Turkmenistan and Uzbekistan have vied for regional influence and argued over water-sharing. In 2002, the Turkmen government accused Uzbek officials of conspiring to overthrow it. Uzbekistan also objected to the treatment of ethnic Uzbeks in Turkmenistan under the previous president.
- The Kyrgyz premier rejected claims by Karimov in 2005 that Kyrgyzstan had provided training facilities and other support for the Andijon militants. Karimov again accused Kyrgyzstan in late May 2009 of harboring terrorists whom had attacked across the border. After the April 2010 coup in Kyrgyzstan, Uzbekistan tightened border controls with this country, greatly harming its economy. Conflict between ethnic Uzbeks and ethnic Kyrgyz in southern Kyrgyzstan in June 2010 further strained relations between the two countries (see below, "The 2010 Ethnic Clashes in Kyrgyzstan"). On July 17, 2012, border guards exchanged gunfire at a

(...continued)

Asia," *CACI Analyst*, April 3, 2012.

Kyrgyzstan-Uzbekistan border post, reportedly killing a guard on each side. Uzbekistan responded by restricting border crossings at this post. In January 2013, Kyrgyz border guards wounded five Uzbeks in the Uzbek enclave of Sokh in Kyrgyzstan's Batken Region, bordering Uzbekistan. The Uzbeks allegedly had attempted to block an incursion into Sokh by the Kyrgyz border guards. Up to 1,000 local Uzbeks then temporarily took over three dozen Kyrgyz hostage.²⁸

On the other hand, there have been some high-level bilateral contacts:

- The leaders of regional powers Kazakhstan and Uzbekistan have held occasional bilateral summits in recent years. Most recently, on September 6-7, 2012, President Karimov visited Kazakhstan for a bilateral summit. One observer suggested that this summit was an effort by the two major regional powers to join together to spur greater region-wide integration, including common responses to security threats such as terrorism and instability in Afghanistan. The two leaders also aimed to bolster significant trade ties and issued a joint statement on regional water-sharing.²⁹
- Since Berdimuhamedow came to power, relations between Turkmenistan and Uzbekistan have improved. Most recently, in early October 2012, President Karimov visited Turkmenistan and met with President Berdimuhamedow, and the two leaders discussed boosting trade and other cooperation. They also called for region-wide talks before Tajikistan and Kyrgyzstan build dams that could affect water-sharing. In February 2013, President Karimov phoned Berdimuhamedow to invite him to visit to discuss joint projects.

Regional cooperation remains stymied by tensions among the states, despite their membership in various cooperation groups such as the CST Organization (CSTO), the Shanghai Cooperation Organization (SCO), and NATO's Partnership for Peace (PFP). The CST was signed by Russia, Belarus, the South Caucasus countries, and the Central Asian states (except Turkmenistan) in May 1992 and called for military cooperation and joint consultations in the event of security threats to any member. At the time to renew the treaty in 1999, Uzbekistan, Georgia, and Azerbaijan formally withdrew. The remaining members formed the CSTO in late 2002, and a secretariat opened in Moscow at the beginning of 2004. Through the CSTO, Russia has attempted to involve the members in joint efforts to combat international terrorism and drug trafficking. Although the charter of the CSTO does not mention internal or external peacekeeping functions, other agreements have provided for such activities.

Neither former Kyrgyz President Akayev nor former President Bakiyev apparently requested the aid of the CSTO during the coups that overthrew them, and the CSTO has appeared inactive during other crises in the region. At a CSTO meeting in June 2010 to consider an urgent request by interim Kyrgyz President Roza Otunbayeva for troops to assist in quelling ethnic violence, a consensus could not be reached and the members only agreed to provide equipment. At a CSTO summit in December 2011, all the members signed a pledge that no nonmember military bases could be established on their territories unless all members agreed. They also reportedly agreed

²⁸ Open Source Center, *Central Eurasia: Daily Report* (hereafter, *CEDR*), January 7, 2013, Doc. Nos. CEP-7950026, CEP-950027, CEP-950043, CEP-950025, CEP-950014, and CEP-950005; January 9, 2012, Doc. No. CEP-950134; *Interfax*, January 6 and January 9, 2013.

on detailed procedures for intervening in domestic “emergency” situations within a member state at the behest of the member.³⁰ At a CSTO summit in December 2012, President Rahmon reportedly complained that although many documents had been signed over the years, there had been “no practical results.”³¹

The SCO was established in 2001 by Russia, China, Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan. In 2003, a SCO Regional Anti-Terrorism Structure (RATS) was set up in Uzbekistan. Several military and security exercises have been held. According to some reports, in recent years Russia has discouraged the holding of major SCO military exercises as well as the strengthening of economic ties within the SCO, although Moscow has been amenable to cooperation within the SCO on regional oil and gas issues.³²

In late 2007, the Central Asian states prevailed on the U.N. to set up a Regional Center for Preventive Diplomacy for Central Asia (UNRCCA) to facilitate diplomatic and other cooperation to prevent internal and external threats to regional security. With its headquarters in Ashkhabad, the Center is headed by a special representative of the U.N. secretary-general. The Center was intended to take on some of the duties of the U.N. Tajikistan Office of Peace-Building, which had been established after the Tajik Civil War and was being closed. The Center’s mandate includes monitoring regional threats and working together and with other regional organizations to facilitate peacemaking and conflict prevention. Priority concerns include cross-border terrorism, organized crime and drug trafficking, regional water and energy management, environmental degradation, and stabilization in Afghanistan. The Center has held several regional conferences on such issues as Aral Sea desiccation, water-sharing, and Afghanistan. The Center’s special representative visited Kyrgyzstan several times in the wake of the April 2010 coup to discuss U.N. aid to the interim government to ensure peace and stability.

In May 2009, the OSCE established a Border Management Staff College in Dushanbe to train officers from OSCE member and partner countries, including Afghanistan.

Terrorism and Conflict in Kazakhstan

Kazakhstan long argued that there were few terrorists within the country but this stance began to change in late 2003 with the establishment of an Anti-Terrorist Center as part of the National Security Committee. Shocking many Kazakhs, it reported the apprehension in late 2004 of over a dozen members of the obscure Islamic Jihad Group/Union (IJU) of Uzbekistan (reportedly an offshoot of the Islamic Movement of Uzbekistan). It alleged that the group had ties to Al Qaeda; had cells in Kyrgyzstan, Uzbekistan, and Russia; and had been involved in attacks in Uzbekistan. In mid-2006, authorities detained 15-30 members of the banned Hizb ut-Tahrir group. In April 2007, 16 alleged terrorists were arrested on charges of planning attacks against security and police forces. In February 2008, security forces arrested five members of an alleged Salafi Jihadi Jamaat, whose leader had received training in Syria. In September 2009, six alleged terrorists were sentenced to 12-17 years in prison for planning to attack foreign oil companies and non-

³⁰ *Interfax*, December 21, 2011.

³¹ *CEDR*, December 19, 2012, Doc. No. CEP-950108.

³² *CEDR*, November 8, 2011, Doc. No. CEP-6008; *China’s Central Asia Problem*, International Crisis Group, February 27, 2013; Joshua Kucera, “Russia ‘Increasingly Distrustful’ of SCO,” *Eurasianet*, March 5, 2013.

Muslims. In late 2009, the Kazakh National Security Committee reported that the government had prevented four terrorist attacks in 2008 and three in 2009.

Several suicide bombings and other alleged terrorist attacks occurred in Kazakhstan in 2011, although the government appeared reluctant to release many details and trials of alleged terrorists were usually closed to outside observers. A suicide bombing took place in a security office on May 17, 2011, in the city of Aktoke, and a car bombing took place at another security office on May 24 in Astana. On the night of June 30, alleged terrorists killed three police officers in the village of Shubarshi in Aktobe Region. Apparently shaken by these and other bombings and terrorist attacks, President Nazarbayev directed changes to the law on religion that were duly approved in late September. On October 31, two explosions occurred in the city of Atyrau, one at the regional administration building and the other a suicide bombing in a residential area. A week after these bombings, two police officers were killed in Almaty by alleged terrorists.

On November 12, 2011, in the town of Taraz, one person killed several police and attacked a security office. The same day, an attempted explosion reportedly was foiled and an attack on a roadblock was carried out in Taraz, resulting in additional police deaths. The Jund al-Khilafah (Soldiers of the Caliphate) claimed responsibility for the bombings in Atyrau and may have been involved in other incidents. Kazakhstan's Office of the Prosecutor-General claimed that Jund al-Khilafah was formed in mid-2011 by Kazakh citizens Renat Khabibuly, Orynbasarov Unasov, and Damir Nabiyeu, was allied with the Taliban, was headquartered in Pakistan's tribal area, and was dedicated to "waging a jihad on the territory of Kazakhstan." At the end of November 2011, Kazakhstan banned Jund al-Khilafah as a terrorist organization.³³ In April 2012, 47 alleged members or accomplices of the Jund al-Khilafah were sentenced for the October 31 attacks. Jund al-Khilafah also has claimed responsibility for attacks on U.S. forces in Afghanistan.

On December 16, 2011, energy sector workers on strike since May 2011 and others reportedly extensively damaged and burned government and other buildings and clashed with police in the town of Zhanaozen, in the Mangistau Region of Kazakhstan, resulting in 16 deaths and dozens of injuries, the government reported. Some observers alleged that there were more casualties and that the riots were triggered or exacerbated by police firing on the demonstrators (video posted on the Internet appeared to back this claim).³⁴ Protests and violence also spread to other areas of the region.

President Nursultan Nazarbayev declared a state of emergency and curfew in the town on December 17, 2011, and sent military and security forces to the region. He claimed that the violence was pre-planned and financed, perhaps from abroad, that the rioters had been given alcohol and money, and that police had shot into the crowds only in self-defense. At the same time, he charged that local officials had not heeded the grievances of the striking oil workers and had given him misinformation. In response, he fired the head of Kazmunaigaz, the state-owned energy firm; ousted his son-in-law as head of the national fund that owned Kazmunaigaz; replaced the governor of the region; and pledged new employment and retraining for oil workers who had been fired during their long strike. Critics charged that he took these moves to protect his popularity and that of the ruling political party during an electoral campaign (see below,

³³ CEDR, November 9, 2011, Doc. No. CEP-950038; *Interfax*, November 30, 2011.

³⁴ *Striking Oil, Striking Workers: Violations of Labor Rights in Kazakhstan's Oil Sector*, Human Rights Watch, September 2012.

“Recent Political Developments in Kazakhstan”). The government reported that dozens of individuals have been detained so far in connection with the protests.

A trial against 37 individuals charged with crimes associated with the Zhanaozen riot opened in late March 2012. The bulk of the defendants were striking workers and youths, who were accused of initiating the violence, although five police officers were being tried for abuses in quelling the unrest. In late April 2012, the Human Rights Watch NGO called for the trial to be suspended while an investigation of alleged torture and other abuses against those on trial is carried out. In June 2012, a court sentenced about one-half of the defendants to 3-7 years in prison and gave suspended sentences, pardons, or acquittals to the rest. Another trial of 12 suspects resulted in 4 being sentenced to 4-7 years and the others being acquitted, pardoned, or amnestied. Other arrests have occurred (see also below, “Recent Political Developments in Kazakhstan”). The Kazakh government has argued that it has convicted some police for excesses during the riot, disciplined some government officials, given unemployed workers new jobs, and otherwise admitted that it mishandled the labor strife in Zhanaozen.³⁵

At a meeting with policemen on July 12, 2012, President Nazarbayev criticized them for not taking preventive measures against terrorism, and stated that “over 100 crimes connected with terrorism were committed in Kazakhstan in 2011-12. As a result, dozens of [terrorists and policemen] have died.... And we have to admit the fact that radical and extremist groups are putting enormous pressure on the government and society.”³⁶ According to a Kazakh Security Council official, over 300 individuals have been convicted in Kazakhstan on charges of terrorism since 2005.³⁷

Among recent incidents, in late July 2012, one policeman was killed and one wounded in Almaty, and the alleged assailants later engaged in a gun battle with security forces and most were killed. In mid-August 2012, a gun battle with alleged terrorists took place in Almaty, reportedly resulting in the deaths of several alleged terrorists and the capture of others. Authorities claimed that these terrorists were linked to an explosion at a house in a village near Almaty in July and to the killing of several individuals whose bodies were found in a park near Almaty. The terrorists were planning widespread operations, according to the authorities. In early September 2012, a bomb-maker blew himself up in Atyrau Region, leading police to engage in a gun battle with other members of the alleged group, killing five of them. Some observers have warned that these recent incidents may have marked the revival of terrorist actions in Kazakhstan after several months of seeming quietude.

In November 2012, Nazarbayev called for tightening legislation to facilitate government efforts to combat terrorism, with the government explaining that the changes in law were necessitated by increasing radicalization of the population and growing terrorist incidents in the country. The bill was passed and signed into law in early January 2013. The changes included an apparently

³⁵ Embassy of the Republic of Kazakhstan, Washington, DC, “Response to the Human Rights Watch Report,” *News Bulletin*, September 18, 2012. The response is to Human Rights Watch, *Striking Oil, Striking Workers: Violations of Labor Rights in Kazakhstan’s Oil Sector*, September 4, 2012. The *News Bulletin* claims that HRW ignored “facts” put forward by the Kazakh government, but HRW states that the Kazakh government did not respond to its request for information and alleges that the government attempted to block its investigation.

³⁶ CEDR, July 13, 2012, Doc. No. CEP-950108.

³⁷ CEDR, June 27, 2012, Doc. No. CEP-950051.

expansive definition of terrorism to include an “ideology of violence” and acts or threats aimed at influencing the government, including violence and “frightening people.”³⁸

Incursions and Violence in Kyrgyzstan

Several hundred Islamic extremists and others harboring in Tajikistan and Afghanistan first invaded Kyrgyzstan in July-August 1999. Jama Namanganiy, the co-leader of the Islamic Movement of Uzbekistan (IMU; see below), headed the largest guerrilla group. They seized hostages and several villages, allegedly seeking to create an Islamic state in south Kyrgyzstan as a springboard for a jihad in Uzbekistan.³⁹ With Uzbek and Kazakh air and other support, Kyrgyz forces forced the guerrillas out in October 1999. Dozens of IMU and other insurgents again invaded Kyrgyzstan and Uzbekistan in August 2000. Uzbekistan provided air and other support, but Kyrgyz forces were largely responsible for defeating the insurgents by late October 2000. The IMU did not invade the region in the summer before September 11, 2001, in part because Osama bin Laden had secured its aid for a Taliban offensive against the Afghan Northern Alliance.

About a dozen alleged IMU members invaded from Tajikistan in May 2006 but soon were defeated (some escaped). After this, the Kyrgyz defense minister claimed that the IMU, HT, and other such groups increasingly menaced national security.

The 2010 Ethnic Clashes in Kyrgyzstan

Deep-seated tensions between ethnic Kyrgyz and ethnic Uzbeks in southern Kyrgyzstan erupted on June 10-11, 2010. Grievances included perceptions among some ethnic Kyrgyz in the south that ethnic Uzbeks controlled commerce, discontent among some ethnic Uzbeks that they were excluded from the political process, and views among many Bakiyev supporters in the south that ethnic Uzbeks were supporting their opponents. Allegedly, fighting began between rival ethnic-based gangs at a casino in the city of Osh and quickly escalated, fuelled by rumors of rapes and other atrocities committed by each side. The fighting over the next few days resulted in an official death toll of 426 (of which 276 were ethnic Uzbeks and 105 were ethnic Kyrgyz) and over 2,000 injuries. The violence also resulted in an initial wave of 400,000 refugees and IDPs and the destruction of thousands of homes and businesses in Osh and Jalal-abad. Otunbayeva appealed to Russia for troops to help end the fighting, but the CSTO, meeting in emergency session on June 14, 2010, agreed to only provide humanitarian assistance. The Kyrgyz interim government variously blamed Bakiyev’s supporters, Uzbek secessionists, Islamic extremists, and drug traffickers for fuelling the violence.⁴⁰ There were some reports that elements of the police and armed forces in the south defied central authority and were involved in the violence and subsequent attacks on ethnic Uzbeks.

Although critical of the Kyrgyz government, Uzbekistan did not intervene militarily or permit its citizens to enter Kyrgyzstan to join in the June fighting (according to some reports, the Uzbek government had considered military intervention). After some hesitation, the Uzbek government

³⁸ CEDR, November 23, 2012, Doc. No. CEP-950005.

³⁹ According to Zeyno Baran, S. Frederick Starr, and Svante Cornell, the incursions of the IMU into Uzbekistan and Kyrgyzstan in 1999 and 2000 were largely driven by efforts to secure drug trafficking routes. *Islamic Radicalism in Central Asia and the Caucasus: Implications for the EU*, Silk Road Paper, July 2006.

⁴⁰ Bruce Pannier, “Kyrgyzstan: Anatomy of a Conflict,” *RFE/RL*, July 02, 2010.

permitted 90,000 ethnic Uzbeks to settle in temporary camps in Uzbekistan. Virtually all had returned to Kyrgyzstan by the end of June.⁴¹ According to Assistant Secretary of State Eric Schwartz, “the Government of Uzbekistan acted quickly and constructively in response to the humanitarian crisis, [and] cooperated closely with U.N. agencies, the International Committee of the Red Cross and nongovernmental organizations. These efforts helped many people.”⁴² While also stating that “Uzbekistan ... behaved admirably” by hosting the refugees, Assistant Secretary Blake has testified that “although there were no reports of force to promote returns, reports of psychological pressure, monetary incentives, threats of loss of citizenship, coercion and/or encouragement to participate in the June 27 referendum and concerns about family members who remained in Kyrgyzstan all may have factored into the rapid repatriation of those who were displaced.” Presumably, Kyrgyz officials were involved in these actions.⁴³

An OSCE informal foreign ministers’ meeting in July 2010 endorsed sending a 52-member police advisory group for an initial period of four months to help facilitate peace in southern Kyrgyzstan. It was proposed that the mission could later be extended and another 50 advisors deployed.⁴⁴ Concerns about the presence of the OSCE police advisory group from the Osh mayor and other Kyrgyz ultranationalists delayed its deployment. On November 18, 2010, the OSCE Permanent Council reached agreement with Kyrgyzstan on an alternative one-year police training program.

International donors meeting in Bishkek on July 27, 2010, pledged \$1.1 billion in grants and loans to help Kyrgyzstan recover from the June violence. The United States pledged \$48.6 million in addition to FY2010 and FY2011 planned aid. In addition, the United States provided \$4.1 million in humanitarian assistance to Kyrgyzstan immediately after the April and June events.⁴⁵ Analyst Martha Olcott has warned that the discrimination by ethnic Kyrgyz against ethnic Uzbeks has contributed in some cases to young ethnic Uzbeks being attracted to Islamic extremism.⁴⁶

On January 10, 2011, a Kyrgyz commission issued its findings on the causes of the June 2010 violence in southern Kyrgyzstan between ethnic Kyrgyz and ethnic Uzbeks. The report largely blamed ethnic Uzbek “extremists” and some supporters of former Kyrgyz President Kurmanbek Bakiyev for fomenting the violence. The report also blamed interim government officials of ineptness in dealing with the escalating ethnic tensions.

⁴⁶ Commission on Security and Cooperation in Europe, Hearing on Instability in Kryrgyzstan: The International Response, *Testimony of Martha Brill Olcott*, July 27, 2010.

On May 2, 2011, an international commission formed under the leadership of Kimmo Kiljunen, the Special Representative for Central Asia of the OSCE Parliamentary Assembly, released its report of findings regarding the June 2010 violence. The commission concluded that the Kyrgyz provisional government failed to adequately provide security and leadership to stifle rising tensions and incidents in May or to minimize the effects of the June ethnic violence. The commission also raised concerns that security forces were directly or indirectly complicit in the violence (according to the commission, most police, military, and other security personnel are ethnic Kyrgyz). The commission called for the Kyrgyz government to condemn ultra-nationalism and proclaim that the state is multi-national, promote gender equality, provide special rights for Uzbek language use in the south, train security forces to uphold human rights and not subvert state interests through parochial loyalties, impartially investigate and prosecute those responsible for the violence, establish a truth and reconciliation commission, and provide reparations.⁴⁷ The Kyrgyz government has rejected the finding that security forces were complicit in the violence, continued to blame the former Bakiyev regime and Islamic extremists for fomenting the clashes, and stated that ethnic Uzbeks shared substantial blame for committing human rights abuses.

Some observers have raised concerns that what they view as inadequate efforts by the Kyrgyz government to foster ethnic reconciliation could result in new ethnic unrest. Among such concerns, the IMU reportedly vowed actions against the Kyrgyz government for its alleged abuses against ethnic Uzbeks in southern Kyrgyzstan. Former President Otunbayeva and other observers have warned that some ethnic Uzbek youth in the south are being recruited by the IMU.⁴⁸

Attacks by Jama'at Kyrgyzstan Jaish al-Mahdi in 2010-2011

According to Kyrgyz security authorities, Jamaat Kyrgyzstan Jaish al-Mahdi (Kyrgyz Army of the Righteous Ruler), an ethnic Kyrgyz terrorist group, bombed a synagogue and sports facility and attempted to bomb a police station in late 2010, and killed three policemen in early 2011. The group also allegedly planned to attack the U.S. embassy and U.S. military Manas "transit center." Kyrgyz security forces reportedly killed or apprehended a dozen or more members of the group, including its leader, in January 2011. Ten alleged members of the group were put on trial in May 2011. At least some group members allegedly had received training by the Caucasus Emirate terrorist group in Russia, but also in late 2010 the group reportedly pledged solidarity with the Taliban.

Terrorism and Conflict in Tajikistan

The 1992-1997 Civil War in Tajikistan

Tajikistan was among the Central Asian republics least prepared and inclined toward independence when the Soviet Union broke up. In September 1992, a loose coalition of

⁴⁷ OSCE, *Report of the Independent International Commission of Inquiry into the Events in Southern Kyrgyzstan in June 2010*, May 2, 2011.

nationalist, Islamic, and democratic parties and groups tried to take power. Kulyabi and Khojenti regional elites, assisted by Uzbekistan and Russia, launched a successful counteroffensive that by the end of 1992 had resulted in 20,000-40,000 casualties and up to 800,000 refugees or displaced persons, about 80,000 of whom fled to Afghanistan. After the two sides agreed to a cease-fire, the U.N. Security Council established a small U.N. Mission of Observers in Tajikistan (UNMOT) in December 1994. In June 1997, Tajik President Rahmon and the late rebel leader Seyed Abdullo Nuri signed a *comprehensive peace agreement*. Benchmarks of the peace process were largely met, and UNMOT pulled out in May 2000. To encourage the peace process, the United States initially pledged to help Tajikistan rebuild. Some observers point to events in the city of Andijon in Uzbekistan (see “The 2005 Violence in Andijon, Uzbekistan” below) as indicating that conflicts similar to the Tajik Civil War could engulf other regional states where large numbers of people are disenfranchised and poverty-stricken.

The 2010-2011 Attacks in Tajikistan

In late August 2010, over two dozen individuals sentenced as terrorists escaped from prison in Dushanbe and launched attacks as they travelled to various regions of the country. Many of these individuals had been opposition fighters during the Tajik Civil War and had been arrested in eastern Tajikistan during government sweeps in 2009. In early September 2010, a suicide car bombing resulted in over two dozen deaths or injuries among police in the northern city of Khujand. An obscure terrorist group, Jamaat Ansarullah, allegedly the Tajik branch of the IMU, claimed responsibility. Some escapees and their allies, allegedly including IMU terrorists, attacked a military convoy in the Rasht Valley (formerly known as Karategin) east of Dushanbe on September 19, 2010, reportedly resulting in dozens of deaths and injuries to government forces. Heavy fighting in the Rasht Valley over the next month reportedly led to dozens of additional casualties among government forces.

In early January 2011, the Tajik Interior (police) Ministry reported that its forces had killed former Tajik opposition fighter Alovuddin Davlatov, alias Ali Bedaki, the alleged leader of one major insurgent group involved in the ambush in the Rasht Valley. Another leader of the ambush, Abdullo Rakhimov, aka Mullo Abdullo—a former Tajik opposition paramilitary leader who spurned the peace settlement and travelled to Afghanistan and Pakistan, where he allegedly maintained links with al Qaeda and the Taliban, and who reentered Tajikistan in 2009—was reportedly killed by Tajik security forces on April 15, 2011.⁴⁹ In September 2011, Jamaat Ansarullah reportedly issued a directive to its followers in Tajikistan to kill pro-democracy advocates, who by its definition were “unbelievers” even if they were practicing Muslims.

In December 2011, several dozen alleged IMU members said to be involved in the suicide car bombing in Khujand received prison sentences ranging from eight years to life. Several defendants had reported that they had been tortured to agree to false charges. In September 2012, a court sentenced 12 more alleged participants to terms ranging from 5 to 24 years. They had been charged with being members of Abdullo’s terrorist group and of Jamaat Ansarullah, and of receiving training in al Qaeda camps in Pakistan.⁵⁰ According to some observers, underlying

⁴⁹ Lola Olimova and Nargis Hamrabaeva, “Tajik Authorities Struggle to Quell Militants,” *Report News: Central Asia*, Institute for War and Peace Reporting, October 4, 2010; Tilav Rasulzoda and Parvina Khamidova, “New Militant Force in Tajikistan?” *Report News: Central Asia*, Institute for War and Peace Reporting, October 21, 2010; CEDR, January 12, 2011, Doc. ⁵⁰ CEDR, September 11, 2012, Doc. No. 950123; Igor Rotar, “Islamic Extremist Group Jamaat Ansarullah Overcomes (continued...)”

causes of the violence may be related to the failure of the Rahmon government to share power and economic benefits with minority groups and clans, and more immediate causes may be related to the increasing repressiveness and exclusiveness of the government and the ability of disaffected populations to obtain countervailing armed support from relatives and others abroad.⁵¹

The 2012 Instability in Mountainous Badakhshan

On July 21, 2012, a national security official, General Abdullo Nazarov, was killed near the city of Khorog, the capital of the Mountainous Badakhshan Autonomous Region in eastern Tajikistan. According to some reports, the region is a major transit point for drugs and other goods trafficked from Afghanistan and for weapons and money smuggled to terrorist groups in Afghanistan. The government responded by launching security operations to force the local “criminal group” to surrender. The government asserted that the “criminals” were led by Tolib Ayembekov, a former UTO fighter who was the head of an Interior Ministry border guard troops unit in the Ishkohim District (Khorog is in this district), bordering Afghanistan. The government also alleged that the “criminals” had ties with organized crime groups throughout the world, and were linked to members of the IMU, who were infiltrating from Afghanistan to support the “criminals.”⁵² Ayembekov denied that he was responsible for Nazarov’s death. Over 3,000 security personnel entered Khorog on July 24, and subsequent fighting resulted in 17 casualties among the security personnel and 30 among the alleged “criminals,” according to the government. Forty-one surviving “criminals” were arrested. Although the government officially acknowledged only one civilian casualty, some observers reported that dozens of civilians had been killed or injured. Among the forces deployed to the region were extra border guards who sealed the Tajik-Afghan border to prevent the Tajik “criminals” from escaping across the border or receiving assistance from groups in Afghanistan. Some information about the fighting leaked out of the region despite the “accidental” severing of Internet and cell phone connections to the region. The government declared a unilateral ceasefire the next day. On July 26, 2012, the U.S. Embassy raised concerns about reports of civilian casualties and urged the government not to suppress media reporting in the region. In early August 2012, Ayembekov pledged fealty to the Rahmon government and readiness to prove his innocence in a court of law.

The ceasefire was broken by the government early on August 22, when security forces attacked the home of a popular former UTO fighter, the invalid Imomnazar Imomnazarov, and killed him. His death led some protesters to attack the administration building in Khorog a few hours later, and police allegedly fired at them, injuring three. A large memorial service for Imomnazarov was held the next day in Khorog. A ceasefire agreement was reached between the government and local officials and prominent citizens later that evening. In accordance with the agreement, some security personnel subsequently were withdrawn from the city, but many have stayed in the region to prepare for a visit by Rahmon in late September 2012.

(...continued)

Tajikistan’s Inter-Tribal Conflicts,” *Eurasia Daily Monitor*, September 25, 2012.

⁵¹ Lola Olimova and Nargis Hamrabaeva, “Tajik Authorities Struggle to Quell Militants,” *Report News: Central Asia*, Institute for War and Peace Reporting, October 4, 2010; Umida Hashimova, “The Islamist Insurgency in Tajikistan,” *Central Asia-Caucasus Analyst*, October 12, 2010; Tilav Rasulzoda and Parvina Khamidova, “New Militant Force in Tajikistan?” *Report News: Central Asia*, Institute for War and Peace Reporting, October 21, 2010; *CEDR*, January 12, 2011, Doc. No. CEP-950136.

⁵² *CEDR*, August 8, 2012, Doc. No. CEP-950127.

Some observers have questioned the Tajik government's official explanations of events in Khorog. One local commentator has argued that General Nazarov was acting at the behest of a group in the Tajik security service to seize control over lucrative smuggling operations or otherwise was involved in extorting money.⁵³ A think tank in Dushanbe asserted that the Tajik government deployed security forces in the region after Ayembekov threatened to enlist up to 1,000 terrorists massed across the border in Afghanistan to help him if the government moved to arrest him.⁵⁴ Several accounts have suggested by many residents of Khorog had taken up arms on July 24 in opposition against the deployment of security forces. Accusations that Ayembekov was a "criminal" must be squared with the fact that Khorog is the location of the regional Border Guard Training Center, where the International Organization for Migration has used State Department funding to carry out training for Tajik and Afghan border guards, including on-site at regional border posts. Seeming to refer to this situation, Assistant Secretary Blake in August 2012 stated that the United States supports Tajik government efforts in the region "to address some of the corrupt activities of their own border guards and others who are helping to facilitate some of this [narcotics] trade."⁵⁵

Other observers have speculated that at least part of the reason for the government actions in Mountainous Badakhshan may have been to secure the loyalty of regional officials in the run-up to presidential elections planned in 2013. During the deployment of security forces to the region, the regional IRP head was detained and later found dead, a regional IRP office was sacked, and another IRP official was detained and transferred to Dushanbe. Before he was killed, Imomnazarov speculated that Nazarov had falsely reported to his superiors that the UTO fighters were planning to launch a coup against Rahmon, and that this was the main cause of the government security actions.

Terrorism and Conflict in Uzbekistan

A series of explosions in Tashkent in February 1999 were among early signs that the Uzbek government was vulnerable to terrorism. By various reports, the explosions killed 16 to 28 and wounded 100 to 351 people. The aftermath involved wide-scale arrests of political dissidents and others deemed by some observers as unlikely conspirators. Karimov in April 1999 accused Mohammad Solikh (former Uzbek presidential candidate and head of the banned Erk Party) of masterminding what he termed an assassination plot, along with Tohir Yuldashev (co-leader of the IMU) and the Taliban. The first trial of 22 suspects in June resulted in six receiving death sentences. The suspects said in court that they received terrorist training in Afghanistan, Tajikistan, Pakistan, and Russia and were led by Solikh, Yuldashev, and Namanganiy. In 2000, Yuldashev and Namanganiy received death sentences in absentia, and Solikh received a 15.5 year prison sentence. Solikh denied membership in IMU, and he and Yuldashev denied involvement in the bombings.

On March 28 through April 1, 2004, a series of suicide bombings and other attacks were launched in Uzbekistan, reportedly killing 47. An obscure Islamic Jihad Group of Uzbekistan (IJG; Jama'at

⁵³ CEDR, August 25, 2012, Doc. No. CEP-950018; Sébastien Peyrouse, "Battle on Top of the World: Rising Tensions in Tajikistan's Pamir Region," *On Wider Europe*, German Marshall Fund, August 2012.

al-Jihad al-Islami, a breakaway part of the IMU) claimed responsibility.⁵⁶ In subsequent trials, the alleged attackers were accused of being members of IJG or of Hizb ut-Tahrir (HT; an Islamic fundamentalist movement ostensibly pledged to peace but banned in Uzbekistan) and of attempting to overthrow the government. Some defendants testified that they were trained by Arabs and others at camps in Kazakhstan and Pakistan. They testified that Najmiddin Kamolitdinovich Jalolov (convicted in absentia in 2000) was the leader of IJG, and linked him to Taliban head Mohammad Omar, Uighur extremist Abu Mohammad, and Osama bin Laden. On July 30, 2004, explosions occurred at the U.S. and Israeli embassies and the Uzbek Prosecutor-General's Office in Tashkent. The IMU and IJG claimed responsibility and stated that the suicide bombings were aimed against Uzbek and other "apostate" governments.⁵⁷

The 2005 Violence in Andijon, Uzbekistan

Dozens or perhaps hundreds of civilians were killed or wounded on May 13, 2005, after Uzbek troops fired on demonstrators in the eastern town of Andijon. The protestors had gathered to demand the end of a trial of local businessmen charged with belonging to an Islamic terrorist group. The night before, a group stormed a prison where those on trial were held and released hundreds of inmates. Many freed inmates then joined others in storming government buildings.⁵⁸ President Karimov flew to the city to direct operations, and reportedly had restored order by late on May 13.⁵⁹ On July 29, 439 people who had fled from Uzbekistan to Kyrgyzstan were airlifted to Romania for resettlement processing, after the United States and others raised concerns that they might be tortured if returned to Uzbekistan.⁶⁰

The United States and others in the international community repeatedly called for an international inquiry into events in Andijon, which the Uzbek government rejected as violating its sovereignty. In November 2005, the EU Council approved a visa ban on 12 Uzbek officials it stated were "directly responsible for the indiscriminate and disproportionate use of force in Andijon and for the obstruction of an independent inquiry." The Council also embargoed exports of "arms,

⁵⁶ The IJG changed its name to the Islamic Jihad Union (IJU) in 2005.

⁵⁷ See also CRS Report RS21818, *The 2004 Attacks in Uzbekistan: Context and Implications for U.S. Interests*, by Jim Nichol.

⁵⁸ There is a great deal of controversy about whether this group contained foreign-trained terrorists or was composed mainly of the friends and families of the accused and other disgruntled citizenry. See U.S. Congress, Commission on Security and Cooperation in Europe, Briefing: The Uzbekistan Crisis, *Testimony of Galima Bukharbayeva, Correspondent. Institute for War and Peace Reporting*, June 29, 2005. A declassified Defense Intelligence Agency memorandum prepared soon after the events stated that "no credible information indicates extremist groups participated in the attacks," but stressed that evidence was not definitive on this point. See *Uzbekistan: Review of Information on Unrest in Andijon, 12-13 May 2005*, Info Memo, 5-0549/DR, July 30, 2005 (the memo is part of the Rumsfeld Archive, see below). For alternative views on terrorist involvement and casualties, see Shirin Akiner, *Violence in Andijon, 13 May 2005: An Independent Assessment*, Central Asia-Caucasus Institute, July 2005; AbduMannob Polat, *Reassessing Andijon: The Road to Restoring U.S.-Uzbek Relations*, Jamestown Foundation, June 2007; Scott Radnitz, *Weapons of the Wealthy* (Ithaca: Cornell University Press, 2010), p. 172-176; Donald Rumsfeld, *Known and Unknown* (New York: Penguin Group Publishers, 2011) (the book's references include an Internet archive of memos and other documents). See also James Kirchick, "Did Donald Rumsfeld Whitewash Massacre in Uzbekistan?" *RFE/RL*, May 13, 2011.

⁵⁹ Analyst Adeeb Khalid draws a parallel between the Uzbek government's actions at Andijon and at a large student demonstration in Tashkent in January 1992. In the latter case, Karimov allegedly ordered troops to fire on the marchers, resulting in up to six deaths and two dozen or more injuries. *Islam After Communism* (Berkeley, CA: University of California Press, 2007), p. 155. See also *Reuters*, January 17, 1992.

⁶⁰ See also CRS Report RS22161, *Unrest in Andijon, Uzbekistan: Context and Implications*, by Jim Nichol.

military equipment, and other equipment that might be used for internal repression.”⁶¹ In October 2007 and April 2008, the EU Council suspended the visa ban for six months but left the arms embargo in place. In October 2008, the EU Council praised what it viewed as some positive trends in human rights in Uzbekistan and lifted the visa ban, although it left the arms embargo in place.⁶² In October 2009, it lifted the arms embargo.

At the first major trial of 15 alleged perpetrators of the Andijon unrest in late 2005, the accused all confessed and asked for death penalties. They testified that they were members of Akramiya, a branch of HT launched in 1994 by Akram Yuldashev that allegedly aimed to use force to create a caliphate in the area of the Fergana Valley located in Uzbekistan. Besides receiving assistance from HT, Akramiya was alleged to receive financial aid and arms training from the IMU. The defendants also claimed that the U.S. and Kyrgyz governments helped finance and support their effort to overthrow the government, and that international media colluded with local human rights groups and nongovernmental organizations (NGOs) in this effort. The U.S. and Kyrgyz governments denied involvement, and many observers criticized the trial as appearing stage-managed. Reportedly, 100 or more individuals were arrested and sentenced, including some Uzbek opposition party members and media and NGO representatives.⁶³ Partly in response, the U.S. Congress tightened conditions on aid to Uzbekistan.

The Summer 2009 Suicide Bombings and Attacks in Uzbekistan

On May 25-26, 2009, a police checkpoint was attacked on the Kyrgyz-Uzbek border, attacks took place in the border town of Khanabad, and four bombings occurred in Andijon in the commercial district, including at least one by suicide bombers. Several deaths and injuries were alleged, although reporting was suppressed. Uzbek officials blamed the IMU, although the IJU allegedly claimed responsibility. President Karimov flew to Andijon on May 31. In late August 2009, shooting took place in Tashkent that resulted in the deaths of three alleged IMU members and the apprehension of other group members. The Uzbek government alleged that the group had been involved in the 1999 explosions and in recent assassinations in Tashkent. In early December 2009, the Andijon regional court reportedly convicted 22 individuals on charges of involvement in the May 2009 events, and sentenced them to prison terms ranging from 5 to 18 years.

U.S. Designation of the IMU and IJU as Terrorist Organizations

In September 2000, the State Department designated the IMU as a Foreign Terrorist Organization, stating that the IMU, aided by Afghanistan’s Taliban and by Al Qaeda, resorted to terrorism,

⁶¹ Council of the European Union, *Uzbekistan: Council Adopts Restrictive Measures*, Press Release 14392/05, November 14, 2005. U.S. officials argued that the United States already had been limiting military assistance—at congressional request—because of human rights abuses.

⁶² Council of the European Union, 2824th General Affairs Council Meeting, *Press Release*, October 15-16, 2007; 2864th and 2865th General Affairs and External Relations Council Meetings, *Press Release*, April 29, 2008; 2897th General Affairs and External Relations Council Meeting, *Press Release*, October 13, 2008. Some international human rights groups protested against a visit by the head of the Uzbek state security service—who had been subject to the visa ban lifted by the Council—to Germany in late October 2008. He reportedly advised German officials on IJU activities in Central Asia.

⁶³ OSCE, Office for Democratic Institutions and Human Rights (ODIHR), *Report from the OSCE/ODIHR Trial Monitoring in Uzbekistan*, April 21, 2006; Ministry of Foreign Affairs, Republic of Uzbekistan, *Comments on the Report Prepared by the OSCE ODIHR*, April 19, 2006.

actively threatened U.S. interests, and attacked American citizens. At that time, the State Department argued that the “main goal of the IMU is to topple the current government in Uzbekistan,” and it linked the IMU to bombings and attacks on Uzbekistan in 1999-2000.

Former CIA Director Porter Goss testified in March 2005 that the IJG/IJU “has become a more virulent threat to U.S. interests and local governments.”⁶⁴ In May 2005, the State Department designated the IJG/IJU as a Foreign Terrorist Organization and Specially Designated Global Terrorist, and in June, the U.N. Security Council added the IJG/IJU to its terrorism list.⁶⁵ In June 2008, IJG head Jalolov and his associate Suhayl Fatilloevich Buranov were added to the U.N. 1267 Sanctions Committee’s Consolidated List of individuals and entities associated with bin Laden, al Qaeda, and the Taliban. Also, the U.S. Treasury Department ordered that any of their assets under U.S. jurisdiction be frozen and prohibited U.S. citizens from financial dealings with the terrorists.⁶⁶

After U.S. military operations began in Afghanistan in late 2001, IMU forces assisting the Taliban and Al Qaeda suffered major losses, and IMU co-head Namanganiy was killed.⁶⁷ Surviving IMU forces moved to Pakistan, and became heavily involved in actions against the Pakistani government, although some IMU fighters resumed attacks on coalition forces in Afghanistan.⁶⁸

IMU head Yuldashev reportedly was killed in late August 2009 in Pakistan by a U.S. drone missile, and Jalalov allegedly similarly was killed in late September 2009. After Yuldashev’s death, Abu Usman Adil became the head of the IMU. The IMU military commander, Abbas Mansur, allegedly was killed in a U.S. drone strike in 2011. In April 2012, Adil reportedly was similarly killed, and was succeeded by Usman Ghazi some months later. Ghazi, a non-Uzbek, has focused the IMU on attacking Afghanistani and Pakistani government targets, possibly lessening its immediate threat to Central Asia, according to some observers.⁶⁹

In July 2011, an Uzbek citizen on an expired student visa was arrested on charges of being directed by IMU terrorists to assassinate President Obama. He confessed and was sentenced in

However, U.S. Colonel Ted Donnelly has argued that after U.S. and NATO forces are drawn down in Afghanistan in 2014, the Fergana Valley could become a focus for operations by the IMU and other terrorist groups. See *Fergana as FATA [Federally Administered Tribal Areas]? A Post-2014 Strategy for Central Asia*, U.S. Army War College, Master’s Thesis, March 2012.

2012. Two other ethnic Uzbeks were arrested in the United States in early 2012 on charges of collaborating with the IJU. One of the Uzbeks had been granted refugee status after he fled the Uzbek government crackdown in Andijon in 2005. He was arrested at a U.S. airport while allegedly planning to join IJU terrorists abroad.

Democratization and Human Rights

A major goal of U.S. policy in Central Asia has been to foster the long-term development of democratic institutions and respect for human rights. Particularly since September 11, 2001, the United States has attempted to harmonize its concerns about democratization and human rights in the region with its interests in regional support for counter-terrorism. According to some allegations, the former Bush Administration may have sent suspected terrorists in its custody to Uzbekistan for questioning, a process termed “extraordinary rendition.”⁷⁰ Although not verifying such transfers specifically to Uzbekistan, the former Bush Administration stated that it received diplomatic assurances that transferees would not be tortured. Several citizens of Central Asian states who were held in U.S. custody at the Guantanamo Bay Naval Base have been returned to their home countries.⁷¹

All of the Central Asian leaders have declared that they are committed to democratization. During Nazarbayev’s 1994 U.S. visit, he and then-President Clinton signed a Charter on Democratic Partnership that recognized Kazakhstan’s commitments to the rule of law, respect for human rights, and economic reform. During his December 2001 and September 2006 visits, Nazarbayev repeated these pledges in joint statements with then-President Bush. In March 2002, a U.S.-Uzbek Strategic Partnership Declaration was signed pledging Uzbekistan to “intensify the democratic transformation” and improve freedom of the press. During his December 2002 U.S. visit, Tajikistan’s President Rahmon pledged to “expand fundamental freedoms and human rights.”

Despite such democratization pledges, the states have made little progress, according to the State Department. In testimony in May 2011, Assistant Secretary Blake stated that leaders in Central Asia “are suspicious of democratic reforms, and with some exceptions have maintained tight restrictions on political, social, religious, and economic life in their countries.... Kyrgyzstan has been the primary exception in Central Asia. The democratic gains recently made in Kyrgyzstan ... are cause for optimism.”⁷²

The Mistakes of Guantanamo and the Decline of America’s Image, May 6, 2008; Hearing: Rendition and the Department of State, June 10, 2008. At least three Tajiks returned to Tajikistan from Guantanamo were then tried and imprisoned on charges of belonging to al Qaeda or the IMU.

⁷² Commission on Security and Cooperation in Europe, Hearing on Central Asia and the Arab Spring: Growing Pressure For Human Rights? *Testimony of Robert Blake, Jr., Assistant Secretary, Bureau of South and Central Asian Affairs*, May 11, 2011.

During the 1990s and early 2000s, almost all the leaders in Central Asia held onto power by orchestrating extensions of their terms, holding suspect elections, eliminating possible contenders, and providing emoluments to supporters and relatives (the exception was the leader of Tajikistan, who had been ousted in the early 1990s during a civil war). After this long period of leadership stability, President Askar Akayev of Kyrgyzstan was toppled in a coup in 2005, and President Niyazov of Turkmenistan died in late 2006, marking the passing of three out of five Soviet-era regional leaders from the scene. Soviet-era leaders Nazarbayev and Karimov remain in power, and Tajikistan has been headed since the civil war by Rahmon, the Soviet-era head of a state farm.

Possible scenarios of political futures in Central Asia have ranged from continued rule in most of the states by elite groups that became ensconced during the Soviet era to violent transitions to Islamic fundamentalist rule. Peaceful transitions to more or less democratic political systems have not occurred and appear unlikely for some time to come (although the peaceful October 2011 Kyrgyz presidential election may offer some hope; see below). While some observers warn that Islamic extremism could increase dramatically in the region, others discount the risk that the existing secular governments soon could be overthrown by Islamic extremists.⁷³

In the case of the three succession transitions so far, Tajikistan's resulted in a shift in the Soviet-era regional/clan elite configuration and some limited inclusion of the Islamic Renaissance Party. Perhaps worrisome, Tajik President Rahmon has written a "spiritual guide" reminiscent of the one penned by Turkmenistan's late authoritarian president Niyazov, and has given orders on how citizens should live and dress. In Turkmenistan, it appears that Soviet-era elites have retained power following Niyazov's death and have eschewed meaningful democratization. Kyrgyzstan's transition after Akayev's 2005 ouster appeared to involve the gradual increase in influence of southern regional/clan ethnic Kyrgyz elites linked to Bakiyev until April 2010, when northern regional/clan ethnic Kyrgyz elites reasserted influence by ousting then-President Bakiyev. An interim president held office until an election was held on October 30, 2011, the first contested electoral transfer of power in Central Asia. This election was won by Almazbek Atambayev, who represents northern interests (see below).⁷⁴

Recent Political Developments in Kazakhstan

For the third time during his period of rule, Kazakhstan's President Nazarbayev issued a decree on November 16, 2011, dismissing the legislature and setting early elections for January 15, 2012. Of the 107 seats in the lower legislative chamber (the Majlis), 98 were to be allocated through party list voting, with the remaining 9 members selected by a presidential advisory body. Critics complained that the holding of an early election appeared aimed to hinder the political opposition from preparing for the election. Seven parties were registered to run. According to the final results issued by the CEC, the ruling Nur Otun Party received 80.99% of 7.02 million votes

⁷³ Analyst Adeeb Khalid argues that the elites and populations of the regional states still hold many attitudes and follow many practices imposed during the Soviet period of rule. This "Sovietism" makes it difficult for either Islamic extremism or democratization to make headway, he suggests. Khalid, p. 193. For a perhaps more troubling view of the threat of Islamic extremism, see above, "Overview of U.S. Policy Concerns."

⁷⁴ For background on political developments, see CRS Report 97-1058, *Kazakhstan: Recent Developments and U.S. Interests*, by Jim Nichol; CRS Report 97-690, *Kyrgyzstan: Recent Developments and U.S. Interests*, by Jim Nichol; CRS Report 98-594, *Tajikistan: Recent Developments and U.S. Interests*, by Jim Nichol, CRS Report 97-1055, *Turkmenistan: Recent Developments and U.S. Interests*, by Jim Nichol, and CRS Report RS21238, *Uzbekistan: Recent Developments and U.S. Interests*, by Jim Nichol.

cast and won 83 seats, Ak Zhol received 7.47% of the vote and 8 seats, and Communist People's Party received 7.19% and 7 seats. Critics charged that both of these minor parties were pro-Nazarbayev. OSCE monitors judged that the election did not meet fundamental principles of democratic elections. They reported that the legal framework for holding democratic elections was inadequate, only selected parties were permitted to run, voters had no assurance of which candidates on the winning lists might end up with seats, the open exchange of views during the campaign was restricted, and there were "significant irregularities" on voting day, including ballot box stuffing and "significant changes" by higher electoral bodies to vote totals reported at the precinct level.⁷⁵

In early March 2012, President Nazarbayev threatened that Kazakhstan might cease inviting the OSCE to monitor elections. Kazakh officials have maintained that other election monitors, including those from the CIS, have considered Kazakhstan's elections as free and fair.

Even before the election was over, observers reported that government arrests and harassment of journalists and opposition party politicians were increasing. In late January 2012, one prominent opposition newspaper editor was arrested on charges that were two years old, and Vladimir Kozlov, the head of the unregistered Alga Party, was arrested on charges of inciting social disorder in Zhanaozen. Several leading politicians of the National Social Democratic Party Azat and others have been arrested and fined following protests that have been held every month since late January 2012 against alleged electoral violations and the government crackdown in Zhanaozen. In mid-March 2012, the European Parliament approved a resolution that expressed indignation for the incarceration of opposition politicians and journalists since the election on political grounds and called for their release. The resolution urged the Kazakh government to reverse the recent further deterioration of human rights by undertaking reforms to ensure future pluralistic elections, to safeguard a free press, and to permit NGOs to operate freely. The resolution also "strongly condemn[ed] the violent crackdown by the police against demonstrators in Zhanaozen," and called for an independent and credible investigation of the incident.⁷⁶ On April 19, 2012, journalist Lukpan Akhmedyarov was attacked and wounded in western Kazakhstan. He has alleged that the attackers are linked to local officials. In mid-August 2012, Assistant Secretary Blake praised the January legislative election as marking progress in the creation of a "multi-party democracy," but raised hopes that the then-pending trial of Alga Party leader Kozlov would be fair, impartial, and open, and not jeopardize this democratization progress.⁷⁷

In October 2012, several Kazakh human rights activists and others issued an appeal for the U.S. government to deny entrance visas to over three dozen Kazakh officials involved in the Zhanaozen violence, including President Nazarbayev. The Kazakh Consulate General in New York denounced the appeal, stating that officials and others involved in the Zhanaozen violence duly had been tried and found guilty in proceedings that were transparent and followed the rule of law.⁷⁸

⁷⁷ U.S. Department of State, *On-the-Record Briefing With International Media: Robert O. Blake, Jr., Assistant Secretary, Bureau of South and Central Asian Affairs*, August 15, 2012.

⁷⁸ *About the Abuses of Kazakhstan's Dictatorship and Its Ruler Nursultan Nazarbayev*, Human Rights Foundation, October 17, 2012; *Washington Examiner*, October 17, 2012; Consulate General of the Republic of Kazakhstan in New (continued...)

In November 2012, an appeals court upheld the 7.5 year prison sentence handed down in October to the head of the unregistered Alga opposition party, Vladimir Kozlov, convicted on charges that he organized the Zhanaozen riots as part of a coup attempt against Nazarbayev. The U.S. Ambassador to the Permanent Council of the OSCE, Ian Kelly, raised concerns that the case was used to silence a leading oppositionist and stated that the irregularities of the trial “casts serious doubts on [Kazakhstan’s] respect for human rights, fundamental freedoms, and the rule of law.” He also correctly predicted that the charge of “inciting social hatred” against Kozlov could be used to prosecute other oppositionists, civil society organizations, and members of the media.⁷⁹ On December 21, 2012, the Alga Party was banned as an extremist organization by the Almaty district court, silencing what one observer has characterized as the main opposition party in the country.⁸⁰

In November 2012, the Kazakh General Prosecutor’s Office recommended the closure of most opposition media on the grounds that they contained calls for the violent overthrow of the government and otherwise undermined national security. Courts quickly ruled that these media were “extremist,” reportedly without substantial evidence, and ordered their closure. Reporters Without Borders has set up some Internet sites for several of the banned media.⁸¹

A new holiday was celebrated on December 1, 2012, entitled “Day of the First President,” to celebrate President Nazarbayev’s rule. Some commentators in Kazakhstan speculated that this holiday was established to further consolidate presidential power and quell dissenting views.⁸²

In April 2013, the European Parliament approved a resolution decrying the deterioration of human rights in Kazakhstan since the Zhanaozen disturbance. The resolution “strongly criticized” court decisions to ban the Alga Party and independent media, urged the release of political prisoners, and called for easing restrictions on the registration and practice of religion.

Recent Political Developments in Kyrgyzstan

Kyrgyzstan’s most recent presidential election was held on October 30, 2011, the first involving the peaceful contested transfer of presidential power in Central Asia. Sixteen candidates were on the ballot, most of whom ran as independents without a specific party endorsement. The interim Prime Minister, Almazbek Atambayev, temporarily stepped down so that he could run. After a lengthy vote-counting period, the Central Electoral Commission (CEC) announced final election results on November 12, 2011, proclaiming Atambayev as the winner with 62.52% of 1.86 million votes cast. Monitors from the Organization for Security and Cooperation in Europe (OSCE) judged that the election had “shortcomings” that needed to be addressed “to consolidate democratic practice in line with international commitments.” They stated that although there was a wide choice of candidates and the electoral campaign “was open and respected fundamental

⁸² “New ‘Leader’s Day’ Suggests Power Consolidation Ahead of Handover,” *Open Source Center Analysis*, November 30, 2012; *Interfax*, November 29, 2012.

freedoms,” there were “significant irregularities ... during the counting and [the] tabulation of votes,” including interference by outsiders in the vote count, pre-signed voting tallies, failure to post voting tallies, and alteration of completed tallies.⁸³

Atambayev was sworn in as president on December 1, 2011. The next day, the Social Democratic Party acted to form a new coalition, and on December 15, a coalition was formed comprising the Social Democratic Party, Respublika, Ata-Meken, and Ar-Namys. The coalition held 92 seats, leaving the Ata-Jurt Party, with 28 seats, as the opposition in the legislature. On December 23, the legislature approved Respublika Party member Omurbek Babanov as the prime minister along with a slate of ministers. The distribution of power in the new government appeared to revivify northern dominance over southern interests, intensifying regional tensions.

In the face of a growing dispute between Prime Minister Babanov and ruling coalition members Ata-Meken and Ar-Namys—which accused the government of malfeasance and corruption—the two parties withdrew from the coalition on August 22, 2012, triggering the fall of the Babanov government. On August 27, President Atambayev called for the Social Democratic Party to form a new coalition. The Social Democratic Party, Ar-Namys and Ata-Meken, along with a few deputies from the other two parties, formed a new ruling coalition on September 3, and two days later the legislature approved a cabinet government led by former chief of the presidential staff Jantoro Satybaldiyev.

On October 3, 2012, the leader of the Ata-Jurt Party and former presidential candidate Kamchybek Tashiyev, along with fellow party members and legislators Sadyr Japarov and Talant Mamytov, addressed a group of about 800 protesters outside the legislative building in Bishkek. According to some accounts, they allegedly urged the demonstrators to storm the legislature to demand that it nationalize the Kumtor gold mine run by Canada’s Centerra Gold firm. If the legislature did not act, they reportedly warned, its members would be forcibly dispersed.⁸⁴ After initially breaking into the legislative building, the protesters were repulsed by police, who later foiled another attempt. The government detained the three legislators on the grounds that they were publically advocating and using force to attempt to overthrow the constitutional system.⁸⁵ The detentions triggered additional protests in southern Kyrgyzstan, the power base of the Ata-Jurt Party. On October 18, 2012, the Ata-Jurt Party faction in the legislature selected Myktybek Abdyldayev as its new leader pending resolution of the court case against Tashiyev. In late March 2013, a Bishkek district court sentenced the three legislators to 12-18 months in prison. The Prosecutor-General’s Office has appealed the case, on the grounds that the charges merit much longer sentences.

Recent Political Developments in Turkmenistan

In October 2011, the Turkmen Central Electoral Commission (CEC) announced that a presidential election would be held on February 12, 2012. During the last two weeks of December 2011, initiative groups nominated candidates for president and gathered 10,000 signatures in a majority of the country’s districts in order to gain registration of their candidates. The National Revival

⁸³ OSCE, Office for Democratic Institutions and Human Rights (ODIHR), *Kyrgyz Republic Presidential Election, 30 October 2011, OSCE/ODIHR Election Observation Mission: Final Report*, January 10, 2012.

⁸⁴ The legislature had considered and rejected nationalizing the Kumtor gold mine in late June 2012.

⁸⁵ In mid-September 2012, the prosecutor general’s office had launched a criminal investigation against Sadyr Japarov on suspicions that he had “illegally privatized” property formerly belonging to ousted President Bakiyev.

Movement, a civic association headed by the president, nominated President Berdimuhamedow as its candidate. In January 2012, the CEC registered eight candidates. All of Berdimuhamedow's challengers were ministerial officials or state plant managers. Based on an inadequate legal and political framework to ensure a pluralistic election, the OSCE decided not to formally monitor the election. The CEC announced that Berdimuhamedow won over 97% of the vote and that turnout was over 96%.

Recent Political Developments in Uzbekistan

On December 5, 2011, the legislature approved amendments to the constitution reducing the presidential term from seven to five years. The change was hailed as advancing democratization, but was a reversion to the pre-2002 term in office. In March 2012, the legislature approved holding legislative elections on December 28, 2014, and the presidential election in March or April 2015. Some observers suggest that President Karimov might consider succession contingencies at that time, such as designating a possible heir.

In April 2012, Uzbek legislators and officials visiting the United States reported that bills had been introduced to provide for the legislature to hold hearings to question the prime minister, to hold a vote of non-confidence in the government, and to strengthen the rights of NGOs.⁸⁶ U.S. analyst Martha Olcott has argued that Uzbek society is becoming more religiously traditional (although not radical), and that politics will probably be influenced by these societal views, so that a secular liberal democratic political system may not soon emerge.⁸⁷

In December 2012, President Karimov stressed that the country was following a path of “evolutionary” democratization, including by increasing the checks and balances among the three branches of power and strengthening political parties. At the same time, he stated that the government’s power would continue to increase in the “transitional period” in order for it to direct the reforms, and cautioned that the process of democratization was lengthy and never-ending.

Human Rights

The State Department’s latest *Country Reports on Human Rights Practices for 2012* characterized all the Central Asian governments except Kyrgyzstan as authoritarian and as falling short in respect for human rights in many areas:

- In Kazakhstan, President Nursultan Nazarbayev and his Nur Otan Party completely dominated the political system. Significant human rights problems included restrictions on freedom of speech, press, assembly, religion, and association; and lack of an independent judiciary and due process. Under a harsh new religion law, one-quarter of the previously registered 4,551 organizations lost their legal status and the number of legally recognized faiths was slashed from 46 to 17. Under the new law, unregistered religious expression was prohibited. Other reported abuses included arbitrary arrest and detention; torture;

⁸⁶ Carnegie Endowment, *Current Developments in Uzbekistan’s Parliament*, April 26, 2012, at <http://carnegieendowment.org/2012/04/26/current-developments-in-uzbekistan-s-parliament/acih>.

⁸⁷ Martha Olcott, *In the Whirlwind of Jihad* (Washington, DC: Carnegie Endowment, 2012).

- prohibitive political party registration requirements; restrictions on the activities of nongovernmental organizations (NGOs); trafficking in persons; and child labor. The government took modest steps to prosecute some high-profile corruption cases, but most corrupt officials remained untouched.
- In Kyrgyzstan, some security forces appeared at times to operate independently of civilian control in the South. Significant human rights problems included continued ethnic tensions in the South; denial of due process in judicial and law enforcement proceedings; and security officials' use of arbitrary arrest, mistreatment, torture, and extortion, particularly against ethnic Uzbeks. Other human rights problems included arbitrary killings by law enforcement officials; harassment of NGOs, activists, and journalists; pressure on independent media; pervasive corruption; trafficking in persons; and child labor. The central government allowed security forces to act arbitrarily and empowered mobs to disrupt trials by attacking defendants, attorneys, witnesses, and judges.
 - In Tajikistan, President Emomali Rahmon and his supporters dominated the political system. Significant human rights problems included torture and abuse of detainees; restrictions on freedom of expression and the free flow of information, including the blocking of independent news and social media; and the erosion of religious freedom. Other human rights problems included arbitrary arrest; denial of the right to a fair trial; prohibition of international monitor access to prisons; limitations on children's religious education; corruption; and trafficking in persons. There were very few prosecutions of government officials for human rights abuses.
 - In Turkmenistan, the president and his Democratic Party controlled the political system. Significant human rights problems included arbitrary arrest; torture; and restrictions on freedoms of speech, press, assembly, and movement. Other continuing human rights problems included interference in the practice of religion; denial of due process and a fair trial; arbitrary interference with privacy, home, and correspondence; and trafficking in persons. There were no reported prosecutions of government officials for human rights abuses.
 - In Uzbekistan, President Islam Karimov dominated political life and exercised nearly complete control. Significant human rights problems included instances of torture and abuse of detainees by security forces; denial of due process and a fair trial; and widespread harassment of religious minority group members and continued imprisonment of believers of all faiths. Other continuing human rights problems included arbitrary arrest and detention (although officials released five high-profile prisoners during the year); restrictions on freedom of speech, press, assembly, and association; restrictions on civil society; limits on freedom of movement; and forced labor in cotton harvesting. Human rights activists, journalists, and others who criticized the government were harassed and arrested. Government officials frequently engaged in corrupt practices with impunity.⁸⁸

In 2009, the U.S. Department of Labor listed all the Central Asian states as countries that use child labor to pick cotton. This list was meant to inform the choices made by the buying public. In addition, on July 20, 2010, cotton from Tajikistan and Uzbekistan was added to a list that requires

⁸⁸ U.S. Department of State, *Country Reports on Human Rights Practices for 2012*, April 19, 2013.

U.S. government contractors purchasing products to certify that they have made a good faith effort to determine whether forced or indentured child labor was used to produce the cotton.⁸⁹

In testimony to Congress in April 2013, an official of the U.S. International Labor Rights Forum (ILRF), an NGO, reported that as a member of the Cotton Campaign, an international coalition of NGOs, industries, and trade unions, the IRLF had supported diplomatic and economic pressure on Uzbekistan to end forced child and adult labor in cotton production. He reported that forced child and adult labor continued to be used in the autumn 2012 cotton harvest, and that security personnel were deployed on the farms to enforce production quotas and to prevent pickers from taking pictures or otherwise documenting the use of forced labor. Ostensibly, the pickers were “volunteers” recruited from government agencies, private firms, colleges, and high schools, the latter including a majority of all faculty members. Children under age 15 were officially excused from the harvest, although many aged 11-15 were observed in the fields. Individuals could pay a fee in lieu of participating in the harvest, but most reportedly were afraid of repercussions such as dismissal from a job or university if they did not participate, according to the ILRF official. He also reported that the use of forced labor throughout the economy was increasing. The IRLF has called for the U.S. Customs Service to enforce the Tariff Act of 1930 to block the importation of Uzbek cotton materials produced by forced labor.⁹⁰

The U.N. Children’s Fund (UNICEF) was permitted to monitor the autumn 2011 cotton harvest in Uzbekistan, but not the 2012 harvest, and the country continues to bar monitors from the U.N.’s International Labor Organization. The Uzbek Ministry of Labor asserted in early September 2012 that the use of forced child labor in the agricultural sector was not permitted in Uzbekistan, and that the cotton harvest would be monitored to prevent the participation of school children. However, all cotton in the country is produced on private “family farms,” where international legal norms permit children who are members of farmers’ families to assist in chores, it stated.⁹¹

Kazakhstan and the Presidency of the OSCE

The 15th Ministerial Meeting of the OSCE in Madrid in late November 2007 decided that Kazakhstan would hold the OSCE chairmanship in 2010, the first post-Soviet, Eurasian, Muslim-majority country to host an OSCE chairmanship. Kazakhstan’s then-Foreign Minister Marat Tazhin pledged at the Ministerial Meeting that Kazakhstan would enact human rights reforms prior to assuming the chairmanship.⁹² Addressing the Parliamentary Assembly of the OSCE in Astana in June 2008, President Nazarbayev stated that his country’s preparations for holding the chairmanship included the elaboration of a blueprint he termed “the path to Europe 2009-2011,”

⁹² OSCE, 15th Ministerial Council Meeting, *Address of Marat Tazhin, Minister of Foreign Affairs of the Republic of Kazakhstan*, November 29, 2007.

which envisaged Kazakhstan's integration into Europe in the areas of energy, transport, technology transfers, education, culture, and democratization. Kazakhstan largely failed to meet the human rights and democratization pledges, according to most observers.⁹³

Upon assuming the OSCE chairmanship in January 2010, Kazakhstan stressed that it would emphasize several issues of concern to Kazakhstan, Central Asia, and Russia, among them: bolstering nuclear disarmament; continuing the "Corfu Process" dialogue on the future of European security (including discussion of Russia's draft European Security Treaty); appointing a Special Representative of the OSCE Chairman to promote dialogue on protracted conflicts in the former Soviet Union; and supporting several initiatives regarding Afghanistan.

At an informal OSCE foreign ministerial meeting in Almaty (Kazakhstan's largest city) in July 2010, an agreement was reached to hold an OSCE heads of state and government summit on December 1-2, 2010, in Astana (Kazakhstan's capital), the first since the Istanbul summit in 1999. The United States earlier had raised concerns about the necessity of holding such a summit, but received assurances from Kazakhstan and others that a summit would address substantive issues of U.S. interest.⁹⁴ At a meeting of the OSCE Permanent Council (the main decision-making body; it convenes weekly in Vienna) on November 15, 2010, Kazakhstan's then-Foreign Minister and OSCE Chairman-in-Office Kanat Saudabayev called for the summit agenda to include enhancing the OSCE's efforts in Afghanistan; bolstering early warning and conflict prevention mechanisms; reaffirming the rule of law and the role of civil society; promoting cooperation among international security organizations; and formulating an action plan to update the 1999 Vienna Document (provisions for confidence and security-building, including the exchange and verification of information on armed forces, defense policies, and military activities).⁹⁵

During three Review Conference meetings to prepare the agenda for the summit, the United States stressed that in addition to the measures mentioned by Saudabayev, the agenda should include reestablishing an OSCE Mission in Georgia; empowering ODIHR to better monitor elections; and strengthening the powers of the OSCE Representative on Freedom of the Media, among other measures. At the same time, the United States reiterated that it did not see the need for new treaties or institutions to safeguard European Security as urged by Russia.⁹⁶

According to many observers, the December 1-2, 2010, OSCE Summit accomplished a few of the goals set by Kazakhstan but fell short on most. Summit participants could not agree on an action plan, but issued the Astana Commemorative Declaration toward a Security Community. There appeared to be some progress in bolstering Afghanistan's security and development and in reaffirming the centrality of democracy and human rights as core principles. The United States and Russia clashed over the issue of Georgia's territorial integrity, including whether Russia had

complied with ceasefire accords, and over Russia's failure to carry out its pledge to withdraw troops from Moldova. Lack of progress in resolving the Armenia-Azerbaijan conflict over the breakaway Nagorno Karabakh also was mentioned by the United States as a reason the summit could not agree on an action plan (however, a statement was issued calling for a settlement of the conflict). Although the summit declaration called for building on the so-called Corfu process to further European security cooperation, the United States and some other members of the OSCE had objected to Russia's call (supported by Kazakhstan) for a new European Security Treaty.

Trade and Investment

All the states of the region possess large-scale resources that could contribute to the region becoming a "new silk road" of trade and commerce. The Kazakh and Turkmen economies are mostly geared to energy exports but need added foreign investment for production and transport. Kazakhstan is the world's largest exporter of uranium. Tajikistan, Turkmenistan, and Uzbekistan are major cotton producers, a legacy of central economic planning during the Soviet period. Uzbekistan's cotton and gold production rank among the highest in the world and much is exported. It has moderate gas reserves but needs investment to upgrade infrastructure. Kyrgyzstan has major gold mines and strategic mineral reserves, is a major wool producer, and could benefit from tourism. Tajikistan has one of the world's largest aluminum processing plants. Kyrgyzstan and Tajikistan possess the bulk of the region's water resources, but in recent years both countries have suffered from droughts.

Despite the region's development potential, the challenges of corruption, inadequate transport infrastructure, punitive tariffs, border tensions, and uncertain respect for contracts and entrepreneurial activity have discouraged major foreign investment (except for some investment in the energy sector). Cotton-growing has contributed to environmental pollution and water shortages, leading some observers to argue that cotton-growing is not suited to the largely arid region.

Tajikistan has alleged that Uzbekistan delays rail freight shipments, purportedly to pressure Tajikistan to halt construction of the Rogun hydro-electric power dam on the Vakhsh River, which Uzbekistan fears could limit the flow of water into the country. In November 2011, it closed a rail link to southern Tajikistan, reporting that a bridge was damaged, but since then has not reopened the span. Uzbekistan also has periodically cut off gas supplies to Tajikistan. In early April 2012, Tajikistan's prime minister and its foreign ministry denounced the rail restrictions and a gas supply disruption as part of an "economic blockade" aiming to destabilize Tajikistan. The Uzbek prime minister responded that all Uzbek actions were in accordance with bilateral agreements or responses to Tajik actions, so that the accusations were "groundless."⁹⁷

According to some reports, Uzbek officials have stepped-up arrests, fines, and other actions against international business interests in recent months, perhaps due in part to elite infighting and growing corruption.⁹⁸ Other international businesses continue to carry out operations.

U.S. Regional Economic and Trade Policy

Successive U.S. administrations have endorsed free market reforms in Central Asia, since these directly serve U.S. national interests by opening new markets for U.S. goods and services and sources of energy and minerals. U.S. private investment committed to Central Asia has greatly exceeded that provided to Russia or most other Eurasian states except Azerbaijan. U.S. trade agreements have been signed and entered into force with all the Central Asian states, but bilateral investment treaties are in force only with Kazakhstan and Kyrgyzstan. In line with Kyrgyzstan's accession to the World Trade Organization (WTO), the United States established permanent normal trade relations with Kyrgyzstan by law in June 2000, so that "Jackson-Vanik" trade provisions no longer apply that call for presidential reports and waivers concerning freedom of emigration. The United States provided technical assistance that enabled Tajikistan to join the WTO in March 2013, and the 113th Congress may consider offering permanent normal trade relations status to the country in line with WTO requirements.⁹⁹

In June 2004, The U.S. Trade Representative signed a Trade and Investment Framework Agreement (TIFA) with ambassadors of the regional states to establish a U.S.-Central Asia Council on Trade and Investment. The Council has met yearly to address intellectual property, labor, environmental protection, and other issues that impede trade and private investment flows between the United States and Central Asia. The United States also has called for greater intra-regional cooperation on trade and encouraged the development of regional trade and transport ties with Afghanistan and South Asia. The reorganization of the State Department in 2006 to create the Bureau of South and Central Asian Affairs facilitated this emphasis.¹⁰⁰

The sixth meeting of the U.S.-Central Asia TIFA was held on September 14-15, 2011, in Washington, DC, and included emissaries from Afghanistan participating as observers. Bilateral sessions and meetings with private industry took place. Kazakhstan provided an overview of the newly formed Kazakhstan-Belarus-Russia Customs Union, and other attendees provided updates on efforts to accede to the WTO. The United States stressed adherence to intellectual property protections and discussed its "New Silk Road Vision" (see below) with the emissaries.¹⁰¹

The seventh meeting of the U.S.-Central Asia TIFA took place in Almaty, Kazakhstan in October 2012. The U.S. side released few details, but the delegations reportedly discussed fostering greater investment and transit in Central Asia, enhancing regional ties with Afghanistan, and securing Tajikistan's and Kazakhstan's membership in the WTO.

The Silk Road Vision

Building on U.S. government efforts since the mid-2000s to encourage energy and other trade linkages between Central and South Asia, in July 2011 then-Secretary Clinton announced that

¹⁰¹ Office the U.S. Trade Representative, *United States and Central Asian Countries Evaluate Progress on Trade and Investment Relationship*, Press Release, September 2011.

U.S. policy toward Afghanistan in coming years would focus on encouraging “stronger economic ties through South and Central Asia so that goods, capital, and people can flow more easily across borders.”¹⁰² She further explained this “New Silk Road Vision” at a meeting of regional ministers and others in September 2011, stating that

as we look to the future of this region, let us take this precedent [of a past Silk Road] as inspiration for a long-term vision for Afghanistan and its neighbors. Let us set our sights on a new Silk Road—a web of economic and transit connections that will bind together a region too long torn apart by conflict and division.... Turkmen gas fields could help meet both Pakistan’s and India’s growing energy needs and provide significant transit revenues for both Afghanistan and Pakistan. Tajik cotton could be turned into Indian linens. Furniture and fruit from Afghanistan could find its way to the markets of Astana or Mumbai and beyond.¹⁰³

The Silk Road Vision further was adumbrated during meetings in Turkey and Germany in late 2011. The Istanbul Conference Communiqué called for connecting Afghanistan to Central Asian and Iranian railways and for bolstering regional energy linkages.¹⁰⁴

In a speech in October 2012, Assistant Secretary Blake claimed that the NDN routes could serve after the U.S. and NATO drawdown in 2014 in Afghanistan as components of the U.S. “Silk Road Vision,” of enhanced trade within and between Central and South Asia.¹⁰⁵

In April 2013 in meetings in Kazakhstan and Uzbekistan, Assistant Secretary Blake deemed that progress on the Administration’s Silk Road Vision included plans to build the Turkmenistan-Afghanistan-Pakistan-India (TAPI) gas pipeline, plans for financing for the Central Asia-South Asia (CASA) electricity transmission project, and plans by Turkmenistan to build a rail line transiting Afghanistan to Tajikistan. He also praised the cross-border transport agreement between Kyrgyzstan, Tajikistan, and Afghanistan, concluded under the auspices of the Central Asia Regional Economic Cooperation (CAREC) Program, administered by the Asian Development Bank. Similarly, he highlighted plans by Turkey, Turkmenistan, Azerbaijan, and Georgia to develop a Black Sea Corridor from Europe to Afghanistan and China. He hailed progress at the Istanbul Process ministerial meeting in Almaty to advance these and other regional integration efforts that include Afghanistan. At the same time, he stated that the United States would increase cooperation with Central Asia to strengthen border security, reduce corruption, and enhance information-sharing to combat narcotics trafficking and cross-border terrorism.

Critics have charged that the Silk Road Vision is less a program than an inspiration. They also have suggested that the NDN has failed to convince Central Asia states to adapt their border control regimes and trade practices to facilitate such free trade.¹⁰⁶

Energy Resources

The Caspian region is emerging as a notable source of oil and gas for world markets. The U.S. Energy Information Administration has estimated that gas exports from the region could account for 11% of global gas export sales by 2035, belying arguments by some observers in the 1990s that the region would be marginal as a contributor to world energy supplies. According to British Petroleum (BP), the proven natural gas reserves of Azerbaijan, Kazakhstan, Turkmenistan, and Uzbekistan are estimated at over 450 trillion cubic feet (tcf), among the largest in the world.¹⁰⁷ The region's proven oil reserves are estimated to be 48 billion barrels, comparable to Libya.

Russia's temporary cutoffs of gas to Ukraine in January 2006 and January 2009 and a brief slowdown of oil shipments to Belarus in January 2010 (Belarus and Ukraine are transit states for oil and gas pipelines to other European states) have highlighted Europe's energy insecurity. The United States has supported EU efforts to reduce its overall reliance on Russian oil and gas by increasing the number of possible alternative suppliers. Part of this policy has involved encouraging Central Asian countries to transport their energy exports to Europe through pipelines that cross the Caspian Sea, thereby bypassing Russian (and Iranian) territory, although these amounts are expected at most to satisfy only a small fraction of EU needs.¹⁰⁸

The Central Asian states long were pressured by Russia to yield large portions of their energy wealth to Russia, in part because Russia controlled most existing export pipelines.¹⁰⁹ Russia attempted to strengthen this control over export routes for Central Asian energy in May 2007 when President Putin reached agreement in Kazakhstan on supplying more Kazakh oil to Russia. Putin also reached agreement with the presidents of Turkmenistan and Kazakhstan on the construction of a new pipeline to transport Turkmen and Kazakh gas to Russia. The first agreement appeared to compete with U.S. and Turkish efforts to foster more oil exports through the BTC. The latter agreement appeared to compete with U.S. and EU efforts to foster building a trans-Caspian gas pipeline. The latter also appeared to compete with U.S. and EU efforts to foster building a pipeline from Turkey through Greece, Bulgaria, Romania, and Hungary to Austria (the so-called Nabucco pipeline).

Seeming to indicate a direct challenge to these plans by Russia and the West, China signed an agreement in August 2007 with Kazakhstan on completing the last section of an oil pipeline from the Caspian seacoast to China, and signed an agreement with Turkmenistan on building a gas pipeline to China (see also below).¹¹⁰ In March 2008, the heads of the national gas companies of Kazakhstan, Uzbekistan and Turkmenistan announced that their countries would raise the gas

¹⁰⁹ According to a plan published by Russia's Institute of Energy Strategy covering the period 2007-2030, "Russian control over a large share of Central Asian gas needs to be maintained." See Minpromenergo (Ministry of Industry and Energy), Institut energeticheskoi strategii, *Kontsepsiya energeticheskoi strategii Rossii na period do 2030g.*, 2007. As reported by Philip Hanson, "How Sustainable Is Russia's Energy Power?" *Russian Analytical Digest*, No. 38 (2008).

¹¹⁰ An oil and gas conference involving Kazakh, Chinese, and Russian energy ministries and firms has met annually since 2004 to "exchange views" on possible regional cooperation. *ITAR-TASS*, December 5, 2007.

export price to the European level in future years. They signed a memorandum of understanding on the price with Russia's Gazprom state-controlled gas firm, which controls most export pipelines. According to analyst Martha Olcott, "the increased bargaining power of the Central Asian states owes more to the entry of China into the market than to the opening of [the BTC pipeline and the SCP]. Russia's offer to pay higher purchase prices for Central Asian gas in 2008 and 2009 came only after China signed a long-term purchase agreement for Turkmen gas at a base price that was higher than what Moscow was offering."¹¹¹

After having failed in several other Soviet successor states, Gazprom reportedly succeeded in purchasing Kyrgyzstan's entire gas distribution system in December 2012.

Kazakhstan's Oil and Gas

According to British Petroleum, Kazakhstan possesses 30 billion barrels of proven oil reserves (about 2% of world reserves) and 66.4 trillion cubic feet of proven gas reserves (about 1% of world gas reserves). There are five major onshore oil fields—Tengiz, Karachaganak, Aktobe, Mangistau, and Uzen—which account for about half of the proven reserves. There are two major offshore oil fields in Kazakhstan's sector of the Caspian Sea—Kashagan and Kurmangazy—which are estimated to contain at least 14 billion barrels of recoverable reserves.

Nazarbayev's development goals for Kazakhstan rely heavily on increases in oil and gas production and exports, which account for a significant share of government revenues and GDP growth. The government has anticipated growing revenues in particular from expanding production at the Tengiz, Karachaganak, and Kashagan oil fields. While production is increasing at the former two oil fields, the latter oil field has not yet produced oil. Development of the Kashagan oil field began soon after its discovery in 2000, but has faced numerous delays and cost overruns, attributable to the harsh offshore environment; the high pressure, depth, and sulfur content of the oil; reported management problems; and Kazakh government interference. Members of the North Caspian Operating Consortium developing the oil field currently include Italy's Eni energy firm, the Anglo-Dutch Shell, the U.S.'s ExxonMobil, France's Total and Kazakhstan's KazMunaiGaz (all with a 16.81% stake) as well as the U.S.'s ConocoPhillips (8.4%) and Japan's Inpex (7.56%). Phase one experimental/industrial production rising to 375,000-450,000 bpd is now expected to begin by mid-2013. The developmental cost of Phase one has risen to \$46 billion. The anticipated difficulty and cost of further development of the oil field—which could result in production of up to 1.5 million bpd, but which could cost an added \$100 billion or more—have raised questions among the foreign consortium members about the timeline and feasibility of such efforts, and contributed to rising concerns by the Kazakh government that its hopes for rising revenues from the oil field might need to be revised.¹¹²

Until recently U.S. foreign direct investment (FDI) played a dominant role in the development of Kazakhstani oil and gas resources, amounting to about \$16.5 billion in Kazakhstan (over one-

¹¹¹ Martha Olcott, "A New Direction for U.S. Policy in the Caspian Region."

third of all FDI in the country) from 1993-2012.¹¹³ According to some reports, China provided about \$13 billion in investments and loans to Kazakhstan's energy sector in 2009, so its cumulative FDI may eclipse U.S. FDI.

Some U.S. energy firms and other private foreign investors have become discouraged in recent years by harsher Kazakh government terms, taxes, and fines that some allege reflect corruption within the ruling elite. In 2009, the Karachaganak Petroleum Operating (KPO) consortium (the main shareholder is British Gas, and U.S. Chevron is among other shareholders), which extracts oil and gas from the Karachaganak fields in northwest Kazakhstan, was faced with an effort by the Kazakh government to obtain 10% of the shares of the consortium. Facing resistance, the government imposed hundreds of millions of dollars in tax, environmental, and labor fines and oil export duties against KPO. Both the government and KPO appealed to international arbitration. In December 2011, KPO agreed to transfer 10% of its shares to the Kazakh government, basically gratis, and in exchange the government mostly lifted the fines and duties.¹¹⁴ In May 2012, President Nazarbayev suggested that foreign energy firms operating in the country could help finance domestic industrial projects.¹¹⁵

Kazakhstan's main oil export route from the Tengiz oil field has been a 930-mile pipeline completed in 2001—owned by the Caspian Pipeline Consortium (CPC), in which Russian shareholders have a controlling interest—that carried 693,000 bpd of oil in 2009 from Kazakhstan to Russia's Black Sea port of Novorossiysk. Kazakhstan's other major oil export pipeline, from Atyrau to Samara, Russia, has a capacity of approximately 730,000 bpd. Lengthy Russian resistance to increasing the pumping capacity of the CPC pipeline and demands for higher transit and other fees, along with the necessity of offloading the oil into tankers at Novorossiysk to transit the clogged Turkish Straits, spurred Kazakh President Nazarbayev to sign a treaty with visiting Azerbaijani President Aliyev in June 2006 to barge Kazakh oil across the Caspian Sea to Baku to the BTC pipeline. Kazakhstan began shipping about 70,000 bpd of oil through the BTC pipeline at the end of October 2008. Another accord resulted from a visit by President Nazarbayev to Azerbaijan in September 2009 that provides that up to 500,000 bpd of oil from the Kashagan field may be barged across the Caspian to enter the BTC or the Baku-Supsa pipeline. When the volumes exceed 500,000 bpd, a trans-Caspian pipeline may be built.

Apparently to counter Kazakh's export plans via Azerbaijan, then-President Putin's May 2007 agreement with Nazarbayev (see above) envisaged boosting the capacity of the CPC pipeline. However, this project did not materialize in a timely fashion, so Kazakhstan proceeded to upgrade its Caspian Sea port facilities. Kazakhstan also barges some oil to Baku to ship by rail to Georgia's Black Sea oil terminal at Batumi, of which Kazakhstan became the sole owner in early 2008. Kazakhstan began barging oil from Batumi to the Romanian port of Constantza in late 2008 for processing at two refineries it purchased. Some Kazakh oil arriving in Baku also could be transported through small pipelines to Georgia's Black Sea port of Supsa or to Russia's Black Sea

¹¹⁵ Georgiy Voloshin, "Kazakhstan's Economic Proposals Reveal Fears about Political Instability," *CACI Analyst*, June 13, 2012.

port of Novorossiisk, although in the latter case Kazakhstan might be faced with high transit charges by Russia.¹¹⁶

In December 2010, the CPC approved a plan to upgrade the pumping capacity of the oil pipeline to 1.4 million bpd, with several phases of construction through 2015. The increased capacity will accommodate boosted production from the Tengiz and Karachaganak oil fields, as well as from anticipated development of the Kashagan and Filanovsky oil fields (the latter is owned by Russia). Construction reportedly has faced delays.

In addition to these oil export routes to Europe not controlled by Russia, in 2009 Kazakhstan and China completed an oil pipeline from Kazakhstan's port city of Atyrau to the Xinjiang region of China that initially carries 200,000 bpd to China. Some Russian oil has been transported to China through this pipeline, the first Russian oil to be transported by pipeline to China.

Russia is the major purchaser of Kazakh gas through the Central Asia-Center gas pipeline network. According to British Petroleum (BP) data, Kazakhstan exported 402.6 bcf of gas to Russia in 2011 (almost the same as in 2010), virtually all of its exported gas.¹¹⁷ Kazakhstan completed its sections of the Central Asia-China gas pipeline in 2009-2010. At the end of October 2008, China and Kazakhstan signed a framework agreement on constructing a gas pipeline from Beyneu, north of the Aral Sea, eastward to Shymkent, where it will connect with the Central Asia-China gas pipeline. The pipeline is planned initially to supply 176.6 bcf to southern Kazakhstan and 176.6 bcf to China. Pipeline construction began in September 2011 and to be completed by 2015.

Kazakh officials have appeared to make contradictory statements about providing gas for European customers via a possible trans-Caspian pipeline traversing the South Caucasus and Turkey. President Nazarbayev appeared to support the possible transit of Kazakh gas through Turkey when he stated on October 22, 2009, during a visit to Turkey, that "Turkey ... will become a transit country. And if Kazakhstan's oil and gas are transported via this corridor then this will be advantageous to both Turkey and Kazakhstan."¹¹⁸ Reacting to the decision of the European Commission to facilitate talks on building a trans-Caspian gas pipeline, Minister of Oil and Gas Sauat Mynabyev stated in early October 2011 that "we do not have available resources for the gas pipeline yet."¹¹⁹

Turkmenistan's Gas

Turkmenistan's proven natural gas reserves—859 trillion cubic feet—are among the highest in the world, according to British Petroleum (BP) data. Its oil reserves are significant but not among the world's largest.¹²⁰

At the time it gained independence at the end of 1991, Turkmenistan largely was dependent on Russian energy export routes, and gas and oil production were held back by aging infrastructure,

¹¹⁶ *ITAR-TASS*, May 29, 2008; *CEDR*, December 11, 2007, Doc. No. CEP-950096; April 26, 2008, Doc. No. CEP-950045.

¹¹⁸ *CEDR*, October 22, 2009, Doc. No. CEP-950337.

¹¹⁹ *Interfax*, October 6, 2011.

¹²⁰ *BP Statistical Review of World Energy*, British Petroleum, June 2012.

inadequate investment, and poor management. In 1993, Russia halted Turkmen gas exports to Western markets through its pipelines, diverting Turkmen gas to other Eurasian states that had trouble paying for the gas. In 1997, Russia cut off these shipments because of transit fee arrears and as leverage to obtain Turkmenistan's agreement to terms offered by Russia's state-owned gas firm Gazprom.

The late President Niyazov signed a 25-year accord with then-President Putin in 2003 on supplying Russia up to 211.9 billion cubic feet (bcf) of gas in 2004 (about 12% of production at that time), rising up to 2.83 trillion cubic feet (tcf) in 2009-2028 (perhaps amounting to the bulk of anticipated production). Turkmenistan halted gas shipments to Russia at the end of 2004 in an attempt to get a higher gas price but settled for all-cash rather than partial barter payments. Turkmenistan and Russia continued to clash in subsequent years over gas prices and finally agreed in late 2007 that gas prices based on "market principles" would be established in 2009. Turkmenistan, Kazakhstan, and Russia signed accords in May and December 2007 on building a new gas pipeline that was planned to carry 353 bcf of Turkmen and 353 bcf of Kazakh gas to Russia. However, the Turkmen government appeared to have reservations about building another pipeline to Russia, and the project reportedly is on hold.

Seeking alternatives to pipeline routes through Russia, in December 1997 Turkmenistan opened the first pipeline from Central Asia to the outside world beyond Russia, a 125-mile gas pipeline linkage to Iran. In mid-2009, Turkmenistan reportedly agreed to increase gas supplies to up to 706 bcf per year.¹²¹ In January 2010, a second gas pipeline to Iran was completed—from a field that until April 2009 had supplied gas to Russia (see below)—to more than double Turkmenistan's export capacity to Iran. However, Turkmen gas exports to Iran were about 290 bcf in 2010 and 360 bcf in 2011, according to BP. Turkmenistan has appeared to arbitrarily interrupt gas shipments twice in winter months, most recently in late 2012 for what it claimed was pipeline repair work.

As another alternative to pipelines through Russia, in April 2006, Turkmenistan and China signed a framework agreement calling for Chinese investment in developing gas fields in Turkmenistan and in building a gas pipeline with a capacity of about 1.4 tcf per year through Uzbekistan and Kazakhstan to China. All three Central Asian states plan to send gas through this pipeline to China. Construction of the pipeline began in August 2007 and gas began to be delivered through the pipeline to Xinjiang and beyond in December 2009. In 2011, Turkmenistan provided about 505 bcf of gas to China, according to BP. In June 2012, Turkmenistan's Turkmengaz and China's National Petroleum Corp (CNPC) signed accords to increase Turkmenistan's natural gas shipments to China up to 2.3 tcf per year.

Perhaps in an additional attempt to diversify gas export routes, Berdimuhamedow first signaled in 2007 that Turkmenistan was interested in building a trans-Caspian gas pipeline. Turkmenistan signed a memorandum of understanding in April 2008 with the EU to supply 353.1 bcf of gas per year starting in 2009, presumably through a trans-Caspian pipeline that might at first link to the SCP and later to the proposed trans-Anatolian pipeline. President Berdimuhamedow asserted in March 2011 that "Turkmenistan intends to promote cooperation in the fuel and energy sector with European countries ... through construction of Trans-Caspian gas pipelines."¹²² Russia and Iran

¹²¹ *Iran: Daily Report*, January 21, 2008, Doc. No. IAP-11017; January 24, 2008, Doc. No. IAP-950014; April 26, 2008, Doc. No. IAP-950049; and May 6, 2008, Doc. No. IAP-950052.; *CEDR*, July 12, 2009, Doc. No. CEP-950097.

remain opposed to trans-Caspian pipelines, ostensibly on the grounds that they could pose environmental hazards to the littoral states.

Berdimuhamedow also revived Niyazov's proposal to build a gas pipeline through Afghanistan to Pakistan and India. In December 2010, the presidents of Turkmenistan, Pakistan, and Afghanistan and the prime minister of India signed an agreement on constructing the Turkmenistan-Afghanistan-Pakistan-India (TAPI) gas pipeline. The Asian Development Bank has indicated that it may provide partial funding for the TAPI pipeline, but other financing for the project remains problematic because of ongoing conflict in Afghanistan. Support for TAPI is part of the Administration's "New Silk Road Vision" (see above).

On May 23, 2012, Turkmenistan signed purchase agreements with India and Pakistan to supply up to 1.2 tcf of gas per year via the prospective TAPI pipeline. U.S. State Department spokesperson Victoria Nuland hailed the signing as "a perfect example of energy diversification, energy integration, done right. We are very strong supporters of the TAPI pipeline.... We consider it a very positive step forward and sort of a key example of what we're seeking with our New Silk Road Initiative, which aims at regional integration to lift all boats and create prosperity across the region."¹²³ Financing for the project remains problematic, however, because of ongoing conflict in Afghanistan.

On the night of April 8-9, 2009, a section of a gas pipeline from Turkmenistan to Russia exploded, halting Turkmen gas shipments. Russia claimed that it had notified Turkmenistan that it was reducing its gas imports because European demand for gas had declined, but Turkmenistan denied that it had been properly informed.¹²⁴ After extended talks, visiting former Russian President Dmitriy Medvedev and President Berdimuhamedow agreed on December 22, 2009, that Turkmen gas exports to Russia would be resumed, and that the existing supply contract would be altered to reduce Turkmen gas exports to up to 1 tcf per year and to increase the price paid for the gas. Turkmenistan announced in January 2010 that some gas exports to Russia had resumed. The incident appeared to further validate Turkmenistan's policy of diversifying its gas export routes.

In 2010, Russia's Gazprom gas firm purchased only 371 bcf of Turkmen gas, a sharp drop-off from past purchases. Unfortunately, Turkmen gas exports to Iran and China were not compensatory. Overall Turkmen gas exports fell in 2010 to about 865 bcf, down from 1.7 tcf in 2008, before the Russian gas cutoff.¹²⁵ In 2011, according to BP, Russia purchased 356.7 bcf of Turkmen gas. Overall, Turkmen gas exports rose to 1.2 tcf in 2011, buoyed by Chinese and Iranian purchases. Reportedly, Russia gains most of its cash revenue from these exports to Russia. Iran pays for its gas at least in part with goods, and Turkmen gas exports to China initially are being used to pay off Chinese energy development and pipeline loans.¹²⁶

In September 2011, the Council of the EU approved opening talks with Azerbaijan and Turkmenistan to facilitate an accord on building a trans-Caspian gas pipeline. Such a link would

¹²⁶ United States Senate, Committee on Foreign Relations, *Energy and Security from the Caspian to Europe: A Minority Staff Report*, December 12, 2012, p. 24.

provide added gas to ensure adequate supplies for EU Southern Corridor diversification efforts. Hailing the decision, EU Energy Commissioner Günther Oettinger stated that “Europe is now speaking with one voice. The trans-Caspian pipeline is a major project in the Southern Corridor to bring new sources of gas to Europe. We have the intention of achieving this as soon as possible.”¹²⁷ The Russian Foreign Ministry denounced the plans for the talks, and claimed that the Caspian Sea littoral states had agreed in a declaration issued in October 2007 that decisions regarding the Sea would be adopted by consensus among all the littoral states (Russia itself has violated this provision by agreeing with Kazakhstan and with Azerbaijan on oil and gas field development). It also claimed that the proposed pipeline was different from existing sub-sea pipelines in posing an environmental threat.

In June 2012, Azerbaijani border forces turned back a Turkmen ship carrying out seismic work in or near the area of the disputed and undeveloped offshore Serder/Kyapaz oil and gas field. Two other disputed fields have been developed by Azerbaijan. Each side lodged diplomatic protests against the other. The heightened tensions over the disputed field decreases the likelihood that a trans-Caspian pipeline soon will be built that could supply gas for the planned Trans-Anatolian Pipeline to Europe, according to the EIU.

Despite these tensions, EU Energy Commissioner Guenther Oettinger argued at the Frankfurt Gas Forum meeting in November 2012 that for the Southern Corridor to supply 10-20% of EU gas needs within the next decade, a trans-Caspian pipeline to Turkmenistan is necessary. Likewise, at a meeting of the EU-Azerbaijan Cooperation Council in Brussels in December 2012, both sides voiced the hope that an Azerbaijani-Turkmen-EU accord on building the trans-Caspian pipeline could be reached. At an energy conference in Turkmenistan in mid-November 2012, Deputy Assistant Secretary of State Lynne Tracy stated that the U.S. position was that if such an accord is reached, “no other country has veto power over that decision.” However, some observers reported that Turkmen officials reportedly emphasized their interest in the TAPI pipeline and de-emphasized interest in the trans-Caspian pipeline.¹²⁸ A Senate Foreign Relations Committee minority staff report issued in December 2012 called for Turkmenistan to make a political decision to build a trans-Caspian gas pipeline and invite major Western firms to develop oil and gas fields, for the United States to push for international funding for this pipeline, and for the EU to involve its members as well as Azerbaijan and Turkey in gas purchase talks with Turkmenistan. The report also suggested that in order to acquaint Turkmenistan with Western markets, a small undersea pipeline with a capacity of about 353 bcf quickly could be built to connect existing Azerbaijani and Turkmen offshore platforms.¹²⁹

Uzbekistan’s Oil and Gas

The U.S. Energy Department reports estimates that Uzbekistan has 594 million barrels of proven oil reserves and an estimated 65 trillion cubic feet of proven natural gas reserves as of 2012

¹²⁷ European Commission, *Press release: EU Starts Negotiations on Caspian Pipeline to Bring Gas to Europe*, September 12, 2011.

¹²⁸ Natallia Moore, “Turkmenistan Weekly News Analysis,” *Eurasianet*, November 22, 2012 and November 30, 2012.

¹²⁹ Najia Badykova, “US-EU Energy Council Reiterates Support for Southern Corridor,” *FSU Oil and Gas Monitor*, December 12, 2012; Jennifer DeLay, “Russia, Azerbaijan Remain Rivals in Race for European Gas Markets,” *FSU Oil and Gas Monitor*, December 19, 2012; United States Senate, Committee on Foreign Relations, *Energy and Security from the Caspian to Europe: A Minority Staff Report*, December 12, 2012.

(negligible in terms of world oil reserves but about 1% of world gas reserves).¹³⁰ Uzbekistan is a net importer of oil. Uzbek oil production has been declining for many years, attributable to lack of investment. The country consumes the bulk of its gas production domestically, but has used its network of Soviet-era gas pipelines to export some gas to Russia and to other Central Asian states (Kazakhstan, Kyrgyzstan, and Tajikistan). Gas exports to the latter two states have been substantially reduced in recent years because of payment arrears. According to BP, Uzbekistan exported about 479 bcf of gas in 2010: 364 bcf of gas to Russia; 102 bcf to Kazakhstan; about 7 bcf to Kyrgyzstan; and about 6 bcf to Tajikistan. According to one report, gas exports declined to 424 bcf in 2011, but the government hopes to export 530 bcf in 2012. Gas is provided to Russia and Kazakhstan through the Russian-owned Central Asia-Center Pipeline system. Uzbekistan began to export some gas through this pipeline system to Ukraine in 2011. Reportedly, Uzbekistan was an unreliable gas exporter during the winters of 2010-2011 and 2011-2012, restricting supplies to divert them to cold-weather domestic use. In November 2011, Kazakhstan's major city of Almaty experienced shortages of gas imported from Uzbekistan, leading it to urgently conclude an agreement with the China National Petroleum Corporation (CNPC) to obtain gas from the Central Asia-China Pipeline.¹³¹

Uzbekistan largely has been closed to Western energy investment, although efforts to attract international energy firms have appeared to increase in recent years. Russian firms Gazprom and Lukoil are the largest investors in Uzbek gas development and production. Reportedly, Gazprom pays European-pegged gas prices for only a fraction of imports from Uzbekistan. In 2005, CNPC and Uzbekistan's state-owned Uzbekneftegaz firm announced that they would form a joint venture to develop oil and gas resources. In 2007, Uzbekistan and China signed an agreement on building a 326-mile section of the Central Asia-China Pipeline, and a construction and operation joint venture between Uzbekneftegaz and CNPC began construction in 2008. Two side-by-side pipelines have been completed, and the third is under construction. In October 2011, Uztransgaz (Uzbek gas transportation firm) and a subsidiary of CNPC signed a contract to supply up to 353 billion cubic feet of gas in 2012 through this pipeline (other sources stated that Uzbekistan planned to supply up to 141 billion cubic feet). However, Uzbekistan has reported that these shipments began only in August 2012. In April 2012, China announced it would spend \$15 billion for oil and gas exploration in Uzbekistan. A production sharing consortium composed of Uzbekneftegaz, Lukoil, the Korea National Oil Corporation, and CNPC is exploring for gas in the Aral Sea region.

U.S. Regional Energy Policy

U.S. policy goals regarding energy resources in the Central Asian and South Caucasian states have included supporting their sovereignty and ties to the West, supporting U.S. private investment, promoting NATO and European energy security through diversified suppliers, assisting ally Turkey, and opposing the building of pipelines that transit "energy competitor" Iran or otherwise give it undue influence over the region. Other interests have included encouraging regional electricity, oil, and gas exports to South Asia and added security for Caspian region pipelines and energy resources.

¹³⁰ U.S. Department of Energy, Energy Information Administration, *Uzbekistan Country Analysis Brief*, January 19, 2012.

¹³¹ *Interfax*, November 14, 2011.

To bolster NATO and other European energy supply diversity, the United States supported the building of the Baku-Tbilisi-Ceyhan oil pipeline (BTC; completed in 2006) and the South Caucasus Pipeline (SCP; completed in 2007). The United States also endorsed the building of a trans-Caspian gas pipeline to link Central Asian producers to European markets. In testimony in June 2011, then-Special Envoy for Eurasian Energy Richard Morningstar stated that current U.S. policy encourages the development of new Eurasian oil and gas resources to increase the diversity of world energy supplies. In the case of oil, increased supplies may directly benefit the United States, he stated. A second U.S. goal is to increase European energy security, so that some countries in Europe that largely rely on a single supplier (presumably Russia) may in the future have diverse suppliers. A third goal is assisting Caspian regional states to develop new routes to market, so that they can obtain more competitive prices and become more prosperous. In order to achieve these goals, the Administration supports the development of the Southern Corridor of Caspian (and perhaps Iraq) gas export routes transiting Turkey to Europe.¹³² Of various competing pipeline proposals, the Administration will support the proposal “that brings the most gas, soonest and most reliably, to those parts of Europe that need it most.” The Administration also supports the diversification of Kazakhstan’s export routes and the boosting of oil production as a significant addition to world oil supplies. At the same time, Morningstar rejected views that Russia and the United States are competing for influence over Caspian energy supplies, stating that the Administration has formed a Working Group on Energy under the U.S.-Russia Bilateral Presidential Commission.¹³³

At the fourth meeting of the U.S.-EU Energy Council in early December 2012 in Brussels, the parties issued a statement supporting the development of the Southern Gas Corridor, which they stated “remains a pivotal opportunity to diversify supply and allow new providers to participate in the EU energy market.” The sides also stressed that they continued to encourage Central Asian producers to link up to the Southern Gas Corridor.¹³⁴

Until 2004, the Bush Administration retained a Clinton-era position, Special Advisor on Caspian Energy Diplomacy, to help further U.S. policy and counter the efforts of Russia’s Viktor Kaluzhny, the then-deputy foreign minister and Special Presidential Representative for Energy Matters in the Caspian. After the Administration abolished this post as no longer necessary, its responsibilities were shifted at least in part to a Deputy Assistant Secretary of State (responsibilities of a former Special Negotiator for Nagorno-Karabakh and Eurasian Conflicts also were shifted to the Deputy Assistant Secretary). Some critics juxtaposed Russia’s close interest in securing Caspian energy resources to what they termed halting U.S. efforts.¹³⁵ Following some Congressional urging, a post of Special Envoy for Eurasian Energy issues was (re-)created in March 2008, with the former Bush Administration stating that there were “new opportunities” for the export of Caspian oil and gas.¹³⁶ In April 2009, Secretary of State Clinton

¹³² The term “Southern Gas Corridor” was mentioned in Commission of the European Communities, Communication from the Commission to the European Parliament, The Council, The European Economic and Social Committee, and the Committee of the Regions, *Second Strategic Energy Review: An EU Energy Security and Solidarity Action Plan*, Com(2008) 781 Final, November 13, 2008.

¹³⁶ United States Senate, Committee on Foreign Relations, *Energy and Security from the Caspian to Europe: A* (continued...)

appointed Richard Morningstar as Special Envoy for Eurasian Energy. After he left this post in mid-2012, the Administration proposed that the functions of the post be assumed by the Assistant Secretary of State for Energy Resources. In late 2012, minority staff of the Senate Foreign Relations Committee recommended that the State Department retain a dedicated Special Envoy position.¹³⁷ The position has not been filled as of mid-2013.¹³⁸

U.S. Aid Overview

For much of the 1990s and until September 11, 2001, the United States provided much more aid each year to Russia and Ukraine than to any Central Asian state (most such aid was funded from the Freedom Support Act account in Foreign Operations Appropriations, but some derived from other program and agency budgets). Cumulative foreign aid budgeted to Central Asia for FY1992 through FY2010 amounted to \$5.7 billion, about 14% of the amount budgeted to all the Eurasian states, reflecting the lesser priority given to these states prior to September 11.

Budgeted spending for FY2002 for Central Asia, during OEF, was greatly boosted in absolute amounts (\$584 million) and as a share of total aid to Eurasia (about one-quarter of such aid). The former Bush Administration since then requested smaller amounts of aid, although the Administration continued to stress that there were important U.S. interests in the region. The former Bush Administration highlighted the phase-out of economic aid to Kazakhstan and the congressionally imposed restrictions on aid to Uzbekistan (see below) as among the reasons for declining aid requests. In April 2008, then-Assistant Secretary of State Richard Boucher stated that another reason for declining U.S. aid to the region was a more constrained U.S. budgetary situation. Aid to Central Asia in recent years has been about the same or less in absolute and percentage terms than that provided to the South Caucasian region.

The Obama Administration boosted aid to Central Asia in FY2009 to about \$494.5 million (all agencies and programs), but aid declined to \$436.3 million in FY2010. The Administration stated in FY2010 and FY2011 that it was prioritizing foreign assistance to Tajikistan and Kyrgyzstan. In Tajikistan, the Administration stated that aid would help increase the stability of a country “situated on the frontline of our ongoing military stabilization efforts in Afghanistan.” In Kyrgyzstan, the Administration stated that aid would improve security, combat drug-trafficking, reform the economy, and address food insecurity.¹³⁹ Following the April and June 2010 instability in Kyrgyzstan, the Administration provided \$77.6 million in addition to regular appropriated aid for stabilizing the economy, holding elections, and training police as well as urgent food and shelter aid.

Country totals are not yet available for FY2013, but the Administration’s budget request for FY2014 calls for \$118.5 million for the Central Asian countries, a decline from

(...continued)

Minority Staff Report, December 12, 2012, pp. 61-62.

¹³⁷ United States Senate, Committee on Foreign Relations, *Energy and Security from the Caspian to Europe: A Minority Staff Report*, December 12, 2012, p. 9.

¹³⁹ U.S. Department of State, *Congressional Budget Justification for Foreign Operations for FY2010*, May 2009, p. 44; *Congressional Budget Justification for Foreign Operations for FY2011*, Volume II, March 2010, p. 85.

FY2012.¹⁴⁰ Assistant Secretary Blake has argued that while less foreign assistance was requested for many countries in FY2014, the cut in aid to Central Asia was less than average, signifying the “importance” of the region to the United States (see **Table 1**, **Table 2** and **Table 3**).¹⁴¹

The Millennium Challenge Corporation (MCC), created in 2004 to provide U.S. aid to countries with promising development records, announced in late 2005 that Kyrgyzstan was eligible to apply for assistance as a country on the “threshold” of meeting the criteria for full-scale development aid. In March 2008, the MCC signed an agreement with Kyrgyzstan to provide \$16 million over the next two years to help the country combat corruption and bolster the rule of law. This threshold program was completed in June 2010, and Kyrgyzstan has requested another threshold grant. In its FY2013 assessment, the MCC named Kyrgyzstan as a candidate for a Millennium Challenge Compact.

Peace Corps programs in most of the Central Asian states have ended (Tajikistan was deemed too insecure for volunteers), with Kyrgyzstan currently the only country in the region hosting volunteers. Most recently, Peace Corps volunteers wound up activities in Turkmenistan at the end of 2012, reportedly in the wake of growing tensions between the Turkmen government and the Peace Corps. According to some accounts, similar tensions had resulted in the termination of Peace Corps activities in Kazakhstan the previous year.¹⁴²

Congressional Conditions on Kazakh and Uzbek Aid

In Congress, Omnibus Appropriations for FY2003 (P.L. 108-7) forbade FREEDOM Support Act (FSA) assistance to the government of Uzbekistan unless the Secretary of State determined and reported that it was making substantial progress in meeting commitments under the Strategic Partnership Declaration to democratize and respect human rights. The conference report (H.Rept. 108-10) also introduced language that forbade assistance to the Kazakh government unless the Secretary of State determined and reported that it significantly had improved its human rights record during the preceding six months. However, the legislation permitted the Secretary to waive the requirement on national security grounds.¹⁴³ The Secretary reported in mid-2003 that Kazakhstan and Uzbekistan were making such progress. Some in Congress were critical of these findings. By late 2003, the former Bush Administration had decided that progress was inadequate in Uzbekistan, so that new Foreign Military Financing (FMF) and International Military Education and Training (IMET) aid was cut off. Since FY2005, the Secretary of State annually has reported that Kazakhstan has failed to significantly improve its human rights record, but aid restrictions have been waived on national security grounds.

¹⁴⁰ The “function 150” aid numbers include funds from the Aid for Europe, Eurasia, and Central Asia (AEECA) account, Global Health and Child Survival (GHCS), Non-proliferation, Anti-terrorism, Demining and Related Programs (NADR), Foreign Military Financing (FMF), International Military Education and Training (IMET), and Food for Peace. The totals do not include Defense or Energy Department funds, funding for exchanges, the value of privately donated cargoes, or Millennium Challenge Corporation aid to Kyrgyzstan.

¹⁴¹ U.S. Department of State, *The Istanbul Process Ministerial: Results and Prospects for the Future*, Remarks by Robert O. Blake, Jr., *Almaty, Kazakhstan*, April 26, 2013.

¹⁴² Ashley Cleek, “Peace Corps Pulling Out of Turkmenistan,” *Eurasianet*, September 3, 2012.

¹⁴³ The language calling for “substantial progress” in respecting human rights differs from the grounds of ineligibility for assistance under Section 498(b) of Part I of the Foreign Assistance Act of 1961 (P.L. 87-195), which includes as grounds a presidential determination that a Soviet successor state has “engaged in a consistent pattern of gross violations of internationally recognized human rights.” The Administration has stated annually that the president has not determined that Kazakhstan and Uzbekistan have engaged in “gross violations” of human rights.

Consolidated Appropriations for FY2004, including foreign operations (P.L. 108-199) and for FY2005 (P.L. 108-447), and Foreign Operations Appropriations for FY2006 (P.L. 109-102) retained these conditions, while clarifying that the prohibition on aid to Uzbekistan pertained to the *central* government and that conditions included respecting human rights, establishing a “genuine” multi-party system, and ensuring free and fair elections and freedom of expression and media. These conditions remained in place under the continuing resolution for FY2007 (P.L. 109-289, as amended). In appropriations for FY2008 (Consolidated Appropriations; P.L. 110-161), another condition was added blocking the admission of Uzbek officials to the United States if the Secretary of State determined that they were involved in abuses in Andijon. Omnibus Appropriations for FY2009 (P.L. 111-8, Sections 7075 [Kazakhstan] and 7076 [Uzbekistan]) reiterated these conditions on assistance to Kazakhstan and Uzbekistan. Consolidated Appropriations for FY2010 (P.L. 111-117) referenced Sections 7075 and 7076, but added that Uzbekistan would be eligible for expanded IMET, permitting the first such assistance since FY2004. The Department of Defense and Full-Year Continuing Appropriations Act, FY2011 (P.L. 112-10), directed that assistance would be provided under the authorities and conditions of FY2010 foreign operations appropriations.

In late 2009, Congress permitted (P.L. 111-84, §801)—for the first time since restrictions on aid to Uzbekistan were put in place—the provision of some assistance on national security grounds to facilitate the acquisition of supplies for U.S. and NATO operations in Afghanistan from countries along the Northern Distribution Network. Using this authority, the Administration requested in April 2011 a small amount of FMF assistance for FY2012 for nonlethal equipment to facilitate Uzbekistan’s protection of the Northern Distribution Network (estimated FMF spending for FY2012 later increased substantially over that requested, to \$1.5 million).

On September 22, 2011, the Senate Appropriations Committee approved a foreign operations appropriations bill, S. 1601 (Leahy), that provides for a waiver for assistance to Uzbekistan on national security grounds and to facilitate U.S. access to and from Afghanistan. According to one media account, the Administration had called for such a waiver in order to facilitate security assistance, including FMF, for Uzbekistan.¹⁴⁴ Some human rights groups have protested against the possible bolstering of U.S. security assistance to Uzbekistan.¹⁴⁵ Consolidated Appropriations for FY2012 (P.L. 112-74; signed into law on December 23, 2011) provides for the Secretary of State to waive conditions on assistance to Uzbekistan for a period of not more than six months and every six months thereafter until September 30, 2013, on national security grounds and as necessary to facilitate U.S. access to and from Afghanistan. The law requires that the waiver include an assessment of democratization progress, and calls for a report on aid provided to Uzbekistan, including expenditures made in support of the NDN in Uzbekistan and any credible information that such assistance or expenditures are being diverted for corrupt purposes. The law also extends a provision permitting expanded IMET assistance for Uzbekistan. Soon after the bill

¹⁴⁴ Joshua Kucera, “Uzbekistan: Military Aid to Tashkent Would Help Protect NDN - State Department,” *Eurasianet*, September 28, 2011.

¹⁴⁵ International Crisis Group (ICG), “Joint Letter to Secretary Clinton Regarding Uzbekistan,” *States News Service*, September 27, 2011; Human Rights Watch, “Don’t Lift Restrictions Linked to Human Rights until Tashkent Shows Improvement,” *States News Service*, September 7, 2011. The joint letter by ICG and other human rights groups called on Secretary Clinton to affirm that “U.S. policies towards the Uzbek government will not fundamentally change absent meaningful human rights improvements, including the release of imprisoned pro-democracy activists, an end to harassment of civil society groups, effective steps to end torture, and the elimination of forced child labor in the cotton sector.”

was signed into law, the waiver was exercised in order to supply non-lethal equipment to help secure the NDN.¹⁴⁶

Besides bilateral and regional aid, the United States contributes to international financial institutions that aid Central Asia. Recurrent policy issues regarding U.S. aid include what it should be used for, who should receive it, and whether it is effective.

U.S. Security and Arms Control Programs and Assistance

In November 2010, Deputy Assistant Secretary of Defense David Sedney testified that

The focus of the Department of Defense's efforts in Central Asia today in the short term are the transport of goods and equipment and personnel through the ground and air lines of communication through Central Asia.... But beyond our focus on the immediate goals in Afghanistan, we also have long-term security assistance goals in Central Asia. Our security assistance focuses on the professionalization of the military, the border guards, counternarcotics forces and counterterrorism forces.¹⁴⁷

Indicative of these goals, he mentioned that over 1,000 Central Asian security personnel had been trained at the U.S.-German Marshall Center and that the U.S. National Guard had provided training in civil-military relations (but not combat training) throughout Central Asia as part of the National Guard State Partnership Program, funded by Partnership for Peace and USCENTCOM (see below) appropriations. For example, the Arizona National Guard has provided training for Kazakh active and reserve forces, interagency partners, and international nongovernmental organizations; the Louisiana and Mississippi National Guard for Uzbek participants; the Montana National Guard for Kyrgyz participants; the Virginia National Guard for Tajik participants; and the Nevada National Guard for Turkmen participants.¹⁴⁸

Although U.S. security assistance to the region was boosted in the aftermath of 9/11, such aid has lessened since then as a percentage of all such aid to Eurasia, particularly after aid to Uzbekistan was cut in FY2004 and subsequent years (see above, "Congressional Conditions on Kazakh and Uzbek Aid"). Security and law enforcement aid to Central Asia was 31% (\$188 million) of all such aid to Eurasia in FY2002, but had declined to 18% (\$247 million) in FY2010. Of all budgeted assistance to Central Asia over the period from FY1992-FY2010, security and law enforcement aid accounted for a little over one-fifth. Security and law enforcement programs include Foreign Military Financing (FMF), International Military Education and Training (IMET), Excess Defense Articles (EDA), and border security aid to combat trafficking in drugs, humans, and WMD.

¹⁴⁷ U.S. House of Representatives, Committee on Foreign Relations, Subcommittee on Asia, the Pacific, and the Global Environment, Hearing on the Emerging Importance of the U.S.-Central Asia Partnership, *Testimony of Robert Sedney, Deputy Assistant Secretary of Defense*, November 17 2010.

¹⁴⁸ For background, see CRS Report R41957, *The National Guard State Partnership Program: Background, Issues, and Options for Congress*, by Lawrence Kapp and Nina M. Serafino; U.S. Government Accountability Office, *State Partnership Program: Improved Oversight, Guidance, and Training Needed for National Guard's Efforts with Foreign Partners*, May 2012.

A Defense Department counter-terrorism train and equip program (created under Section 1206 of the National Defense Authorization Act for FY2006; P.L. 109-163) provided \$20 million to Kazakhstan in FY2006, \$19.2 million in FY2007, and \$12.5 million in FY2008 (the latter to respond to threats in the North Caspian Sea). It also provided \$12 million to Kyrgyzstan in FY2008 and \$9.6 million in FY2009. Another Defense Department program for defense articles, services, training or other support for reconstruction, stabilization, and security activities (created under Section 1207 of P.L. 109-163; Section 1207 has expired and been replaced by a USAID Complex Crises Fund) provided \$9.9 million to Tajikistan in FY2008.¹⁴⁹ In FY2010, the Defense Department transferred \$15.8 million in Section 1207 funds to the State Department's Civilian Response Corps to assist in reconstruction in Kyrgyzstan following the April 2010 coup and the June 2010 ethnic violence.¹⁵⁰

In 2010, the Defense Department announced assistance to set up training facilities in Kyrgyzstan and Tajikistan to bolster regional efforts to combat drug-trafficking and terrorism. It was stated that no U.S. troops would be stationed at either facility.¹⁵¹ The anti-terrorism training center in southern Kyrgyzstan, planned to be built in the Batken region, was planned to cost \$5.5 million. Construction reportedly was delayed due to the change of government and ethnic violence in Kyrgyzstan, and then was canceled. The facility in Tajikistan, to be built near Dushanbe in 2011 for the national guard for live-fire training, was planned to cost up to \$10 million. Although the U.S. Embassy reported that the construction of the training center in Tajikistan began in mid-2011, completion apparently has been delayed, with one solicitation notice for construction being issued in mid-2012.¹⁵²

According to the State Department's 2012 *Narcotics Control Strategy Report*, up to one-fifth of opium and heroin produced in Afghanistan are transited through Central Asia to markets in Russia and Central Europe. Most of these drugs transit the Afghan-Tajik border, and from there are shipped in bulk by trucks travelling along the relatively good road system in Uzbekistan. Governmental corruption facilitates these shipments, according to the State Department. During his visits to Kyrgyzstan, Kazakhstan, and Tajikistan in late June 2011, U.S. Assistant Secretary of State for International Narcotics and Law Enforcement Affairs (INL) William Brownfield announced the launch of a new \$4.2 million Central Asia Counternarcotics Initiative (CACI) to provide training and equipment to set up counternarcotics task forces in each of the Central Asian states. The initiative also aimed to encourage regional cooperation by the task forces, including through the U.S. supported Central Asia Regional Information Coordination Center (CARICC), as well as broader cooperation with existing task forces in Afghanistan and Russia. Besides INL, the U.S. Drug Enforcement Administration (DEA) was involved in the initiative. A factsheet

reported that the State Department planned to closely coordinate with the Defense Department, which had provided over \$100 million in counter-narcotics aid to Central Asia.¹⁵³ Reportedly, Russia objected to the implementation of CACI, and the program faltered, although assistance is being provided through other programs.¹⁵⁴

In addition to the aid reported by the State Department's Office of the Coordinator of Assistance to Europe and Eurasia, the Defense Department provides classified and other aid to Central Asia.¹⁵⁵

U.S. Central Command (USCENTCOM) in 1999 became responsible for U.S. military engagement in Central Asia. It cooperates with the European Command (USEUCOM), on the Caspian Maritime Security Cooperation program (similar to the former Caspian [Sea] Guard program). In 2008, General Bantz Craddock, then-Commander of USEUCOM, testified that the Caspian Maritime Security Cooperation program coordinates security assistance provided by U.S. agencies to Azerbaijan and Kazakhstan. He stated that U.S. Naval Forces Europe cooperates with U.S. Naval Forces Central Command "to promote maritime safety and security and maritime domain awareness in the Caspian Sea."¹⁵⁶ Russia objects to the involvement of non-littoral countries in Caspian maritime security and has appeared to counter U.S. maritime security aid by boosting the capabilities of its Caspian Sea Flotilla and by urging the littoral states to coordinate their naval activities exclusively with Russia.

All the Central Asian states except Tajikistan joined NATO's PFP by mid-1994 (Tajikistan joined in 2002). Central Asian troops have participated in periodic PFP (or "PFP-style") exercises in the United States since 1995, and U.S. troops have participated in exercises in Central Asia since 1997. A June 2004 NATO summit communiqué pledged enhanced Alliance attention to the countries of the South Caucasus and Central Asia, and the NATO Secretary General appointed a Special Representative for the Caucasus and Central Asia. Uzbekistan sharply reduced its participation in PFP after NATO raised concerns that Uzbek security forces had used excessive and disproportionate force in Andijon (however, it continued to permit Germany to use a base near Termez). Relations with NATO appeared to improve after 2008 (see below).

Kazakhstan's progress in military reform enabled NATO in January 2006 to elevate it to participation in an Individual Partnership Action Plan (IPAP). The third phase of the IPAP was approved in August 2012 and reportedly involves continued training for the peacekeeping battalion "Kazbat" (Kazakh battalion) and the peacekeeping brigade "Kazbrig" (Kazakh brigade),

including at the PFP Training Center at the Military Institute of the Army in Almaty. Kazakhstan has stated that it does not plan to join NATO but wants to modernize its armed forces. According to analyst Roger McDermott, Kazakhstan has chosen to rely on Russia for its national security, so that its ties with NATO—while the most significant in Central Asia—will remain limited.¹⁵⁷ Perhaps an example of Kazakhstan's use of training from the United States, NATO, and Russia, a regular NATO PFP "Steppe Eagle" military exercise was held in Kazakhstan in September 2012, involving the Kazbat and Kazbrig, which will be followed by the CSTO Collective Peacekeeping Forces' "Unbreakable Brotherhood 2012" exercise in Kazakhstan in October 2012.

According to former USCENTCOM Commander Admiral William Fallon, the Bagram airbase in Afghanistan is the Forward Operating Site (basing intended for rotational use by operating forces with limited U.S. military support presence and possibly pre-positioned equipment) for access to and operations in Central Asia.¹⁵⁸

Closure of the Karshi-Khanabad Airbase

On July 5, 2005, the presidents of Uzbekistan, Kyrgyzstan, and Tajikistan signed a declaration issued during a meeting of the SCO that stated that "as large-scale military operations against terrorism have come to an end in Afghanistan, the SCO member states maintain that the relevant parties to the anti-terrorist coalition should set a deadline for the temporary use of ... infrastructure facilities of the SCO member states and for their military presence in these countries."¹⁵⁹ Despite this declaration, none of the Central Asian leaders immediately called for closing the coalition bases. However, after the United States and others interceded so that refugees who fled from Andijon to Kyrgyzstan could fly to Romania, Uzbekistan on July 29 demanded that the United States vacate K2 within six months. On November 21, 2005, the United States officially ceased operations to support Afghanistan at K2. Perhaps indicative of the reversal of U.S. military-to-military and other ties, former pro-U.S. defense minister Qodir Gulomov was convicted of treason and received seven years in prison, later suspended. Many K2 activities shifted to the Manas airbase in Kyrgyzstan. Some observers viewed the closure of K2 and souring U.S.-Uzbek relations as setbacks to U.S. influence in the region and as gains for Russian and Chinese influence. Others suggested that U.S. ties with other regional states provided continuing influence and that U.S. criticism of human rights abuses might pay future dividends among regional populations.¹⁶⁰

Efforts to Improve Security Relations

Appearing to signal improving U.S.-Uzbek relations, in early 2008 Uzbekistan permitted U.S. military personnel under NATO command, on a case-by-case basis, to transit through an airbase near the town of Termez that it has permitted Germany to operate.¹⁶¹ President Karimov attended

the NATO Summit in Bucharest, Romania, in early April 2008 and stated that Uzbekistan was ready to discuss the transit of nonlethal goods and equipment by NATO through Uzbekistan to Afghanistan. He announced in May 2009 that the United States and NATO had been permitted to use the Navoi airport (located between Samarkand and Bukhara in east-central Uzbekistan) for transporting nonlethal supplies to Afghanistan.

Representing the Obama Administration, Under Secretary of State William Burns visited Uzbekistan in early July 2009, and President Karimov assessed his talks with Burns as “positive.” In August 2009, General David Petraeus traveled to Uzbekistan and signed an accord on boosting military educational exchanges and training. Reportedly, these visits also resulted in permission by Uzbekistan for military air overflights of weapons to Afghanistan. Assistant Secretary Blake visited Uzbekistan in November 2009 and stated that his meetings there were “a reflection of the determination of President Obama” to strengthen ties. He proposed that the two countries set up high-level annual consultations to “build our partnership across a wide range of areas. These include trade and development, border security, cooperation on narcotics, the development of civil society, and individual rights.”¹⁶²

The first Annual Bilateral Consultation (ABC) took place in late December 2009 with a visit to the United States by an Uzbek delegation led by Foreign Minister Vladimir Norov. The two sides drew up a plan for cooperation for 2010 that involved an extensive range of diplomatic visits, increased military-to-military contacts, and investment and trade overtures, including the provision of Expanded IMET.¹⁶³ The second ABC took place in February 2011 with a visit to Uzbekistan led by Assistant Secretary Blake. The talks reportedly included security cooperation, trade and development, science and technology, counter-narcotics, civil society development, and human rights. A U.S. business delegation discussed means to increase trade ties. Blake reported that the United States had purchased \$23 million in Uzbek goods for transit to Afghanistan in FY2010. The third ABC was held in August 2012, and like the second involved a visit to Tashkent by a U.S. delegation led by Assistant Secretary Blake. He reported that the meeting covered Uzbekistan’s support for U.S. operations in Afghanistan, energy, agriculture, health, parliamentary exchanges, education, science and technology, counter-narcotics, border security, counter-terrorism, religious freedom, trafficking in persons, and human rights. At an associated U.S.-Uzbek business forum, Assistant Secretary of State Blake raised concerns about currency convertibility and contract sanctity that hamper foreign investment. In a speech in October 2012, Blake stated that because of Uzbekistan’s poor human rights record, the United States provided it only non-lethal security assistance.¹⁶⁴

The Manas Airbase/Transit Center

The Manas airbase (since 2009 called the Manas Transit Center; see below) became operational in December 2001 and uses some facilities of the international airport near Bishkek, the capital of Kyrgyzstan. According to a fact sheet prepared in early 2009 by the 376th Air Expeditionary Wing of the U.S. Air Force, the Manas airbase serves as the “premier air mobility hub” for operations in Afghanistan. Missions include support for personnel and cargo transiting in and out of the theater, aerial refueling, airlift and airdrop, and medical evacuation. Then-Secretary Clinton was told during her December 2010 visit to the Manas Transit Center that up to 3,500 troops every day, over 13 million pounds of cargo each month, and 117 million gallons of fuel each year were handled by the airbase.

In early 2006, Kyrgyz President Bakiyev reportedly requested that lease payments for use of the Manas airbase be increased to more than \$200 million per year but at the same time reaffirmed Russia’s free use of its nearby base.¹⁶⁵ By mid-July 2006, however, the United States and Kyrgyzstan announced that they had reached a settlement for the continued U.S. use of the airbase. Although not specifically mentioning U.S. basing payments, it was announced that the United States would provide \$150 million in “total assistance and compensation over the next year,” subject to congressional approval.

In September 2007, a U.S. military officer stated that the Manas airbase was moving toward “a sustainment posture,” with the replacement of most tents and the building of aircraft maintenance, medical, and other facilities.¹⁶⁶

On February 3, 2009, then-President Bakiyev announced during a visit to Moscow that he intended to close the Manas airbase. Many observers speculated that the decision was spurred by Russia, which offered Bakiyev a \$300 million loan for economic development and a \$150 million grant for budget stabilization in the wake of the world economic downturn. Russia also stated that it would write off most of a \$180 million debt. The United States was notified on February 19, 2009, that under the terms of the status of forces agreement it had 180 days to vacate the airbase.

The Manas Transit Center Agreement

The Defense Department announced on June 24, 2009, that an agreement of “mutual benefit” had been concluded with the Kyrgyz government “to continu[e] to work, with them, to supply our troops in Afghanistan, so that we can help with the overall security situation in the region.”¹⁶⁷ The agreement was approved by the Kyrgyz legislature and signed into law by then-President Bakiyev, to take effect on July 14, 2009. According to the then-Kyrgyz foreign minister, the

government decided to conclude the annually renewable “intergovernmental agreement with the United States on cooperation and the formation of a transit center at Manas airport,” because of growing alarm about “the worrying situation in Afghanistan and Pakistan.” The agreement is for five years and is renewed yearly, unless both parties agree to end it. A yearly rent payment for use of land and facilities at the Manas airport would be increased from \$17.4 million to \$60 million per year and the United States had pledged more than \$36 million for infrastructure improvements and \$30 million for air traffic control system upgrades for the airport. The Kyrgyz foreign minister also stated that the United States had pledged \$20 million dollars for a U.S.-Kyrgyz Joint Development Fund for economic projects, \$21 million for counter-narcotics efforts, and \$10 million for counter-terrorism efforts.¹⁶⁸ All except the increased rent had already been appropriated or requested. The agreement also reportedly includes stricter host-country conditions on U.S. military personnel. One Kyrgyz legislator claimed that the agreement was not a *volte-face* for Kyrgyzstan because Russia and other Central Asian states had signed agreements with NATO to permit the transit of supplies to Afghanistan (see below).¹⁶⁹

Kyrgyzstan had also requested that French and Spanish troops who were deployed at Manas had to leave, and they had pulled out by October 2009. The French detachment (reportedly 35 troops and a tanker aircraft) moved temporarily to Dushanbe. The Spanish unit (reportedly 60 troops and two transport aircraft) moved temporarily to Herat, west Afghanistan, and Dushanbe was used temporarily as a stopover for troop relief flights. France and Spain have since reached accords with Kyrgyzstan and have returned to Manas.

The Status of the Manas Transit Center After the April 2010 Coup

Initially after the April 2010 ouster of then-President Bakiyev, some officials in the interim government stated or implied that the conditions of the lease would be examined. Then-acting Prime Minister Roza Otunbayeva warned on April 8 that questions of corruption involving commercial supplies for the Manas Transit Center would be one matter of investigation. On April 12, she stated that she realized that 2010 was a seminal year for U.S. operations in Afghanistan and that President Obama planned on drawing down troops thereafter, and implied that ultimately she hoped there were no bases in the country.¹⁷⁰ On April 13, Otunbayeva announced that the lease on the Manas Transit Center would be “automatically” renewed for one year. Meeting with then-Secretary Clinton on December 2, 2010, Otunbayeva stressed that the Manas Transit Center was a significant contributor to regional security and that Kyrgyzstan would support its operation at least through 2014 in line with U.S. Administration objectives for drawing down U.S. forces.¹⁷¹

In March 2012, Secretary of Defense Leon Panetta visited Bishkek, reportedly to obtain reassurances about the Kyrgyz government’s basing commitments. In early May 2012, however, President Atambayev reiterated that the basing accord would not be extended when it came up for renewal in 2014, an announcement that was hailed by the Russian Foreign Ministry. In May 2013, the Kyrgyz legislature reported that it had received a draft bill from the government on formally renouncing the basing accord.

¹⁶⁹ See also CRS Report R40564, *Kyrgyzstan and the Status of the U.S. Manas Airbase: Context and Implications*, by Jim Nichol.

¹⁷⁰ *CEDR*, April 12, 2010, Doc. No. CEP-600.

¹⁷¹ U.S. Department of State, *Remarks With President Otunbayeva After Their Meeting*, Hillary Rodham Clinton, *Secretary of State*, December 2, 2010.

The U.S. Embassy in Bishkek has reported that in FY2012, the United States provided \$142.1 million in direct, indirect, and charitable expenses in connection with the Manas Transit Center; \$150.6 million in FY2011, \$131.5 million in FY2010; and \$108 million in FY2009.

Of this FY2012 amount:

- \$60 million was a lease payment;
- \$25.89 million was landing and other fees and leases;
- \$60,505 was a contribution to Kyrgyz Aeronavigation;
- \$52.23 million was for building renovations and road repairs, for furniture and other equipment, for supplies and services, and other airport improvements;
- \$ 1.89 million was for “programmatic humanitarian assistance”; and
- \$2.0 million was for other local spending

The December 2010 Congressional Report on Fuel Contracts

In December 2010, the majority staff of the Subcommittee for National Security and Foreign Affairs of the House Oversight Committee released a report on contracts awarded by the Defense Department’s Defense Logistics Agency (DLA) to the privately owned Red Star and its sister Mina firms for the supply of jet fuel for the Manas Transit Center.¹⁷² The report stressed that many citizens of Kyrgyzstan, and even then-Kyrgyz President Roza Otunbayeva, supposed that former Kyrgyz Presidents Askar Akayev and Bakiyev and their families had benefitted from the contracts in a corrupt fashion. Perceptions of corruption regarding the fuel contracts, according to the report, were significant factors in the overthrow of the presidents and in growing tensions between the United States and Kyrgyzstan. The subcommittee reported evidence from the FBI that the Akayev family was corruptly involved in fuel supplies to the Manas Transit Center, but the subcommittee found no direct evidence of illicit involvement by the Bakiyev family. President Otunbayeva had called for transparency in the fuel contracts in a speech at the U.N. General Assembly in September 2010 and during an associated meeting with President Barack Obama.

According to the report’s findings, DLA did not know who owned Red Star or Mina until late 2010, did not claim to care whether contract funds were being misappropriated by Akayev’s family, did not know that Russia’s state-owned Gazprom gas firm had an ownership interest in a subsidiary of the firms, and did not claim to know that the firms were using false certifications to obtain fuel from Russia. On the latter issue, Red Star and Mina had repeatedly informed DLA of the false certifications scheme, according to emails and other documents. In a 2006 Red Star proposal for a fuel contract, for instance, the firm spelled out that it was participating in a scheme to circumvent supposed Russian restrictions on fuel exports for military uses, and warned DLA that opening up the contracting process to other bidders might expose this scheme and lead to a fuel cut-off by Russia. The 2006 contract was subsequently awarded to Red Star without competition. A 2009 contract to Mina also was awarded without competition on “national security” grounds. The subcommittee argued that the use of such a scheme to obtain fuel and DLA’s apparent lack of reaction to the scheme opened the United States to excessive strategic

¹⁷² U.S. House of Representatives, Committee on Oversight and Government Reform, Subcommittee on National Security and Foreign Affairs, *Mystery at Manas: Strategic Blind Spots in the Department of Defense’s Fuel Contracts in Kyrgyzstan*, Report of the Majority Staff, December 2010.

vulnerability, since a sudden fuel cutoff by Russia could jeopardize U.S. military operations in Afghanistan.

Red Star and Mina reported that the Russian government knew that Gazprom was the source of jet fuel for the Manas Transit Center. The firms claimed, however, that they still had to falsely certify that the aviation fuel was being used for civilian purposes so that Russian authorities could claim that their ban on aviation fuel exports for military uses was not being circumvented. After then-President Putin apparently decided in early 2009 that the U.S. airbase at Manas should be closed and offered assistance to Kyrgyzstan as a seeming *quid pro quo*, Gazprom initiated a slowdown in fuel shipments, according to the report. Although Kyrgyzstan's then-President Bakiyev had pledged to Putin that he would close the airbase, in mid-2009 Bakiyev instead redesignated it as the "Manas Transit Center" and permitted it to continue operations. Russia then "discovered" that Gazprom's fuel shipments were being used by the airbase, imposed a high export tariff on all fuel exports to Kyrgyzstan on April 1, 2010, and later cut off all fuel shipments to Kyrgyzstan through Mina and Red Star.

The report also criticized the State Department and the U.S. Embassy in Bishkek for ignoring the ramifications of the fuel contracts on U.S.-Kyrgyz relations. Even after Secretary of State Hillary Clinton became engaged with the issue during her December 2010 visit to Kyrgyzstan (see below), the embassy reportedly asserted that issues involving the fuel contract were beyond its concern, according to the report.

Among the recommendations on improving the transparency and due diligence of fuel contracts for the Manas Transit Center, the subcommittee called for an interagency analysis of the U.S. military's "extraordinary reliance on Mina and Red Star for jet fuel" and on the risks associated with increased Russian influence over the fuel supply chain supporting U.S. operations in Afghanistan. The subcommittee also stated that "ability to perform and financial viability are necessary but not sufficient objects of due diligence. Business history, litigation exposure, insurance posture, affiliated companies, and ownership are also important for U.S. contacting authorities to understand in order to make competent judgments about contractors." Knowledge of ownership, for instance, is needed to satisfy a Federal Acquisition Regulations requirement that principals be checked against sanctions lists, it stated.

Recent Fuel Contract Developments

In November 2010, DLA awarded Mina a \$315 million contract to continue supplying up to 120 million gallons of fuel to the Manas Transit Center for at least one more year. An amendment to the contract later highlighted by then-Secretary Clinton during her December 2010 visit to Kyrgyzstan provided for the possible addition of a second supplier for between 20 and 50% of the fuel.¹⁷³ The Kyrgyz government called for the Manas Refueling Complex—established in mid-2010 as a joint venture between the Kyrgyz government and Gazprom—to be named as the sole supplier and for Mina to be suspended from the contract. The report by the House Subcommittee raised concerns about more direct Russian involvement in fuel supplies, since the country has appeared to use its energy exports as a tool in foreign relations.¹⁷⁴

¹⁷³ U.S. Department of Defense, *Press Release*, November 4, 2010.

¹⁷⁴ Deirdre Tynan, "Kyrgyzstan: Manas Fuel Supplier Doubles Down on Good News," *Eurasianet*, November 4, 2010; Deirdre Tynan, "Kyrgyzstan: Is Manas Fuel Contract Award Only the Start, not End of Intrigue?" *Eurasianet*, November 5, 2010; Deirdre Tynan, "Kyrgyzstan: Manas Fuel Supply Contract to Be Re-Opened?" *Eurasianet*, (continued...)

In early February 2011, a U.S.-Kyrgyz agreement on fuel supplies was signed. A few days later, the Manas Refueling Complex was reincorporated as the Gazpromneft-Aero-Kyrgyzstan joint venture, with Kyrgyzstan as the minority partner (with 49% of the shares). The U.S. Defense Logistics Agency placed its first order for fuel with Gazpromneft-Aero-Kyrgyzstan on September 26, 2011, to initially supply 20% of the Transit Center's aviation fuel needs (estimated at up to 12 million gallons per month), potentially reaching 50% or more by the end of the year. According to one report, the fuel is directly supplied from Gazprom's oil refineries and transported by the Russian Transoil company to the transit center.¹⁷⁵

On October 26, 2011, the Defense Logistics Agency (DLA) announced that it had awarded a one-year contract for 2012 for the provision of fuel to the Manas Transit Center to World Fuel Services Europe (WFSE), a subsidiary of a U.S.-based firm. Under the contract, WFSE will cooperate with Gazpromneft-Aero Kyrgyzstan (GAK) to fulfill the aviation fuel needs of the Transit Center. WFSE is to provide a minimum of 10% of the fuel requirements of the Transit Center and a maximum of 100%, but GAK may eventually be called upon to provide up to 90% of the monthly aviation fuel supplies based on its capabilities and performance. The new contract does not mention any role for Mina Corporation in providing fuel. The U.S. Embassy in Bishkek stated that the new contract aimed "to ensure a stable, secure, and uninterrupted supply of fuel" to the Transit Center.¹⁷⁶

The U.S. Embassy in Bishkek reported in October 2012 that DLA had provided \$208.1 million to GAK for jet fuel in FY2012. According to some reports, DLA also may have purchased jet fuel from Turkmenistan and Azerbaijan, in order to diversify the sources of supply and not rely exclusively on Russia as a source.¹⁷⁷

The Northern Distribution Network to Afghanistan

Because supplies transiting Pakistan to Afghanistan frequently were subject to attacks, General David Petraeus, the then-Commander of the U.S. Central Command, visited Kazakhstan and Tajikistan in late January 2009 to negotiate alternative air, rail, road, and water routes for the commercial shipping of supplies to support NATO and U.S. operations in Afghanistan (he also visited Kyrgyzstan to discuss airbase issues; see below). To encourage a positive response for this Northern Distribution Network (NDN), the U.S. embassies in the region announced that the United States hoped to purchase many nonmilitary goods locally to transport to the troops in Afghanistan. Kazakhstan and Tajikistan permitted such transit in February 2009, Uzbekistan permitted it in April 2009, and Kyrgyzstan permitted it in July 2009 (Georgia had given such permission in 2005, Russia in 2008, and Azerbaijan in March 2009).

There are broadly three land routes: one through the South Caucasus into Central Asia; one from the Baltic states through Russia, Kazakhstan, and Uzbekistan; and one from the Baltic states through Russia, Kazakhstan, Kyrgyzstan, and Tajikistan. Although some small cargoes reportedly were sent along the route on an ad hoc basis in late 2008, a much-publicized rail shipment of nonlethal supplies entered Afghanistan in late March 2009 after transiting Latvia, Russia, Kazakhstan, and Uzbekistan.¹⁷⁸ During his confirmation hearing in July 2011 as Commander of the U.S. Transportation Command, General William Fraser stated that the aim was to boost the percentage of surface transit through the NDN.¹⁷⁹ The Senate Foreign Relations Committee reported in late 2011 that almost three-fourths of the nonlethal surface shipments to Afghanistan were being transported via the NDN (this amount increased to virtually all surface transport following Pakistan's halt to shipments from late November 2011 to early July 2012).¹⁸⁰ Supplementing land routes, Uzbekistan's Navoi airport reportedly is being used to transport supplies to Afghanistan. After aircraft land at Navoi, the supplies are sent by rail and truck to Afghanistan.¹⁸¹

In August 2011, shipments began along a 50-mile rail line that was completed from the town of Hairatan, on Afghanistan's border with Uzbekistan, to the city of Mazar-e-Sharif in Afghanistan.¹⁸² Reportedly, the bulk of ISAF cargo containers shipped through the NDN eventually enter Afghanistan via this Uzbekistan-Afghanistan rail link. U.S. Defense Department officials reportedly long have been concerned that officials in Uzbekistan delay the transit of freight across the border into Afghanistan until bribes are paid by various commercial shippers.

Among the reported local purchases of supplies as incentives to regional countries to facilitate NDN shipments are food items, lumber, cement, rebar, corrugated and galvanized steel, and fuel drums. According to one report, the U.S. military greatly increased its purchases of local supplies for Afghanistan in FY2012, spending about \$1.3 billion, including \$820.5 million in Turkmenistan (presumably for jet fuel and transport). To expand such purchases, the Defense Logistics Agency reportedly posted liaison officers in Kazakhstan and Uzbekistan, and it planned to at least match this pace of purchases in FY2013.¹⁸³

Besides commercial shipping of nonlethal cargoes, the regional governments allegedly have quietly given U.S. and NATO military aircraft over-flight privileges for the transport of weapons and troops to Afghanistan. At the July 2009 U.S.-Russia summit, Russia openly announced that it

¹⁸³ Joshua Kucera, "Turkmenistan Big Beneficiary Of Pentagon Money, While Uzbekistan Lags," *Eurasianet*, December 3, 2012. Purchases were reported to be \$137.3 million in Kazakhstan, \$218.1 million in Kyrgyzstan, \$11.7 million in Tajikistan, and \$105.9 million in Uzbekistan.

was permitting such overflights. Some observers suggested that the announcement was linked to the assertion of some Russian officials that such transport could substitute for U.S. and NATO use of Manas and other Central Asian airbases. Presidents Obama and Nazarbayev reportedly agreed in principle to air flights of troops and unspecified equipment, including along a circumpolar route transiting Kazakhstan, during their meeting in April 2010, and an air transit agreement was signed on November 12, 2010.

Most of the Central Asian governments gave permission in 2012 for the egress of supplies and troops from Afghanistan in line with U.S. and NATO plans to draw down military operations in Afghanistan by late 2014. Assistant Secretary Blake reported in August 2012 that discussions are underway within the U.S. government on how much and what types of equipment removed from Afghanistan might be declared Excess Defense Articles (EDA) and provided to regional governments. He indicated that the U.S. government probably would not provide Uzbekistan with lethal EDA (weaponry), but might well provide military vehicles. He suggested that Uzbekistan's support for the NDN may have raised the ire of terrorist organizations, so that "it is very much in our interest to help Uzbekistan defend itself against such attacks." At the same time, he dismissed concerns that military assistance provided to Uzbekistan could be misused.¹⁸⁴ According to some observers, Uzbekistan withdrew from the CSTO at least in part in the hope of obtaining funds and equipment from the United States and NATO during the withdrawal of forces from Afghanistan.¹⁸⁵ One Russian newspaper reported in November 2012 that Russian officials had offered large military aid packages to Kyrgyzstan and Tajikistan, at least in part to convince these countries not to accept excess equipment from the United States, which these officials presumed would come with strings attached, including technical advisory assistance.¹⁸⁶

According to one plan discussed by USCENTCOM in late 2012 for the egress from Afghanistan of rolling stock (equipment with wheels or tracks that is self-propelled or can be towed) or non-rolling stock (all other equipment), almost one-quarter (500 out of 2,200 containers and vehicles) may be evacuated by rail or road through Central Asia. The plan envisages that almost one-quarter of containers and vehicles may be flown to Dubai or Jordan, and that over one-half may be able to egress through Pakistan.¹⁸⁷

Weapons of Mass Destruction

Major U.S. security interests have included elimination of nuclear weapons remaining in Kazakhstan after the breakup of the Soviet Union and other efforts to control nuclear proliferation in Central Asia. The United States has tendered aid aimed at bolstering their export and physical controls over nuclear technology and materials, in part because of concerns that Iran is targeting these countries.¹⁸⁸

¹⁸⁴ U.S. Department of State, *On-the-Record Briefing With International Media: Robert O. Blake, Jr., Assistant Secretary, Bureau of South and Central Asian Affairs*, August 15, 2012.

¹⁸⁵ Karimjan Akhmedov and Evgeniya Usmanova, "Afghanistan Withdrawal: The Pros and Cons of Using the Northern Distribution Network," *Eurasianet*, September 12, 2012.

¹⁸⁶ *Kommersant*, November 6, 2012; Joshua Kucera, "Report: Russia Spending \$1.3 Billion To Arm Kyrgyzstan, Tajikistan," *Eurasianet*, November 7, 2012. Other reasons for the boosted aid reportedly included preparing these countries for the post-2014 security situation in Afghanistan. Lastly, the boosted aid had been pledged as a *quid pro quo* after both countries had extended military basing leases with Moscow.

¹⁸⁸ A Treaty on the Central Asian Nuclear Weapons Free Zone entered into force in January 2009. All five Central (continued...)

After the Soviet breakup, Kazakhstan was on paper a major nuclear weapons power (in reality Russia controlled these weapons). In December 1993, the United States and Kazakhstan signed a Cooperative Threat Reduction (CTR) umbrella agreement for the “safe and secure” dismantling of 104 SS-18s, the destruction of silos, and related purposes. All bombers and their air-launched cruise missiles were removed by late February 1994 (except seven bombers destroyed with U.S. aid in 1998). The SS-18s were eliminated by late 1994. On April 21, 1995, the last of about 1,040 nuclear warheads had been removed from SS-18 missiles and transferred to Russia, and Kazakhstan announced that it was nuclear weapons-free. The United States reported that 147 silos had been destroyed by September 1999. A U.S.-Kazakh Nuclear Risk Reduction Center in Almaty was set up to facilitate verification and compliance with arms control agreements to prevent the proliferation of WMD.

Besides the Kazakh nuclear weapons, there are active research reactors, uranium mines, milling facilities, and dozens of radioactive tailing and waste dumps in Kazakhstan, Kyrgyzstan, Tajikistan, and Uzbekistan. Many of these sites reportedly were inadequately protected against theft and CTR aid has been used to assist in securing them. Kazakhstan is reported to possess one-fourth of the world’s uranium reserves, and Kazakhstan and Uzbekistan have been among the world’s top producers of low-enriched uranium.

Among Kazakhstan’s nuclear sites was a fast breeder reactor at Aktau that was the world’s only nuclear desalinization facility. In 1997 and 1999, U.S.-Kazakh accords were signed on decommissioning the Aktau reactor. Shut down in 1999, it had nearly 300 metric tons of uranium (some highly enriched) and plutonium (some weapons-grade) spent fuel in storage pools. CTR aid was used to facilitate transporting 600 kg of highly enriched uranium (HEU) from Kazakhstan to the United States in 1994, 2,900 kg of up to 26% enriched nuclear fuel from Aktau to Kazakhstan’s Ulba facility in 2001 (which Ulba converted into less-enriched fuel), and 162.5 lb. of HEU spent fuel from Aktau to Russia in May 2009. In the latter instance, the material originally had been provided by Russia to Kazakhstan, and was returned to Russia in a series of four shipments by rail for storage between December 2008 and May 2009. In November 2010, CTR aid was used to facilitate the shipment of the last of more than 10 metric tons of highly enriched uranium and three metric tons of weapons-grade plutonium from Aktau to a newly constructed storage site 1,800 miles away at the former Semipalatinsk Test Site in East Kazakhstan Region.¹⁸⁹

Kazakhstan and Uzbekistan hosted major chemical and biological warfare (CBW) facilities during the Soviet era. CTR and Energy Department (DOE) funds have been used in Kazakhstan to dismantle a former anthrax production facility in Stepnogorsk, to remove some strains to the United States, to secure two other BW sites, and to retrain scientists. CTR funding was used to dismantle Uzbekistan’s Nukus chemical weapons research facility. CTR aid also was used to eliminate active anthrax spores at a former CBW test site on an island in the Aral Sea. These latter two projects were completed in 2002. Other CTR aid helps keep former Uzbek CBW scientists

Asian states are signatories. The Treaty prohibits the development, manufacture, stockpiling, acquisition, or possession of nuclear explosive devices within the zone. See CRS Report RL31559, *Proliferation Control Regimes: Background and Status*, coordinated by Mary Beth Nikitin.

¹⁸⁹ U.S. Department of Energy, National Nuclear Security Administration, *Press Release: Joint Statement By Co-Chairs of the U.S.-Kazakhstan Energy Partnership On Successful Completion of the U.S.-Kazakhstan BN-350 Spent Fuel Program*, November 17, 2010; *Press Release: NNSA Secures 775 Nuclear Weapons Worth of Weapons-Grade Nuclear Material from BN-350 Fast Reactor in Kazakhstan*, November 18, 2010.

employed in peaceful research. Uzbekistan has continued to cooperate with the Departments of Defense and Energy—even after it restricted other ties with the United States in 2005—to receive radiation monitoring equipment and training.

In a joint U.S.-Kazakhstan-Russia statement and other remarks at the nuclear security summit in Seoul, South Korea, in March 2012, the United States hailed Kazakhstan’s efforts to secure nuclear materials inherited from the former Soviet Union as guidelines for other global nuclear non-proliferation efforts.¹⁹⁰
